Impacts and Risk Assessment of Technology for Internet Security Charles A. Shoniregun, 2006-03-30 Details the key impacts and risk assessment within the context of technology-enabled information (TEI). This volume is designed as a secondary text for graduate students, and also for a professional audience of researchers and practitioners in industry.

Perfumes P.M. Muller, D. Lamparsky, 2012-12-06 The idea of publishing this book on Perfumes: Art, Science and Technology grew out of the observation that, on the verge of the 1990s, there was really no state-of-the-art compilation of the relevant know-how on which the fragrance industry is based. It was obvious that such a compilation would be well received, not only by perfumers and fragrance chemists, but also by those involved in related trade and marketing or in the development and distribution of consumer products, by researchers from other fields, by students and, finally, by amateurs of perfumes in general. Therefore, we set out to find competent authors who were willing to contribute to the endeavour, and we did not do this unselfishly; on the contrary, we selected a wish-list of specialists who would provide us with new insight and characterize the trends and research priorities determining the future. Thus, we were counting on learning much ourselves in the course of the project. We were more than pleasantly surprised by the reactions to our first letter—and so was Elsevier. We certainly had not expected perfumers who are usually much more 'doers' than 'writers' to react in such an enthusiastic way; especially, the spontaneous affirmative answer from the famous E. Roudnitska created a momentum which contributed significantly to the successful completion of this book. But, of course, we should not create the impression that the other authors' chapters are less important, and we thank all of them heartily for their invaluable effort.

Implementing NAP and NAC Security Technologies Daniel V. Hoffman, 2008-04-21 You're ready to see through the misconceptions and misinformation about NAP/NAC that might come your way. Here is an excellent resource for uncovering the actual vulnerabilities and exploits that the various NAP/NAC types can address. – You'll find real-world hacking scenarios, along with complete implementation guidance for the right NAP/NAC solution. – This guide will help you determine what type of solution makes the most sense, based upon the most prevalent risks in your environment.--Jacket.

Vehicular Communications for Smart Cars Niaz Chowdhury, Lewis Mackenzie, 2021-12-31 This book covers a wide range of topics from the smart transportation domain. It discusses protocols, applications and security concerns in various vehicular networks using examples and easy-to-understand figures. The first four chapters focus on vehicular network protocols and applications, while the remaining four chapters incorporate security, trust and privacy issues with examples from real-life cases. The book concludes with a vision of what to expect in the near future and will be an invaluable resource for anybody interested in this nascent technology and its variegated applications. Dr. Niaz Chowdhury is a postdoctoral research associate at the Knowledge Media Institute, the Open University in England. Dr. Lewis M. Mackenzie is a senior lecturer in computing science at the University of Glasgow.

Never Sniff A Gift Fish Patrick F. McManus, 1984-09-15 More humorous observations and insights into the agonies and ecstasies of hunting, fishing, and camping by the author of *They Shoot Canoes, Don't They?* and other celebrations of life in the wild.

The Covid-19 Intelligence Failure Erik J. Dahl, 2023 An in-depth analysis of why COVID-19 warnings failed and how to avert the next disaster Epidemiologists and national security agencies warned for years about the potential for a deadly pandemic, but in the end global surveillance and warning systems were not enough to avert the COVID-19

disaster. In *The COVID-19 Intelligence Failure*, Erik J. Dahl demonstrates that understanding how intelligence warnings work ? and how they fail ? shows why the years of predictions were not enough. In the first in-depth analysis of the topic, Dahl examines the roles that both traditional intelligence services and medical intelligence and surveillance systems play in providing advance warning against public health threats ? and how these systems must be improved for the future. For intelligence to effectively mitigate threats, specific, tactical-level warnings must be collected and shared in real time with receptive decision makers who will take appropriate action. Dahl shows how a combination of late and insufficient warnings about COVID-19, the Trump administration's political aversion to scientific advice, and decentralized public health systems all exacerbated the pandemic in the United States. Dahl's analysis draws parallels to other warning failures that preceded major catastrophes from Pearl Harbor to 9/11, placing current events in context. *The COVID-19 Intelligence Failure* is a wake-up call for the United States and the international community to improve their national security, medical, and public health intelligence systems and capabilities.

Securing IM and P2P Applications for the Enterprise Marcus Sachs,Paul Piccard,2005-12-12 This book is for system administrators and security professionals who need to bring now ubiquitous IM and P2P applications under their control. Many businesses are now taking advantage of the speed and efficiency offered by both IM and P2P applications, yet are completely ill-equipped to deal with the management and security ramifications. These companies are now finding out the hard way that these applications which have infiltrated their networks are now the prime targets for malicious network traffic. This book will provide specific information for IT professionals to protect themselves from these vulnerabilities at both the network and application layers by identifying and blocking this malicious traffic. * A recent study by the Yankee group ranked managing and securing IM and P2P applications as the #3 priority for IT managers in 2004 * The recently updated SANS/FBI top 10 list of vulnerabilities for computers running Microsoft Windows contained both P2P and IM applications for the first time * The recently released Symantec Threat Assessment report for the first half of 2004 showed that 19 of the top 50 virus threats targeted IM or P2P applications. Despite the prevalence of IM and P2P applications on corporate networks and the risks they pose, there are no other books covering these topics

War Dogs: Tales of Canine Heroism, History, and Love Rebecca Frankel,2016-09-06 In this special edition of *War Dogs*, adapted specifically for a younger audience, Rebecca Frankel offers a riveting mix of on-the-ground reporting her own hands-on experiences in the military working dog world, and a look at the science of dogs' special abilities—from their amazing noses and powerful jaws to their enormous sensitivity to the emotions of their human companions. Her narrative gives us insight into the world of dogs in combat and the touching aspect of

the relationship between soldiers and their dogs. Frankel explores the long, rich history of dogs in the US military, from the spirit-lifting mascots of the Civil War to the dogs still leading patrols hunting for IEDs today. Frankel not only interviewed handlers who deployed with dogs in wars from Vietnam to Iraq, but top military commanders, K-9 program managers, combat-trained therapists who brought dogs into war zones as part of a preemptive measure to stave off PTSD, and veterinary technicians stationed in Bagram. She makes a passionate case for maintaining a robust war-dog force. In this YA edition, Rebecca Frankel gives further insight into her work as a journalist and how it led her to explore the world of dogs and their handlers. With a compelling cast of humans and animals, this moving book is a must read for all dog lovers.

Petrol Sniffing in Aboriginal Communities Peter D'Abbs, Sarah MacLean, 2000 This is a review of published and unpublished literature addressing petrol sniffing in Australian Aboriginal communities. In this executive summary, the main findings are itemised; however, because petrol sniffing, when it occurs, is invariably a product of a complex mix of causes findings should not be considered in isolation.

Sniff, Lick & Scratch Julia Garstecki, 2018-12-04 Sniff, Lick & Scratch! is the book parents and educators will turn to to explain the less majestic behaviors witnessed in the animal kingdom—and sneak in a little STEM learning while they're at it. Do flies really puke on our food when we're not looking? And why do dogs sniff each other's behinds? The companion book to Pick, Spit & Scratch answers these and many of the other most pressing questions young readers have about the animal kingdom—specifically, do animals really do all those nasty things we hear about, and why? As with the disgusting habits of humans, there's a bit of science behind the strange things that animals do. Each spread describes a specific naughty-by-nature habit and provides multilayered reading opportunities in the form of one or two weird, disgusting facts that ratchet up the gross factor by connecting animal habits with relatable concepts. In many cases, the author even debunks commonly held myths about the animal habits described and, in the process, shows that these animal habits, though disgusting to us humans, are really matters of evolution and survival. Have a question about a specific icky animal behavior? A glossary and index make Sniff, Lick & Scratch a great reference. Kids will get a thrill out of exclaiming Eww! as they read this book. Parents will love that their children are reading and engaged in scientific inquiry.
