Environmental Tracking for Public Health Surveillance Stanley A. Morain, Amelia M.

Budge, 2012-09-25 Satellite imagery and data are widely used in public health surveillance to provide early warning of disease outbreaks and for averting pandemics. Convergence of these technologies began in the 1970s and has gained wide acceptance in the 21st Century. *Environmental Tracking for Public Health Surveillance* focuses on the expanding use of satellite sensor imagery and long-term spectral measurements for assessing and modelling Earth's environments in context of public health surveillance. It addresses vector-borne, air-borne, water-borne, and zoonotic diseases, and explores analytical methods for forecasting environmental conditions and their potential for consequent disease outbreaks. Infectious and contagious diseases are of particular interest in this volume because once parasite-vector-human host pathways are triggered by favourable biological circumstances, pandemic diseases can spread to global scale in a matter of hours. The chapters advance readers through three sets of material. Part I reviews the 1970-2012 history of satellite Earth-science surveillance technology that led to linking natural environments to human diseases, and more generally to public health applications. Part II describes specific infectious and contagious diseases and the threat of emerging and re-emerging diseases. Part III explores the kinds of satellite data, modelling, and electronic information systems being developed to expedite health intercessions and responses at local to regional and global scales of reference. Equally important are the extensive reference sections for chapters in Parts II and III. For readers interested in tracking the development of Earth-science technology, these constitute a thorough entrée to both the health and environmental literature. The chapters are written jointly by experts in both the health and Earth-science technologies. Each chapter is accompanied by an extensive list of citations to provide background and validation of the current state-of-the-art for a variety of high-interest human diseases and associated health and well-being issues. The importance of day-to-day weather patterns, the impacts of severe weather events and longer-term climate cycles form the basis for developing information systems that meet goals and expectations of national and international health monitoring bodies. *Environmental Tracking for Public Health Surveillance* provides a state-of-the-art overview on how environmental tracking data from satellite, airborne, and ground-based sensors are being integrated into appropriate geophysical and spatial information system models to enhance public health surveillance and decision-making from local to global levels, and is intended primarily for a cross-disciplinary professional audience consisting of public health decision-makers, spatial data analysts, modelers, Earth observation specialists, and

medical researchers.

Cyber-espionage in international law Thibault Moulin, 2023-05-02 While espionage between states is a practice dating back centuries, the emergence of the internet revolutionised the types and scale of intelligence activities, creating drastic new challenges for the traditional legal frameworks governing them. This book argues that cyber-espionage has come to have an uneasy status in law: it is not prohibited, because spying does not result in an internationally wrongful act, but neither is it authorised or permitted, because states are free to resist foreign cyber-espionage activities. Rather than seeking further regulation, however, governments have remained purposefully silent, leaving them free to pursue cyber-espionage themselves at the same time as they adopt measures to prevent falling victim to it. Drawing on detailed analysis of state practice and examples from sovereignty, diplomacy, human rights and economic law, this book offers a comprehensive overview of the current legal status of cyber-espionage, as well as future directions for research and policy. It is an essential resource for scholars and practitioners in international law, as well as anyone interested in the future of cyber-security.

Jihadi Intelligence and Counterintelligence Ferdinand J. Haberl, 2023-03-22 This book analyzes the ideological roots, structures and operational methods of Jihadi intelligence and counterintelligence activities. Based on a substantive collection of data on terrorist attacks, communication channels, recruitment methods, manuals and statements released by various Jihadi groups, it examines and compares the nature, ideology and realities of Jihadi intelligence operations. The author, an expert on Jihadist ideology and paramilitary intelligence, compares the modus operandi of terrorist groups such

as al-Qaeda and the IS with those of governmental intelligence agencies, and subsequently analyzes the role of historical and religious narratives that help Jihadist groups justify their actions and military management. Further topics covered include encryption, counterfeiting, covert operations and Jihadi intelligence activities in the digital realm. The insights shared here will allow readers to gain a comprehensive understanding of Jihadist groups and their intelligence operations, while helping practitioners and policymakers develop better counterterrorism activities and counternarratives.

Globalization and Labour in the Twenty-First Century Verity Burgmann, 2016-04-14 The Open Access version of this book, available at <http://www.tandfebooks.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. Globalization has adversely affected working-class organization and mobilization, increasing inequality by redistribution upwards from labour to capital. However, workers around the world are challenging their increased exploitation by globalizing corporations. In developed countries, many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances; in

developing countries, militant new labour movements are emerging. Drawing upon insights in anti-determinist Marxian perspectives, Verity Burgmann shows how working-class resistance is not futile, as protagonists of globalization often claim. She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century. With case studies from around the world, including Greece since 2008, she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change. Aging and less agile manifestations of the labour movement decline while new expressions of working-class organization and mobilization arise to better battle with corporate globalization. This book will be of interest to students and scholars of labour studies, globalization, political economy, Marxism and sociology of work.

A Leap Forward: Capacity Building, Education and India-Afghanistan Cooperation ,2013-10-15 Since 2001, Afghanistan has provided New Delhi an opportunity to underline its role as a regional power. In the rapidly evolving geo-strategic scenario, India was forced to reconstitute and reassess its policies towards Afghanistan. India-Afghanistan Cooperation took a leap forward after the defeat of the Taliban and the installation of an Interim Authority. India's main focus has been to support the Afghan government and the political process in the country mandated under the Bonn Agreement of 2001. In the past decade, India pursued a policy of high-level engagement with Afghanistan through wide-ranging humanitarian, financial and infrastructural project assistance, as well as participation in international efforts aimed at political and economic rebuilding of Afghanistan. India has growing stakes

in peace and stability in Afghanistan and the 2011 India-Afghanistan Strategic Partnership Agreement underlines India's commitment to ensure that a positive momentum in the Indo-Afghanistan ties is maintained. One of the foremost aims of India's involvement in Afghanistan has been to assist in building indigenous Afghan capacity and institutions which encompasses all the sectors of development. This book, apart from examining the changing trajectory of India's policy towards Afghanistan, focuses on two particular areas of Indian intervention in Afghanistan namely Capacity Building and Education. It also evaluates its importance in strengthening the Delhi-Kabul ties. Identification of factors that are aiding or blockading the smooth functioning of these policies, have been the purpose of this academic pursuit. Attempts have been made to reach out to the Afghan beneficiaries in both India and Afghanistan, in order to understand their perspectives, requirements and disgruntlements. This research underscores that the purpose behind India's involvement in Afghanistan should not be defeated and thereby attempts to put forward certain steps and directions that can be adopted by Indian Government in order to achieve long-lasting dividends by smooth implementation of India's aid disbursement policy. As US led North Atlantic Treaty Organization forces prepare to leave Afghanistan in 2014, India stands at a crossroads as it remains keen to preserve its interest in Afghanistan. This book apart from underlying ever-evolving Indian policy in Afghanistan provides concrete recommendations that can enhance the effectiveness of ongoing Indo-Afghanistan cooperation.

Education and Political Subjectivities in Neoliberal Times and Places Eva Reimers, Lena Martinsson, 2016-10-04

Education and Political Subjectivities in Neoliberal Times and Places investigates the conditions and possibilities for political subjectivities to emerge in international educational contexts, where neoliberal norms are repeated, performed and transformed. Through demonstrating the possibility of political subjectivities, this book argues that neoliberalism should neither be considered post-political, nor a natural law by which educational practices have to abide. This book considers how political subjectivities are made possible in education in spite of dominant neoliberal norms. Chapters address key theoretical discussions surrounding these different, sometimes contradicting, norms and their relationship to education, economy and politics. This innovative approach considers diverse educational and political initiatives in the wake of new public management, postcolonial perspectives on neoliberal education, and educational practices and critical possibilities. The book advocates understanding and enacting democracy as an experiment, based on the conception that democracy is constantly constructed and constitutes a transformative process in

society in general as well as in education. This book advances the argument that there is still room for political subjectivity in spite of the dominance of neoliberal educational governance. It will appeal to researchers, academics and postgraduate students in the fields of higher education, education policy and politics, sociology of education and comparative and international education, as well as those interested in neoliberalism, new public management, and inequality.

Managing Disaster Risks to Cultural Heritage Bijan Rouhani,Xavier Romão,2023-11-15 *Managing Disaster Risks to Cultural Heritage* presents case studies from different regions in the world and establishes a framework for understanding, identifying, and analysing disaster risks to immovable cultural heritage. Featuring contributions from academics and practitioners from around the globe, the book presents a comprehensive view of the scholarship relating to cultural heritage, disaster risk preparedness, and post-disaster recovery. Particular attention is given to the complex and dynamic nature of disaster risks and how they evolve during different phases of a catastrophic event, especially as hazards can create secondary effects that have greater impacts on cultural heritage, infrastructure, and economy. Arguing that risk preparedness and mitigation have historically been secondary to reactive emergency and first aid response, the book demonstrates that preparedness plans based on sound risk assessments can prevent hazards from becoming disasters. Emphasising that the protection of cultural heritage through preparedness, mitigation actions, and risk adaptation measures – especially for climate change – can contribute to the resilience of societies, the book highlights the vital role of communities in such activities. *Managing Disaster Risks to Cultural Heritage* will be useful to students, professionals, and scholars studying and working with cultural heritage protection. It will be of particular interest to those working in the fields of Cultural Heritage, Archaeology, Conservation and Preservation, Sustainable Development, and Disaster Studies.

Governing in the Shadows Paula Cristina Roque, 2021-12-01 This book traces three decades of securitization in Angola. As a governing strategy during war and peacetime, it muted the aspirations of those on opposing sides, distorted the state, emboldened elites and redefined the identity of Angolans. Through this lens, Paula Cristina Roque provides an original account of Angola's post-conflict state-building. Securitization protected the interests of President dos Santos, the ruling MPLA party and the elites supporting the regime. Angola's array of security forces and infrastructure provided an alternative to a fully functioning executive, at national, provincial and local levels. The intrusive way in which any form of dissent or activism was crushed allowed the presidency to control the direction and narrative of the post-war years. But the facade of democracy, development and stability hid a very different reality

for the majority of Angolans, who remained poor, disenfranchised and marginalized. Roque explores the inner workings of the intelligence services, army and presidential guard, explaining the trajectory of a survivalist and fearful regime presiding over scarcities and injustices. She shows that the survival of national security and governing elites was the highest priority. The 'shadows' held far more power than institutions, and weakened them-widening the gap between government and governed.
