History of Strategic and Ballistic Missile Defense: Volume I Barry Leonard, 2010-11 As part of a larger study of the strategic arms competition which developed after World War II between the U.S. and the U.S.S.R., this study of the two countries; strategies for air and ballistic missile defense addresses two broad subjects: (1) How did each country approach the problem of defense against the threat from the air? (2) Why did each country accent particular elements of an air defense strategy at various periods between 1945 and 1972? The first question concerns the means that leaders chose for defense against an increasingly sophisticated offensive threat. Includes several appendices of chronologies, tables, charts, maps and notes.

On Air Defense James D. Crabtree, 1994-10-30 This book is a study of all aspects of air defense from its beginnings during the French Revolution when artillery gunners tried to hit primitive balloons with their cannons to the

use of Patriot missiles in the Gulf War to shoot down tactical ballistic missiles. Crabtree's history focuses on the development of tactics and technology from the Franco-Prussian War to the present. The strategic air defense of World War I and World War II are featured, as are the development of surface-to-air missiles by Germany in World War II and by the United States and the USSR in Vietnam and the Middle East.

Archie to SAM Air University Press, U. S. Military, Department of Defense (DoD), Kenneth P. Werrell, U. S. Air Force (USAF), 2017-09-30 Archie to SAM is an update in 2005 to Kenneth Werrell's Archie, Flak, AAA, and SAM. He continues to study ground-based air defense systems in new events, including the Gulf War. In rescuing ground-based air defense systems from long neglect, Werrell delves into such topics as tactics, leadership, change, and innovation. Dr. Kenneth Werrell's history of ground-based air defense performs an important service both to scholarship and, more importantly, to the defense of our nation's freedom. It is perhaps human nature that we tend over time to lose sight of the lessons of the past, especially when they do not conform to certain cherished preconceptions of ours. That such myopia can be dangerous, if not downright disastrous, Dr. Werrell's study richly illustrates. Without sentimentalism, he chronicles a pattern of lessons learned and too quickly forgotten as the marvel of air power was reminded again and again of its limitations and vulnerability. In Korea and in Vietnam, the American people were stripped of their illusions of national and technical omnipotence. The unhappy outcome of those two conflicts was doubly lamentable because the lessons of World War II were--or should have been--

fresh in our minds. In that world war, as Dr. Werrell shows, relatively cheap ground-based air defense did make a difference: at Ploesti, at Antwerp, and at the Rhine bridges. And it will make a difference tomorrow. The greatest value of Dr. Werrell's work is that it provides guideposts and guidance for us as professional soldiers and aviators charged with upholding American security. We have taken history's lessons to heart as we plan and program our ground-based air defenses into the next decade and beyond. In both the forward and the rear areas, we have emphasized the time-honored principles of mass, mix, and mobility. No one weapon, not even today's modern aircraft, can do the job alone. The truism applies with particular force to antiaircraft defense. And at least one other truism emerges from Dr. Werrell's and our own studies: effective air defense requires a joint and combined effort. Our planning has been predicated on the assumption that counterair will play a central role in safeguarding our ground forces from air attack. On the ground, the air defense artillery will count on the cooperation and assistance of our colleagues in the infantry, armor, and field artillery. On our success or failure in working together to meet the challenges of tomorrow will rest our nation's future.

2019 Missile Defense Review Department Of Defense, 2019-01-19 2019 Missile Defense Review - January 2019 According to a senior administration official, a number of new technologies are highlighted in the report. The review looks

at the comprehensive environment the United States faces, and our allies and partners face. It does posture forces to be prepared for capabilities that currently exist and that we anticipate in the future. The report calls for major investments from both new technologies and existing systems. This is a very important and insightful report because many of the cost assessments for these technologies in the past, which concluded they were too expensive, are no longer applicable. Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>
