**Scott A. Cohen, James E.S. Higham, Gossling Stefan, Paul Peeters**

Predicting and Changing Behavior Martin Fishbein,Icek Ajzen,2011-02-14 This book describes the reasoned action approach, an integrative framework for the prediction and change of human social behavior. It provides an up-to-date review of relevant research, discusses critical issues related to the reasoned action framework, and provides methodological and conceptual tools for the prediction and explanation of social behavior and for designing behavior change interventions.

**Applying leadership and management in planning** Morphet, Janice,2015-05-06 Planning is central to economic, social and environmental life but its practice is frequently criticised by all who engage in it. Seen as too restrictive by those who promote development and too weak by those opposing it, planners who advise on proposals cannot sit on the fence. Is it the planning system that is problematic or is it the planners who work within it? This valuable book examines these issues at the continuing professional development level and discusses the ways in which management theories, tools and techniques can be applied to planning practice and used by all who engage in it. Written by an experienced author and widely respected academic, the book includes case studies and question and answer sections, and will be valuable through both initial and continuous professional education, helping candidates prepare for examinations and subsequent management.

**Event Impact** John Armbrrecht,Tommy D. Andersson,2017-10-02 Events are increasingly used instrumentally to achieve goals of society such as cultural development, destination branding or economic development. Event impacts are, however, routinely measured from a purely economic perspective. Event Impact fills an important niche and a void in the literature on events by taking a holistic approach, incorporating issues like value creation, experiential value, value measurement, sustainability and impact assessment. It is one of the first books devoted to comprehensively dealing

with the subject of event impacts, combining the ideas of an international group of academics to tackle an expanding area of research that cannot be met by the work of a single researcher. Methodological concepts such as triple impact assessment, cost-benefit analysis, travel cost method and Q-sort are combined, applied and tested in an event context, creating a unique book that broadens and deepens our knowledge about event impacts theoretically, methodologically as well as empirically. This book was originally published as a special issue of the Scandinavian Journal of Hospitality and Tourism.

*Understanding and Governing Sustainable Tourism Mobility* Scott A. Cohen, James E.S. Higham, Gössling Stefan, Paul Peeters, 2014-03-26 Despite a growing contribution to climate change, tourist and traveller behaviour is currently not acknowledged as an important sector within the development of climate policy. Whilst tourists may be increasingly aware of potential impacts on climate change there is evidence that most are unwilling to modify their actual behaviours. Influencing individual behaviour in tourism and informing effective governance is therefore an essential part of climate change mitigation. This significant volume is the first to explore the psychological and social factors that may contribute to and inhibit sustainable change in the context of tourist and traveller behaviour. It draws on a range of disciplines to offer a critical review of the psychological understandings and behavioural aspects of climate change and tourism mobilities, in addition to governance and policies based upon psychological, behavioural and social mechanisms. It therefore provides a more informed understanding of how technology, infrastructure and cost distribution can be developed in order to reach stronger mitigation goals whilst ensuring that resistance from consumers for socio-psychological reasons are minimized. Written by leading academics from a range of disciplinary backgrounds and regions this ground breaking volume is

essential reading for all those interested in the effective governance of tourism's contribution to climate change now and in the future.

**People-Environment Studies: Promoting Sustainable Places and Behaviors** Giuseppe Carrus, Tony Peter Craig, Adina Claudia Dumitru, Stefano Mastandrea, 2022-09-26

**Exploring Nightlife** Jordi Nofre Mateo, Adam Eldridge, 2018-04-23 Comprising original contemporary research, this collection brings together case studies from across the globe that explore topics including nightlife and urban development, race, gender and youth culture, alcohol and drug use, and urban renewal.

*Active Sport Tourism* Heather J. Gibson, Matthew Lamont, Millicent Kennelly, Richard J. Buning, 2020-05-21 This volume serves to expand theory-driven understandings of active sport tourism by showcasing five empirical studies examining a variety of active sport tourism contexts. These include table tennis at the World Veteran's Championships, ultramarathon, running/cycling/triathlon, skiing/snowboarding, and a range of issues such as active ageing and travel-related carbon footprints. The volume also seeks to explore possibilities for future directions in active sport tourism and act as a catalyst for ongoing scholarly inquiry. Travelling to take part in active sporting pursuits is growing in popularity around the world. Active sport tourism encompasses travel to participate in a myriad sports, as well as in competitive participatory sport events. Much of the recent growth in active sport tourism is associated with travel to compete in participatory sport events, notably the big city international marathon events; amateur running, triathlon, and cycling events; Masters Games; and team sport tournaments. While the broader sport tourism research literature has tended to focus on spectator-oriented sports events, particularly the mega events such as the Olympic Games, it is only recently that a concerted research agenda in active sport tourism

has emerged, making this volume innovative and relevant. This book was originally published as a special issue of the Journal of Sport & Tourism.

*Entrepreneurial Innovation* Vanessa Ratten, 2021-11-26 This book explores and asserts that there are many different types of innovation but in order to bring about fundamental change to society the innovation must be entrepreneurial. The aim of this edited book is to focus on different elements of entrepreneurial innovation in order to understand emerging issues and trends. This book shows how this enables an increase in research attention placed on how entrepreneurial innovation must have a strategic intent in order to facilitate societal change. The role of competition in enabling organizations to utilise innovation that is cutting edge is discussed with the goal of bringing together the disparate literature on entrepreneurship and innovation in terms of international competitiveness. This book presents at length examinations on how entrepreneurship can facilitate healthier strategy and competition in organisations and beyond.

Investigating the Impact of Current Issues on Leisure, Tourism, and Hospitality in Psychological Science Anestis Fotiadis, Tzung-Cheng Huan, Chris A. Vassiliadis, 2021-01-13

Social Psychology and Health Derek R. Rutter, Lyn Quine, 1994 This work, based upon a conference of the European Association of Experimental Social Psychology, examines the prevailing methods being used in social psychological research on health and safety. It compares the Health Belief Model with the Theory of Planned Behaviour.

**Drawdown** Paul Hawken, 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a

credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

*Marketing to the Social Web* Larry Weber, 2009-03-27 An updated and expanded Second Edition of the popular guide to social media for the business community Marketers must look to the Web for

new ways of finding customers and communicating with them, rather than at them. From Facebook and YouTube to blogs and Twitter-ing, social media on the Internet is the most promising new way to reach customers. Marketing to the Social Web, Second Edition helps marketers and their companies understand how to engage customers, build customer communities, and maximize profits in a time of marketing confusion. Author and social media guru Larry Weber describes newly available tools and platforms, and shows you how to apply them to see immediate results and growth. Rather than broadcast messages to audiences, savvy marketers should encourage participation in social networks to which people want to belong, where dialogue with customers, and between customers, can flourish. In Networking sites like MySpace, Facebook, and even Flickr are the perfect forums for this dialog; this book shows you how to tap into this new media. In addition to the tools and tactics that made Marketing to the Social Web a critical hit among marketers, this second edition includes three entirely new chapters that cover recent changes in the field. These new chapters describe how Facebook will monetize its business and one day surpass Google; how companies can measure the influence and effectiveness of their social media campaigns; and how marketing to mobile social media will grow into an effective practice in the near future. Marketing must reach out into new forms, media, and models. Marketing to the Social Web, Second Edition presents an exceptional opportunity to use these new tools and models to reach new markets, even in today's fragmented media environment. Larry Weber has spent the last three decades building global communications companies, including Weber Shandwick Worldwide and the W2 Group. He is also the founder and Chairman of the Massachusetts Innovation and Technology Exchange, the nation's largest interactive advocate association.

**Organizational Culture and Leadership** Edgar H. Schein, 2010-07-16 Regarded as one of the

most influential management books of all time, this fourth edition of *Leadership and Organizational Culture* transforms the abstract concept of culture into a tool that can be used to better shape the dynamics of organization and change. This updated edition focuses on today's business realities. Edgar Schein draws on a wide range of contemporary research to redefine culture and demonstrate the crucial role leaders play in successfully applying the principles of culture to achieve their organizational goals.

*Retailing in the 21st Century* Manfred Krafft, Murali K. Mantrala, 2009-12-17 With crisp and insightful contributions from 47 of the world's leading experts in various facets of retailing, *Retailing in the 21st Century* offers in one book a compendium of state-of-the-art, cutting-edge knowledge to guide successful retailing in the new millennium. In our competitive world, retailing is an exciting, complex and critical sector of business in most developed as well as emerging economies. Today, the retailing industry is being buffeted by a number of forces simultaneously, for example the growth of online retailing and the advent of 'radio frequency identification' (RFID) technology. Making sense of it all is not easy but of vital importance to retailing practitioners, analysts and policymakers.

*Climate Change and Cities* Cynthia Rosenzweig, William D. Solecki, Patricia Romero-Lankao, Shagun Mehrotra, Shobhakar Dhakal, Somayya Ali Ibrahim, 2018-03-29 *Climate Change and Cities* bridges science-to-action for climate change adaptation and mitigation efforts in cities around the world.

***The Transport System and Transport Policy*** Bert van Wee, Jan Anne Annema, David Banister, 2013 "This very interesting book provides an excellent multi-disciplinary introduction into the functioning of transport systems and the interaction with their environments." Erik Verhoef, VU University Amsterdam, The Netherlands "The editors of this important book have clearly identified that few writings on transport treat the transport system as a whole. Implicit in this is a need for a

genuinely multidisciplinary approach. An impressive list of contributors ensures that the book draws on the latest research whilst providing new insights into some of the key challenges facing transport students and researchers, transport providers and policy makers. ÷ Roger Vickerman, University of Kent, UK ÷ Since ancient times transportation has brought our world together. But the need for connectivity and accessibility in a spatially differentiated world has prompted the emergence of very complex transportation systems. This book offers a fresh and operational contribution to a better understanding of the complexity and manageability of a mobile world, by addressing in a balanced way both conceptual and applied or policy aspects of modern transportation systems. ÷ Peter Nijkamp, Free University of Amsterdam, The Netherlands Transport impacts on people and businesses in many different ways, and presents some of the key problems that decision-makers need to address. This comprehensive textbook introduces the transport system in a holistic and multidisciplinary way, bringing together the myriad components of transport. This textbook is written for an international readership of undergraduate and postgraduate students in transport and related subjects, as well as for professionals and policy decision-makers across both public and private sectors. Key features include: ÷ Discussion of the importance of transport accessibility and the impacts of transport on the environment and safety ÷ Policy issues relating to all of the discussed issues and prescribed future options. ÷ Transport evaluation methods and modelling approaches. ÷ Examples to highlight the linkages between components of the transport system ÷ for example infrastructures, land-use, vehicle technologies ÷ and the relevance of these linkages for decision making.

**Vegetarian and Plant-Based Diets in Health and Disease Prevention** François Mariotti, 2017-05-23 Vegetarian and Plant-Based Diets in Health and Disease Prevention examines the

science of vegetarian and plant-based diets and their nutritional impact on human health. This book assembles the science related to vegetarian and plant-based diets in a comprehensive, balanced, single reference that discusses both the overall benefits of plant-based diets on health and the risk of disease and issues concerning the status in certain nutrients of the individuals, while providing overall consideration to the entire spectrum of vegetarian diets. Broken into five sections, the first provides a general overview of vegetarian / plant-based diets so that readers have a foundational understanding of the topic. Dietary choices and their relation with nutritional transition and sustainability issues are discussed. The second and third sections provide a comprehensive description of the relationship between plant-based diets and health and disease prevention. The fourth section provides a deeper look into how the relationship between plant-based diets and health and disease prevention may differ in populations with different age or physiological status. The fifth and final section of the book details the nutrients and substances whose intakes are related to the proportions of plant or animal products in the diet. Discusses the links between health and certain important characteristics of plant-based diets at the level of food groups Analyzes the relation between plant-based diet and health at the different nutritional levels, i.e. from dietary patterns to specific nutrients and substances Provides a balanced evidence-based approach to analyze the positive and negative aspects of vegetarianism Addresses the different aspects of diets predominantly based on plants, including geographical and cultural variations of vegetarianism

**Contemporary Research on Business and Management** Siska Noviaristanti, 2021-11-24 This book contains selected papers presented at the 4th International Seminar of Contemporary Research on Business and Management (ISCRBM 2020), which was organized by the Alliance of Indonesian Master of Management Program (APMMI) and held in Surubaya, Indonesia, 25-27 November 2020. **Journal of Sport and Exercise Psychology** Robert C. Eklund, 2005-01-01 The Journal of Sport and Exercise Psychology (JSEP) exclusively specializes in providing the foremost coverage of sport and exercise psychology research. This highly esteemed journal presents innovative research in all areas of sport and exercise psychology from the leading scholars in the field. Areas of interest in this quarterly journal include research in social, clinical, developmental, and experimental psychology as well as psychobiology and personality. In addition to original research, JSEP provides a digest of articles from recent sport and exercise publications, media reviews, and an annual supplemental issue devoted to proceedings of the annual conference of the North American Society for the Psychology of Sport and Physical Activity. Recent issues of JSEP have presented articles on topics relating to exercise and depression, the effect of anticipated running distance on perceived exertion and attentional focus, athletic identity and its relation to exercise behavior, the effects of exercise on quality of life, and psychophysiological responses of rival sports fans. In upcoming issues, the diversity of the content in JSEP will continue with topics ranging from a study of mood and self-efficacy during acute exercise in clinical depression to competitive sport motivation and involvement

in relation to family socialization and gender. Also available is the online format of JSEP that offers the same authoritative content available in the print edition, but with the additional advantages of electronically formatted material including the ability to search journals in seconds, access to five years of back issues, and e-mail notification that the online version is available before the print version mails.
