If the Oceans Were Ink Carla Power,2015-04-07 PULITZER PRIZE FINALIST • NATIONAL BOOK AWARD FINALIST • Hailed by The Washington Post as “mandatory reading,” and praised by Fareed Zakaria as “intelligent, compassionate, and revealing,” a powerful journey to help bridge one of the greatest divides shaping our world today. If the Oceans Were Ink is Carla Power's eye-opening story of how she and her longtime friend Sheikh Mohammad Akram Nadwi found a way to confront ugly stereotypes and persistent misperceptions that were cleaving their communities. Their friendship-between a secular American and a madrasa-trained sheikh-had always seemed unlikely, but now they were frustrated and bewildered by the battles being fought in their names. Both knew that a close look at the Quran would reveal a faith that preached peace and not mass murder; respect for women and not oppression. And so they embarked on a yearlong journey through the controversial text. A journalist who grew up in the Midwest and the Middle East, Power offers her unique vantage point on the Quran's most provocative verses as she debates with Akram at cafes, family gatherings, and packed lecture halls, conversations filled with both good humor and powerful insights. Their story takes them to madrasas in India and pilgrimage sites in Mecca, as they encounter politicians and jihadis, feminist activists and conservative scholars. Armed with a new understanding of each other's worldviews, Power and Akram offer eye-opening perspectives, destroy long-held myths, and reveal startling connections between worlds that have seemed hopelessly divided for far too long. Praise for If the Oceans Were Ink “A vibrant tale of a friendship.... If the Oceans Were Ink is a welcome and nuanced look at Islam [and] goes a long way toward combating the dehumanizing stereotypes of Muslims that are all too common.... If the Oceans Were Ink should be mandatory reading for the 52 percent of Americans who admit to not knowing enough about Muslims.”—The Washington Post “For all those who wonder what Islam says about war and peace, men and women, Jews and gentiles, this is the book to read. It is a conversation among well-meaning friends—intelligent, compassionate, and revealing—the kind that needs to be taking place around the world.”—Fareed Zakaria, author of The Post-American World “Carla Power’s intimate portrait of the Quran, told with nuance and great elegance, captures the extraordinary, living debate over the Muslim holy book’s very essence. A spirited, compelling read.”—Azadeh Moaveni, author of Lipstick Jihad “Unique, masterful, and deeply engaging. Carla Power takes the reader on an extraordinary journey in interfaith understanding as she debates and discovers the Quran’s message, meaning, and values on peace and violence, gender and veiling, religious pluralism and tolerance.”—John L. Esposito, University Professor and Professor of Islamic Studies, Georgetown University, and author of The Future of Islam “A thoughtful, provocative, intelligent book.”—Diana Abu-Jaber, author of Birds Of Paradise and The Language of Baklava

23 Things They Don't Tell You about Capitalism Ha-Joon Chang, 2011-01-02 INTERNATIONAL BESTSELLER For anyone who wants to understand capitalism not as economists or politicians have pictured it but as it actually operates, this book will be invaluable.- Observer (UK) If you've wondered how we did not see the economic collapse coming, Ha-Joon Chang knows the answer: We didn't ask what they didn't tell us about capitalism. This is a lighthearted book with a serious purpose: to question the assumptions behind the dogma and sheer hype that the dominant school of neoliberal economists-the apostles of the freemarket-have spun since the Age of Reagan. Chang, the author of the international bestseller *Bad Samaritans*, is one of the world's most respected economists, a voice of sanity-and wit-in the tradition of John Kenneth Galbraith and Joseph Stiglitz. *23 Things They Don't Tell You About Capitalism* equips readers with an understanding of how global capitalism works-and doesn't. In his final chapter, *How to Rebuild the World*, Chang offers a vision of how we can shape capitalism to humane ends, instead of becoming slaves of the market.

A Mathematical Introduction to Compressive Sensing Simon Foucart, Holger Rauhut, 2013-08-13 At the intersection of mathematics, engineering, and computer science sits the thriving field of compressive sensing. Based on the premise that data acquisition and compression can be performed simultaneously, compressive sensing finds applications in imaging, signal processing, and many other domains. In the areas of applied mathematics, electrical engineering, and theoretical computer science, an explosion of research activity has already followed the theoretical results that highlighted the efficiency of the basic principles. The elegant ideas behind these principles are also of independent interest to pure mathematicians. *A Mathematical Introduction to Compressive Sensing* gives a detailed account of the core theory upon which the field is built. With only moderate prerequisites, it is an excellent textbook for graduate courses in mathematics, engineering, and computer science. It also serves as a reliable resource for practitioners and researchers in these disciplines who want to acquire a careful understanding of the subject. *A Mathematical Introduction to Compressive Sensing* uses a mathematical perspective to present the core of the theory underlying compressive sensing.

New Trends in Applied Harmonic Analysis Akram Aldroubi, Carlos Cabrelli, Stephane Jaffard, Ursula Molter, 2016-04-21 This volume is a selection of written notes corresponding to courses taught at the CIMPA School: New Trends in Applied Harmonic Analysis: Sparse Representations, Compressed Sensing and Multifractal Analysis. New interactions between harmonic analysis and signal and image processing have seen striking development in the last 10 years, and several technological deadlocks have been solved through the resolution of deep theoretical problems in harmonic analysis. New Trends in Applied Harmonic Analysis focuses on two particularly active areas that are representative of such advances: multifractal analysis, and sparse representation and compressed sensing. The contributions are written by leaders in these areas, and cover both theoretical aspects and applications. This work should prove useful not only to PhD students and postdocs in mathematics and signal and image processing, but also to researchers working in related topics.

What the Koran Really Says Ibn Warraq, 2010-10-29 This excellent collection of critical commentaries on the Koran brings together outstanding articles by noted scholars from the beginning of the 20th century to recent times. These important studies, as well as the editor's own lengthy introduction, show that little about the text of the Koran can be taken at face value. Among the fascinating topics discussed is evidence that early Muslims did not understand Muhammad's original revelation, that the ninth-century explosion of literary activity was designed to organize and make sense of an often incoherent text, and that much of the traditions surrounding Muhammad's life were fabricated long after his death in an attempt to give meaning to the Koran. Also of interest are suggestions that Coptic and other Christian sources heavily influenced much of the text and that some passages reflect an essential background reaching back to the community of the Dead Sea Scrolls. This valuable compilation will be a welcome resource to interested lay readers and scholars alike.

Saladin John Man, 2016-04-05 In this authoritative biography, historian John Man brings Saladin and his world to life with vivid detail in a rollicking good story (Justin Marozzi). Saladin remains one of the most iconic figures of his age. As the man who united the Arabs and saved Islam from Christian crusaders in the twelfth century, he is the Islamic world's preeminent hero. A ruthless defender of his faith and brilliant leader, he also possessed qualities that won admiration from his Christian foes. But Saladin is far more than a historical hero. Builder, literary patron, and theologian, he is a man for all times, and a symbol of hope for an Arab world once again divided. Centuries after his death, in cities from Damascus to Cairo and beyond, to the Arabian Peninsula and the Gulf, Saladin continues to be an immensely potent symbol of religious and military resistance to the West. He is central to Arab memories, sensibilities, and the ideal of a unified Islamic state. John Man charts Saladin's rise to power, his struggle to unify the warring factions of his faith, and his battles to retake Jerusalem and expel Christian influence from Arab lands. Saladin explores the life and enduring legacy of this champion of Islam while examining his significance for the world today.

The Sword of Allah Ibn Kathir, 2017-10-18 The Sword of Allah: Khalid Bin Al-Waleed, His Life and Campaigns Khalid bin Al-Waleed was one of the greatest generals in history, and one of the greatest heroes of history. Besides him, Genghis Khan was the only other general

to remain undefeated in his entire military life. Khalid was sent to the Persian Empire with an army consisting of 18,000 volunteers to conquer the richest province of the Persian empire, Euphrates region of lower Mesopotamia, (present day Iraq). Khalid entered lower Mesopotamia with this force. He won quick victories in four consecutive battles: the Battle of Chains, fought in April 633; the Battle of River, fought in the third week of April 633; the Battle of Walaja, fought in May 633 (where he successfully used a double envelopment manoeuvre), and Battle of Ullais, fought in the mid-May 633. In the last week of May 633, al-Hira, the regional capital city of lower Mesopotamia, fell to Khalid. The inhabitants were given peace on the terms of annual payment of jizya (tribute) and agreed to provide intelligence for Muslims. After resting his armies, in June 633, Khalid laid siege to Anbar which despite fierce resistance fell in July 633 as a result of the siege imposed on the town. Khalid then moved towards the south, and captured Ein ul Tamr in the last week of July, 633.
