Troy: Lord of the Silver Bow David Gemmell, 2006-10-31 With this first masterly volume in an epic reimagining of the Trojan War, David Gemmell has written an ageless drama of brave deeds and fierce battles, of honor and treachery, of love won and lost. He is a man of many names. Some call him the Golden One; others, the Lord of the Silver Bow. To the Dardanians, he is Prince Aeneas. But to his friends, he is Helikaon. Strong, fast, quick of mind, he is a bold warrior, hated by his enemies, feared even by his Trojan allies. For there is a darkness at the heart of the Golden One, a savagery that, once awakened, can be appeased only with blood. Argurios the Mykene is a peerless fighter, a man of unbending principles and unbreakable will. Like all of the Mykene warriors, he lives to conquer and to kill. Dispatched by King Agamemnon to scout the defenses of the golden city of Troy, he is Helikaon's sworn enemy. Andromache is a priestess of Thera betrothed against her will to Hektor, prince of Troy. Scornful of tradition, skilled in the arts

of war, and passionate in the ways of her order, Andromache vows to love whom she pleases and to live as she desires. Now fate is about to thrust these three together-and, from the sparks of passionate love and hate, ignite a fire that will engulf the world.

Code Charles Petzold, 2022-08-02 The classic guide to how computers work, updated with new chapters and interactive graphics For me, Code was a revelation. It was the first book about programming that spoke to me. It started with a story, and it built up, layer by layer, analogy by analogy, until I understood not just the Code, but the System. Code is a book that is as much about Systems Thinking and abstractions as it is about code and programming. Code teaches us how many unseen layers there are between the computer systems that we as users look at every day and the magical silicon rocks that we infused with lightning and taught to think. - Scott Hanselman, Partner Program Director, Microsoft, and host of Hanselminutes Computers are everywhere, most obviously in our laptops and smartphones, but also our cars, televisions, microwave ovens, alarm clocks, robot vacuum cleaners, and other smart appliances. Have you ever wondered what goes on inside these devices to make our lives easier but occasionally more infuriating? For more than 20 years, readers have delighted in Charles Petzold's illuminating story of the secret inner life of computers, and now he has revised it for this new age of computing. Cleverly illustrated and easy to understand, this is the book that cracks the mystery. You'll discover what flashlights, black cats, seesaws, and the ride of Paul Revere can teach you about computing, and how human ingenuity and our compulsion to communicate have shaped every electronic device we use. This new expanded edition explores more deeply the bit-by-bit and gate-by-gate construction of the heart of every

smart device, the central processing unit that combines the simplest of basic operations to perform the most complex of feats. Petzold's companion website, CodeHiddenLanguage.com, uses animated graphics of key circuits in the book to make computers even easier to comprehend. In addition to substantially revised and updated content, new chapters include: Chapter 18: Let's Build a Clock! Chapter 21: The Arithmetic Logic Unit Chapter 22: Registers and Busses Chapter 23: CPU Control Signals Chapter 24: Jumps, Loops, and Calls Chapter 28: The World Brain From the simple ticking of clocks to the worldwide hum of the internet, Code reveals the essence of the digital revolution.

*How to Get Sh*t Done* Erin Falconer, 2018-01-02
From the editor-in-chief and co-owner of the highly respected self-improvement site Pick the Brain comes an inspirational guide for overscheduled, overwhelmed women on how to do less so that they can achieve more. Women live in a state of constant guilt: that we're not doing enough, that we're not good enough, that we can't keep up. If we're not climbing the corporate ladder, building our side hustle, preparing home-cooked meals, tucking the kids in at night, meditating daily, and scheduling playdates, date nights, and girls' nights every week, we feel like we're not living our best lives. Yet traditional productivity books—written by men—barely touch on the tangle of cultural pressures that women feel when facing down a to-do list. Now, Erin Falconer will show you how to do less—a lot less. In fact, *How to Get Sh*t Done* will teach you how to zero in on the three areas of your life where you want to excel, and then it will show you how to off-load, outsource, or just stop giving a damn about the rest. As the founder of two technology start-ups and one of Refinery29's Top 10 Women Changing the Digital Landscape for Good, Erin has seen what

happens when women chase an outdated, patriarchal model of productivity, and now she shows you how even the most intense perfectionist among us can tap into our inner free spirit and learn to feel like badasses. Packed with real-life advice, honest stories from Erin's successful career, and dozens of actionable resources, *How to Get Sh*t Done* will forever reframe productivity so that you can stop doing everything for everyone and start doing what matters to you.

Cook-a-Doodle-Do! Janet Stevens, Susan Stevens Crummel, 2005 With the questionable help of his friends, Big Brown Rooster manages to bake a strawberry shortcake that would have pleased his great-grandmother, Little Red Hen.

The Road to Ubar Nicholas Clapp, 1999-06-16 The author recounts his discovery of a lost Arabian city in this "captivating story of [a] stupendous archeological achievement" (Kirkus). No one thought that Ubar, the most fabled city of ancient Arabia, would ever be found, if it even existed. According to the Koran, the ancient trading outpost was sunk into the desert as punishment for the sins of its people. Over the centuries, many searched for the legendary "Atlantis of the Sands"—including Lawrence of Arabia—yet the city remained lost. Until now. Documentary filmmaker and amateur archaeologist Nicholas Clapp first stumbled on the legend of Ubar in the 1980s while poring over historical manuscripts. Filled with overwhelming curiosity, Clapp led two expeditions to Arabia with a team that included space scientists and geologists. In *The Road to Ubar*, he chronicles the grand adventure that led to a historic discovery.

Covering cutting-edge debates in eight parts, it is designed as a series of mini edited collections, enabling the reader, and particularly the novice reader, to discover new ways of approaching language, gender, and sexuality. With a distinctive focus both on methodologies and theoretical frameworks, the Handbook includes 40 state-of-the art chapters from international authorities. Each section also contains a chapter by leading scholars in that area, positioning, through their own work and chapters in their part, current state-of-the-art and future directions. This volume is key reading for all engaged in the study and research of language, gender, and sexuality within English language, sociolinguistics, discourse studies, applied linguistics, and gender studies.

JOANNE HARRIS A splendid piece of work that traverses from hero fantasy into legendary and classic writing. -- ***** Reader review Truly captivating -- ***** Reader review

***** Darkness falls on the Great Green, and the Ancient World is fiercely divided. On the killing fields outside the golden city of Troy, forces loyal to the Mykene King mass. Among them is Odysseus, fabled storyteller and reluctant ally to the Mykene, who knows that he must soon face his former friends in deadly combat. Within the city, the Trojan king waits. Ailing and bitter, his hope is pinned on two heroes: his favourite son Hektor, and the dread Helikaon who will wreak terrible vengeance for the death of his wife at Mykene hands. War has been declared. As enemies, who are also kinsmen, are filled with bloodlust, they know that many of them will die, and that some will become heroes: heroes who will live for ever in a story that will echo down the centuries. Have you read the previous two books in the series Troy: Lord of the Silver Bow and Troy: Shield of Thunder?

Long-Awaited Dawn Dexter Nathan, 2012-10-01

Travis, the young lawyer from Australia visits a pilgrim site in south India. An unusual experience awaits him. In the process of uncovering the truth from the past, and reuniting his surrogate mother with her long lost son living in Boston, he undertakes a trip to Boston. The resplendent Island in the Indian Ocean, ruled by corrupt politicians on the one side and Buddhist clergy stoking the racial disharmony on the other, is the backdrop. The personal stories of several people unfold in flashback in this trouble torn Island Nation, divided by racial strife and civil war. A man wrongfully convicted of a murder, and a young catholic nun, who understands the truth. A brilliant Harvard doctor, who became a victim of circumstances, betrayed by his wife and portrayed

as the villain by the American media. A young man who inherited unimaginable wealth through a woman, he never knew existed. A young boy who ran away from home in fear of his father, and his dramatic rise and fall in life. A tapestry of entwined events, characters with depth, and a story not to be ignored - Long-Awaited Dawn will take the readers through a journey that becomes an experience unto itself.

Convergence Culture Henry Jenkins, 2008-09 "What the future fortunes of [Gramsci's] writings will be, we cannot know. However, his permanence is already sufficiently sure, and justifies the historical study of his international reception. The present collection of studies is an indispensable foundation for this." -Eric Hobsbawm, from the preface Antonio Gramsci is a giant of Marxian thought and one of the world's greatest cultural critics. Antonio A. Santucci is perhaps the world's preeminent Gramsci scholar. Monthly Review Press is proud to publish, for the first time in English, Santucci's masterful intellectual biography of the great Sardinian scholar and revolutionary. Gramscian terms such as "civil society" and "hegemony" are much used in everyday political discourse. Santucci warns us, however, that these words have been appropriated by both radicals and conservatives for contemporary and often self-serving ends that often have nothing to do with Gramsci's purposes in developing them. Rather what we must do, and what Santucci illustrates time and again in his dissection of Gramsci's writings, is absorb Gramsci's methods. These can be summed up as the suspicion of "grand explanatory schemes," the unity of theory and practice, and a focus on the details of everyday life. With respect to the last of these, Joseph Buttigieg says in his Nota: "Gramsci did not set out to explain historical reality armed with some full-fledged concept, such

as hegemony; rather, he examined the minutiae of concrete social, economic, cultural, and political relations as they are lived in by individuals in their specific historical circumstances and, gradually, he acquired an increasingly complex understanding of how hegemony operates in many diverse ways and under many aspects within the capillaries of society." The rigor of Santucci's examination of Gramsci's life and work matches that of the seminal thought of the master himself. Readers will be enlightened and inspired by every page.

Colour Studies Wendy Anderson, Carole P.

Biggam, Carole Hough, Christian Kay, 2014-11-15 This volume presents some of the latest research in colour studies by specialists across a wide range of academic disciplines. Many are represented here, including anthropology, archaeology, the fine arts, linguistics, onomastics, philosophy, psychology and vision science. The chapters have been developed from papers and posters presented at the Progress in Colour Studies (PICS12) conference held at the University of Glasgow. Papers from the earlier PICS04 and PICS08 conferences were published by John Benjamins as

Progress in Colour Studies, 2 volumes, 2006 and New Directions in Colour Studies, 2011, respectively. The opening chapter of this new volume stems from the conference keynote talk on prehistoric colour semantics by Carole P. Biggam. The remaining chapters are grouped into three sections: colour and linguistics; colour categorization, naming and preference; and colour and the world. Each section is preceded by a short preface drawing together the themes of the chapters within it. There are thirty-one colour illustrations.
