**Running from Office** Jennifer L. Lawless, Richard L. Fox, 2015-04-08 The past two decades of politics in Washington have seen increased partisanship, prolonged stalemates, and numerous scandals. For today's teenagers and young adults, years of ineffective and inefficient political leadership have completely eroded any sense that politicians or government have the ability to do good or effect positive change. Worse, the mean-spirited, dysfunctional political system that has come to characterize American politics has turned young people off to the idea of running for office. With more than 500,000 elected positions in the United States, what will happen when this generation is expected to take the reins of political power? Through an original, national survey of more than 4,000 high school and college students, as well as more than 100 in-depth interviews, Jennifer L. Lawless and Richard L. Fox find that young Americans feel completely alienated from contemporary politics and express little ambition or aspiration to run for office in the future. The overwhelming majority see nothing particularly noble about those currently in office, viewing most as dishonest, self-interested, and disinterested in helping their constituents. These young people want to improve their communities and enact change in the world; but they don't think politics is the way to achieve these goals. In fact, they look disdainfully upon the prospects of growing up to be a mayor, governor, senator, or even president of the United States. *Running from Office* explores young people's opinions about contemporary politics and their political ambition (or lack of it). The book paints a political profile of the next generation that should sound alarm bells about the long-term, deeply embedded damage contemporary politics has wrought on U.S. democracy and its youngest citizens. As disheartening as their conclusions sound, Lawless and Fox end with practical suggestions for how new technologies, national service programs, and well-strategized public service campaigns could generate political ambition in young people. Today's high school and college students care deeply about improving the future, and it's not too late to ensure that they view running for office as an effective way to do so.

**The Famine Plot** Tim Pat Coogan, 2012-11-27 During a Biblical seven years in the middle of the nineteenth century, Ireland experienced the worst disaster a nation could suffer. Fully a quarter of its citizens either perished from starvation or emigrated, with so many dying en route that it was said, you can walk dry shod to America on their bodies. In this grand, sweeping narrative, Ireland's best-known historian, Tim Pat Coogan, gives a fresh and comprehensive account of one of the darkest chapters in world history, arguing that Britain was in large part responsible for the extent of the

national tragedy, and in fact engineered the food shortage in one of the earliest cases of ethnic cleansing. So strong was anti-Irish sentiment in the mainland that the English parliament referred to the famine as God's lesson. Drawing on recently uncovered sources, and with the sharp eye of a seasoned historian, Coogan delivers fresh insights into the famine's causes, recounts its unspeakable events, and delves into the legacy of the famine mentality that followed immigrants across the Atlantic to the shores of the United States and had lasting effects on the population left behind. This is a broad, magisterial history of a tragedy that shook the nineteenth century and still impacts the worldwide Irish diaspora of nearly 80 million people today.

**Masculinity in Crisis** R. Horrocks, 1994-08-30 This book argues that masculine identity is in deep crisis in Western culture - the old forms are disintegrating, while men struggle to establish new relations with women and with each other. This book offers a fresh look at gender, particularly masculinity, by using material from the author's work as a psychotherapist. The book also considers the contributions made by feminism, sociology and anthropology to the study of gender, and suggests that it must be studied from an interdisciplinary standpoint. Masculinity is seen to have economic, political and psychological roots, but the concrete development of gender must be traced in the relations of the male infant with his parents. Here the young boy has to separate from his mother, and his own proto-feminine identity, and identify with his father - but in Western culture fathering is often deficient. Male identity is shown to be fractured, fragile and truncated. Men are trained to be rational and violent, and to shut out whole areas of existence and feeling. Many stereotypes imprison men - particularly machismo, which is shown to be deeply masochistic and self-destructive.

A Gravity's Rainbow Companion Steven C. Weisenburger, 2011-03-15 Adding some 20 percent to the original content, this is a completely updated edition of Steven Weisenburger's indispensable guide to Thomas Pynchon's *Gravity's Rainbow*. Weisenburger takes the reader page by page, often line by line, through the welter of historical references, scientific data, cultural fragments, anthropological research, jokes, and puns around which Pynchon wove his story. Weisenburger fully annotates Pynchon's use of languages ranging from Russian and Hebrew to such subdialects of English as 1940s street talk, drug lingo, and military slang as well as the more obscure terminology of black magic, Rosicrucianism, and Pavlovian psychology. The Companion also reveals the underlying organization of *Gravity's Rainbow*--how the book's myriad references form patterns of meaning and structure that have eluded both admirers and critics of the novel. The Companion is keyed to the pages of the principal American editions of *Gravity's Rainbow*: Viking/Penguin (1973), Bantam (1974), and the special, repaginated Penguin paperback (2000) honoring the novel as one of twenty Great Books of the Twentieth Century.
