R. H. Inglis Palgrave

Subjects and Aliens Kate Bagnall, Peter Prince, 2023-08-29 *Subjects and Aliens* confronts the problematic history of belonging in Australia and New Zealand. In both countries, race has often been more important than the law in determining who is considered 'one of us'. Each chapter in the collection highlights the lived experiences of people who negotiated laws and policies relating to nationality and citizenship rights in twentieth-century Australasia, including Chinese Australians enlisting during the First World War, Dalmatian gum-diggers turned farmers in New Zealand, Indians in 1920s Australia arguing for their citizenship rights, and Australian women who lost their nationality after marrying non-British subjects. The book also considers how the legal belonging—and accompanying rights and protections—of First Nations people has been denied, despite the High Court of Australia's recent assertion (in the landmark *Love & Thoms* case of 2020) that Aboriginal people have never been considered 'aliens' or 'foreigners' since 1788. The experiences of world-famous artist Albert Namatjira, and of those made to apply for 'certificates of citizenship' under Western Australian law, suggest otherwise. *Subjects and Aliens* demonstrates how people who legally belonged were denied rights and protections as citizens through the actions of those who created, administered and interpreted the law across the twentieth century, and how the legal ramifications of those actions can still be felt today.

*Late Classical, Hellenistic, and Roman Pottery* John W. Hayes, Kathleen Warner Slane, 2022-09-02 This volume presents the Late Classical through Roman pottery from the University of Chicago excavations at Isthmia (1952-1989). In a series of three chapters—on the Late Classical and Hellenistic pottery, the Roman pottery, and the pottery from the Palaimonion—a general discussion is followed by a catalog presenting datable contexts and then by a catalogue of other noteworthy pottery. Appendixes discuss the stratigraphy of the Palaimonion and observations on new and previously published lamps. Amphora stamps are the focus of a further appendix, followed by a catalogue of the Slavic and Byzantine pottery found in the sanctuary area. Although the pottery is sometimes fragmentary, the range of materials over this thousand-year period is typical of Corinthian sites. The finds presented here provide critical information about the history of the Panhellenic sanctuary of Poseidon and the ritual activities that took place there.

**Higher Education in Sub-Saharan Africa in the 21st Century** Ben Kei Daniel, Ronald Bisaso, 2023-07-08

This book contributes to the understanding of regional and global perspectives on the development and challenges the higher education sector in sub-Saharan Africa faces in the era of globalization. It focuses on the critical aspects of the higher education sector in the Global South, with a particular emphasis on sub-Saharan Africa. It brings together empirical, theoretical and philosophical perspectives from researchers in some of the leading universities in sub-Saharan Africa. The book highlights the higher education sector's stages of growth and development and the contemporary challenges it faces in aligning its goals and capacity globally, and maintaining its image and public identity locally. This book covers neoliberal educational reforms, leadership and governance, pedagogy, technology, the global knowledge economy, and digital advancement. It delves into how the nature and practice of learning, teaching, research, and community engagement as core functions of higher education are re-oriented to contribute to societal transformation in Africa. Further, the book discusses the implications of contemporary issues in higher education: internationalization, employability, leadership and management, and accountability and autonomy in teaching, research, and community engagement.

**Victimhood and Vulnerability in 21st Century Fiction** Jean-Michel Ganteau, Susana Onega, 2017-04-21

Editors Jean-Michel Ganteau and Susana Onega) have assembled a volume which addresses the relationship between trauma and ethics, and moves one step further to engage with vulnerability studies in their relation to literature and literary form. It consists of an introduction and of twelve articles written by specialists from various European countries and includes an interview with US novelist Jayne Anne Phillips, conducted by her translator into French, Marc Amfreville, addressing her latest novel, *Quiet Dell*, through the victimhood-vulnerability prism. The corpus of primary sources on which the volume is based draws on various literary backgrounds in English, from Britain to India, through the USA. The editors draw on material from the ethics of alterity, trauma studies and the ethics of vulnerability in line with the work of moral philosophers like Emmanuel Levinas, as well as with a more recent and challenging tradition of continental thinkers, virtually unknown so far in the English-speaking world, represented by Guillaume Le Blanc, Nathalie Maillard, and Corinne Pelluchon, among others. Yet another related line of thought followed in the volume is that represented by feminist critics like Catriona McKenzie, Wendy Rogers and Susan Dodds.

**Information Sources in Patents** Stephen Adams, 2012-01-01

Since the publication of the 2nd edition additional countries especially in Asia have become more prominent in industry. This completely revised edition takes account of the changing information scene e.g. in new chapters like BRIC nations (Brazil, Russia, India, and China), Asia and regional patent systems or Sources for legal status searching. This is an essential reference tool for academic librarians and information specialists as well as anyone needing to know where and how patent information can be found.

**Plant Diseases and Food Security in the 21st Century** Peter Scott, Richard Strange, Lise Korsten, Maria

Lodovica Gullino, 2021-05-22 Of the global population of more than 7 billion people, some 800 million do not have enough to eat today. By 2050, the population is expected to exceed 9 billion. It has been estimated that some 15% of food production is lost to plant diseases; in developing countries losses may be much higher. Historically, plant diseases have had catastrophic impact on food production. For example: potato blight caused the Irish famine in 1845; brown spot of rice caused the Great Bengal Famine of 1943; southern corn leaf blight caused a devastating epidemic on the US corn crop in 1970. Food security is threatened by an

ongoing sequence of plant diseases, some persistent for decades or centuries, others more opportunistic. Wheat blast and banana xanthomonas wilt are two contrasting examples of many that currently threaten food production. Other emerging diseases will follow. The proposed title aims to provide a synthesis of expert knowledge to address this central challenge to food security for the 21st century. **Sorghum in the 21st Century: Food – Fodder – Feed – Fuel for a Rapidly Changing World** Vilas A. Tonapi, Harvinder Singh Talwar, Ashok Kumar Are, B. Venkatesh Bhat, Ch. Ravinder Reddy, Timothy J. Dalton, 2021-01-04 Sorghum is the most important cereal crop grown in the semi-arid tropics (SAT) of Africa, Asia, Australia and Americas for food, feed, fodder and fuel. It is the fifth most important cereal crop globally after rice, wheat, maize and barley, and plays a major role in global food security. Sorghum is consumed in different forms for various end-uses. Its grain is mostly used directly for food purposes. After the release of the proceedings of two international symposia in the form of books “Sorghum in Seventies” and “Sorghum in Eighties”, global sorghum research and development have not been documented at one place. Of course, few books on sorghum have been released that focus on specific issues/research areas, but comprehensive review of all aspects of recent development in different areas of sorghum science has not been compiled in the form a single book. This book is intended to fill in a void to bridge the gap by documenting all aspects of recent research and development in sorghum encompassing all the progress made, milestones achieved across globe in genetic diversity assessment, crop improvement and production, strategies for high yield, biotic and abiotic stress resistance, grain and stover quality aspects, storage, nutrition, health and industrial applications, biotechnological applications to increase production, including regional and global policy perspectives and developmental needs. This book will be an institutional effort to compile all the latest information generated in research and development in sorghum across the globe at one place.

**Patents and Technological Progress in a Globalized World** Wolrad Prinz zu Waldeck und Pyrmont, Martin J. Adelman, Robert Brauneis, Josef Drexl, Ralph Nack, 2008-11-20 In the last two decades, accelerating technological progress, increasing economic globalization and the proliferation of international agreements have created new challenges for intellectual property law. In this collection of articles in honor of Professor Joseph Straus, more than 60 scholars and practitioners from the Americas, Asia and Europe provide legal, economic and policy perspectives on these challenges, with a particular focus on the challenges facing the modern patent system. Among the many topics addressed are the rapid development of specific technical fields such as biotechnology, the relationship of exclusive rights and competition, and the application of territorially limited IP laws in cross-border scenarios.
