Alien Invasion Travis S. Taylor,Bob Boan,2011-06-01 What if there really are aliens and they do attack? Read what two scientists reveal in this how-to survival manual for the space age. Some events (such as a deliberate asteroid strike) produce such a massive setback to life, the Earth and humanity that we must understand and prepare for them, even if the chances are low that they'll come about. But where to begin? Drs. Travis S. Taylor and Bob Boan are experienced scientists, physicists with expertise in both defense and military signal intelligence and experience working with the Department of Defense and NASA. These two intellectual heavyweights take us on an amazing journey through what we do³and do not³know about how to defend ourselves from space. Sure, that day may never come in our lifetimes³but everyone should have a copy of this lying around just in case. . . . Operation Lightning Strike Nick Pope,2000 The aliens say they come in peace - but evidence suggests otherwise. An alien spacecraft is making its way towards Earth. It will arrive within weeks. The government and military are helpless to contain the increasingly desperate situation and must concede to the aliens' intention to inhabit the Earth, offering partnership in return for colonisation without bloodshed. But chances of peaceful settlement are soon swept aside when a powerful sub-group known only as The Enterprise unleashes a biological weapon of mass destruction against the aliens. They hold out the prospect of a vaccine - if the aliens capitulate and hand over their ship. And now, in a battle between two intelligent life forms to gain control of the Earth, the future is uncertain and the possibility of mass extermination grows ever closer...

Europa Strike Ian Douglas,2009-10-13 2040: Ruins of ancient civilization uncovered on Mars reveal startling truths about the creation of humankind. 2042: In the gray dust of the Earth's Moon, an extinct enslaving race left behind more answers, more questions...and a grim warning. 2067: As Earth's warring factions clash in space for scraps of alien technology, a strange artifact lies trapped beneath the ice-locked oceans of Europa: a machine that holds the key to the final human destiny. It is called The Singer for the eerie tone it emits.An artificial intelligence built eons ago, it may ultimately solve the mystery of the vanished alien races responsible for the birth and development of humanity. But after decades of war, the hostile nations of Earth care more for power than for knowledge. And now all that stands between the coveted AI and an all-out Chinese assault is a vastly outnumbered contingent of U.S. marines, dug in beneath the baleful red eye of Jupiter. As terrifying events light years distant begin to converge---with confrontation imminent and annihilation inevitable---a secret history of creation and doom must at long last be contended with...if humankind is to finally claim its glorious heritage among the stars.2040: Ruins of ancient civilization uncovered on Mars reveal startling truths about the creation of humankind. 2042: In the gray dust of the Earth's Moon, an extinct enslaving race left behind more answers, more questions...and a grim warning. 2067: As Earth's warring factions clash in space for scraps of alien technology, a strange artifact lies trapped beneath the ice-locked oceans of Europa: a machine that holds the key to the final human destiny. This was especially true for Quinn, a Marine sergeant who was hell-bent on ensuring that her young daughter had a world to grow up in. But one thing separates Quinn from the others: She's a certifiable badass.And as the aliens will learn, it's tough to keep a good woman down.SYNDICATE WARS is the perfect mash-up of STARSHIP TROOPERS and THE DIRTY DOZEN. First Strike Chris Nuttall,2014-09-24 The best defense... Starting a war with an enemy a hundred times stronger is insane. It's desperate. And it's Earth's only hope. A massive alien power looms over humanity, claiming Earth as its territory and humanity as its slaves. The Hegemony has already taken over one colony, yoking hundreds of thousands under their brutal rule. Every tactical exercise, every wargame and every simulation gives humanity zero chance in a defensive campaign. Earth's only chance to win the coming war - is by striking first. "It's honestly brilliant - a space opera tour de force I want to see the next book of." -Glynn Stewart, author of Starship's Mage "A story of alien threats and human resourcefulness that isn't simply a contest of gadgets and ray guns. Nuttall knows the real ingredients of war are from within, greed, treachery, arrogant disdain, devious double crossing and misdirection. Both human and alien." -Mackey Chandler, author of the Family Law and April series

Starstrike W. Michael Gear,1990-07-03 Humanity's first contact with alien life is no less than a nightmare, as the Ahimsa take control of Earth and force humanity to do their bidding. Soon, Earth's most skilled strike force, composed of Russian, American, and Israeli experts in the art of war and espionage, find themselves aboard the Ahimsa vessel, training for an offensive attack against a distant space station. And as they struggle to overcome their own prejudices while preparing to face an enemy of unknown capabilities, none of them realize that the greatest danger to humanity's future is right in their midst....

Alien Planet Max Holt,2015-12-31 The Federation of Planets has ruled the galaxy for hundreds of Star Dates. But now the fragile peace has been threatened. Intelligence probes transiting the Galactic Four Worm Hole have discovered an alien world in the outer spiral arm, confirmed to be harboring weapons capable of destroying an entire planet. Even though the evolution of this species is far behind others in the galaxy, Admiral Platz is convinced that they will soon be capable of launching their weapons to other solar systems. The threat to Federation member planets nearby is real and immanent. Unable to decipher their complicated language the Federation has sent three star ships full of combat soldiers to invade the alien planet and attack their storage sites with the mission to destroy their weapons. But there is concern that the high percentage of inexperienced soldiers in the Strike Force could jeopardize the mission. Concern heightens when some soldiers die during Deep Sleep due to the failure of their sleep pods. Other soldiers question the validity of the mission and some file for conscientious objector status before the battle. When the Hologram Combat Simulator reveals the truth about the aliens the soldiers will face, they react with fear. When the attack shuttles finally break through the alien atmosphere and deposit the Attack Teams onto the forbidding cold surface they are stunned. Never in the history of the Federation have soldiers had to face such an enemy. The aliens are four times their size; they are ugly, smelly and grotesque in every way. With no turning back, what will happen when this horrid species fights to defend its Alien Planet?

Alien Conquest David VanDyke,2017-08-05 **All five stories collected in this volume have been previously published in various collections, novels and anthologies, including Forge and Steel, Planetary Assault, First Conquest, Desolator: Conquest, and Jerry Pournelle's There Will Be War X.** Earth and her solar system are under continuous attack by an empire of a thousand worlds. The enemy's living ships spread inexorably from star to star, reproducing along the way. The only thing standing in their way are the men and women of EarthFleet and their Fleet Marine brothers- and sisters-in-arms. But soon, EarthFleet will launch its own counterattack, a desperate bid to conquer an enemy star system and turn the tide of war. Leading the assault will be Sergeant Major Jill Reaper Repeth, Lieutenant Joseph Bull ben Tauros, Admiral Henrich Absen, and Commander Vincent Markis, all ready to lay their lives on the line to preserve the lives and freedom of a fragile humanity. This is the world of Plague Wars: Stellar Conquest, a science fiction saga spanning sixteen novels and several shorter stories.

Starstrike: Task Force Mars Kevin Dockery,Douglas Niles,2007-05-29 To fight a war, the world needs a new kind of warrior. In 2050, after sending disturbing distress calls, one of Earth's research outputs on Mars is cloaked in ominous silence. The U.S. military wants answers, and only its bravest commandos can get them. Navy SEALs are the best on Earth; now a select few are being sent to the stars with a new moniker: SEALS (Sea, Air, Land, and Space). The direness of the Martian situation becomes apparent when Lieutenant Thomas Stonewall Jackson and his men are kidnapped by hostile aliens. Now they may have to steal an alien aircraft, fight through several battalions, and even take out a highly advanced planetary defense system or two. But what's impossible for most is just another op for this twelve-man team, the best warriors in the galaxy.

Alien Offensive Book 3 Marsell Morris,2016-04-20 In episodes one and two, a distant alien species whose home planet was in danger because of its failing red dwarf star, tried to eradicate all life on Earth and then terraform the planet to meet their needs. Thanks to the exceptional talents of two inspired physicist, who devised two unique weapons, each tailored to repel the desperate and repeated alien assaults, the world was spared not once, but twice. Humankind celebrated their victories and felt safe from future aggressions, but those celebrations may have been premature. A renegade alien Commander, now repelled for the second time, and against the orders of his Elders, contrived plans to return to Earth with a world-destroying weapon of his own - this time determined to succeed . . .

Alien Offensive Book 5 Marsell Morris,2016-04-22 Thirty years ago, a distant alien race, whose home planet was in danger because of their failing red dwarf star, tried to invade Earth and kill off all life using mind controlling, nanobots. They had visions of eventually coming to a lifeless Earth and begin terraforming the planet to suit their needs. Thanks to the unusual talents of Dorothy Keets, an inspired physicist, the world was spared from the almost unstoppable alien weapon, but the aliens were nothing if not persistent. Ten years following the first attack, they tried again, this time coming to Earth while ensconced in their nearly indestructible vessels, and using several alien techniques and different weapons - they nearly succeeded. The world's armies, after failing to so much as slow the second attack, called upon the same brilliant, slightly older, scientist, who helped stop the first attack. She, while devising a unique, devastating, weapon, was able to stop the attack. Behind her second victory, she was recognized as a worldwide hero, but her weapon The Orb Weapon was so unique - so overpowering - so maniacal, and possibly world ending, the President of the United States ordered it deactivated, and secured inside a vault deep inside the bowls of Area 51 where it would remain to never be used again - at least, that was the plan. The aliens, now repelled for the second time, were already making plans to return - and they did while bringing with them new weapons, but their attack, again, was thwarted. Dorothy's unconventional fearful weapon was un-crated, dusted off, and with a few modifications and enhancements, implemented to save the world once more. Not only were the desperate aliens repelled for the third time, but while retreating to their home world, accidentally left behind one of their own, who was quickly captured by the United States military and then sequestered in Area-51 to be studied. Dorothy was able to gain access to and establish a line of communication with the extremely intelligent alien, and while displaying sympathy for the creature, gave it a name, George. While sensing Dorothy's compassion, George became friends with her, and taught her the secret of deep space travel. He taught her how to construct stable wormholes, while unintentionally giving humankind the ability to strike back at his home world and the still antagonistic, aggressive, alien species. Norman Wells, the then President of the United States, now becoming exasperated behind the repeated alien attacks, and using the newly learned wormhole technology, sent a flotilla of orb weapon armed space fighters to the offending alien's planet while totally destroying it with only a few of the alien species able to escape the destruction to become orphans in the cosmos, and to never be able to attack Earth, again. The final defeat of the aliens being a global effort, all of humankind united in peace. President Wells, being a visionary, wasn't content with the victory over the aliens - he had grand plans for the use of the newly learned alien technology. While wanting the worldwide peace to continue, he proposed a plan to build a massive deep space exploration vessel, later dubbed, Messenger Two, and while enlisting the efforts of virtually every nation on Earth, his design to maintain global peace succeeded as the entire world came together to build the space going city. With the building of Messenger, humankind's dreams of becoming a galactic explorer were finally realized. Now having the ability to go anywhere they wished, it was decided to find another planet in the galaxy suitable for human colonization. In this, the final episode, that planet is discovered, and named Novus. Unfortunately, the much anticipated colonization of Novus fails, while setting into action events resulting in a truly tragic ending.

The Alien Prophet John B. Fuller,2013 James and his girlfriend, Flo, agree to meet at a company picnic. James arrives at the site, and just as he notices Flo going toward him, there is a big explosion and a flash of light. James, unable to move, sees bodies scattered everywhere. Clusters of light enter each body, and each in turn disappears. Flo also disappears in this way. The lights enter James and, finding him alive, orders him to forget what has happened. James does not forget; he is recruited by this life-form from alternate Earth and is given great powers. James returns Flo and many others to Earth. They discover that the aliens harvest X cells from human bodies. James finds many possible ways for the aliens to harvest the calls they require. James and Flo, along with other humans, live in a dome provided by the aliens. They are attacked, as alien invaders, by world governments with little success. Over many years, most of the dome people move without notice back to the world population. Finally being alone in the dome, James and Flo move to the west coast. When Flo dies, James paddles a canoe out to the Pacific. He is picked up by a pirate ship and taken to their base in Africa. James becomes known as the alien prophet and helps many people achieve freedom. He becomes tired and again paddles out to sea and drowns. Under a new leader, the system of cell harvest falls apart, and the police closes them down. The other universe aliens disappear from Earth's skies, and Earth leaders declare a victory over these aliens (Xanderites). After many quiet years, a large planet-size ship arrives and settles in Earth orbit. This causes great damage with earthquakes, volcanoes, and high tides. Small ships leave the mother ship and attack worldwide. Earth has no defense against them, and millions die. A last-hope meeting of NORAD is desperately seeking some solution when the Xanderites reappear. They announce that they are willing to help but can only hold the invaders, not defeat them. They state that, as this Earth is no longer fit for humans, they will move the survivors to an alternate Earth they have discovered. There are no functioning Earth governments, so NORAD accepts the offer. All Earth survivors, except Muslims who state they are fighting a holy war, are moved to a wilderness Earth and build settlements. There is a total of 146,000 survivors who build a new world. After a few hundred years, old Earth becomes only a

myth, a legend, and the origin of man is unknown. The Xanderites do not appear on this Earth.
