*Alien: River of Pain (Book 3)* Christopher Golden, 2014-11-28 When Ellen Ripley finally returns to Earth, she learns that the planet LV-426—now called Acheron—has been colonized. But LV-426 is where Ripley and crew of the *Nostromo* found the original Xenomorph—the killing machine known as the Alien. The colony known as Hadley's Hope is where a group of colonists—protected by the Colonial Marines—seek to terraform the inhospitable planet, and to uncover Acheron's unknown resources. Two of the residents are Anne and Russell Jorden, wildcatters who came with an infant son, Tim, seeking a fortune that eluded them on Earth. On Acheron, Anne gives birth to the colony's first newborn. Rebecca Jordan, also known as Newt. The wildcatters discover a vast, decaying ship, once piloted by members of a strange, unknown race. The horseshoe-shaped vessel is of particular interest to Weyland-Yutani, and may be the answer to their dreams. But what Anne and Russ find aboard the ship proves to be the stuff, not of dreams, but of nightmares.

*Weapon of Choice* Charles H. Briscoe, Richard L. Kiper, James A. Schroder, 2010-01 First published in 2003, this is the first unclassified official history authored by the U.S. Army Special Operations Command relating to Operation Enduring Freedom. Contains extensive maps and illustrations. Previously difficult to obtain, this extensive study shows what Army Special Operations Forces (ARSOF) accomplished to drive the Taliban from power and to destroy al-Qaeda and Taliban strongholds as part of the global war on terrorism during Operation Enduring Freedom.

**The Triple Man** R L Fanthorpe, Lionel Fanthorpe, Patricia Fanthorpe, 2014-09-30 Psychology recognises the existence of multiple personalities inhabiting the same mind. To the ancients such strange transformations were evidence of demonic possession, and even today there are reputable experts who would not rule out the possibility that something else can take over a human mind. To the victim of such personality change there are long periods for which the memory cannot account, periods during which the secret enemy is in charge. Walter Hamilton was a perfectly normal, well-adjusted man in early middle age when strange gaps in his memory first began to worry him. At first he tried to ignore the tell-tale symptoms of schizophrenia but other clues presented themselves. The face in the crowd scene on a telerecorded film vaguely familiar. It wasn't his fave... but there were undeniable similarities. A picture in a newspaper worried him more... Before he could extricate himself he was trapped in a tangled web of interwoven personalities, unable to find himself, powerless to break away from the sinister complications of his two other lives.

*Date Night on Union Station* E. M. Foner, 2014-05-03 Alien artificial intelligence has brought humanity onto a galactic tunnel network Finding a match for the top human diplomat on Union Station is another story... Kelly Frank is EarthCent's top diplomat on Union Station, but her job description has always been a bit vague. The pay is horrible and she's in hock up to her ears for her furniture, which is likely to end up in a corridor because she's behind on rent for her room. Sometimes she has to wonder if the career she has put ahead of her personal life for fifteen years is worth it. When Kelly receives a gift subscription to the dating service that's rumored to be powered by the same benevolent artificial intelligence that runs the huge station, she decides to swallow her pride and give it a shot. But as her dates go from bad to worse, she can only hope that the supposedly omniscient AI is planning a happy ending.

10 PRINT CHR\$(205.5+RND(1)); : GOTO 10 Nick Montfort, Patsy Baudoin, John Bell, Ian Bogost, Jeremy Douglass, 2012-11-23 A single line of code offers a way to understand the cultural context of computing. This book takes a single line of code—the extremely concise BASIC program for the Commodore 64 inscribed in the title—and uses it as a lens through which to consider the phenomenon of creative computing and the way computer programs exist in culture. The authors of this collaboratively written book treat code not as merely

functional but as a text—in the case of 10 PRINT, a text that appeared in many different printed sources—that yields a story about its making, its purpose, its assumptions, and more. They consider randomness and regularity in computing and art, the maze in culture, the popular BASIC programming language, and the highly influential Commodore 64 computer.

If the Universe Is Teeming with Aliens ... WHERE IS EVERYBODY? Stephen Webb, 2002-10-04 In a 1950 conversation at Los Alamos, four world-class scientists generally agreed, given the size of the Universe, that advanced extraterrestrial civilizations must be present. But one of the four, Enrico Fermi, asked, If these civilizations do exist, where is everybody? Given the fact that there are perhaps 400 million stars in our Galaxy alone, and perhaps 400 million galaxies in the Universe, it stands to reason that somewhere out there, in the 14 billion-year-old cosmos, there is or once was a civilization at least as advanced as our own. Webb discusses in detail the 50 most cogent and intriguing solutions to Fermi's famous paradox.

The Uninhabitable Earth David Wallace-Wells, 2019-02-19 #1 NEW YORK TIMES BESTSELLER • “The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon.”—Andrew Solomon, author of *The Noonday Demon* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New Yorker • The New York Times Book Review • Time • NPR • The Economist • The Paris Review • Toronto Star • GQ • The Times Literary Supplement • The New York Public Library • Kirkus Reviews It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies, climate wars and economic devastation. An “epoch-defining book” (The Guardian) and “this generation’s Silent Spring” (The Washington Post), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. *The Uninhabitable Earth* is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today’s. LONGLISTED FOR THE PEN/E.O. WILSON LITERARY SCIENCE WRITING AWARD “The Uninhabitable Earth is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet.”—Farhad Manjoo, The New York Times “Riveting. . . . Some readers will find Mr. Wallace-Wells’s outline of possible futures alarmist. He is indeed alarmed. You should be, too.”—The Economist “Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the ‘eerily banal language of climatology’ in favor of lush, rolling prose.”—Jennifer Szalai, The New York Times “The book has potential to be this generation’s Silent Spring.”—The Washington Post “The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book.”—Alan Weisman, The New York Review of Books

Imagine Design Create Tom Wujec, 2011-05 Imagine, Design, Create offers a wide-ranging look at how the creative process and the tools of design are dramatically changing—and where design is headed in the coming years. Bringing together stories of good design happening around the world, the book shows how people are using fresh design approaches and new capabilities to solve problems, create opportunities, and improve the way we live and work. From the impact of SOM's Cathedral of Christ the Light in Oakland to the spark that inspired Thomas Heatherwick's U.K. Pavilion in Shanghai; from the new processes fueling Zaha Hadid's extraordinary architecture to the digital tools Ford is using to

transform car design, each of these stories explores questions that swirl around the idea of design. How does design change our lives for the better? How is our capacity to produce good design evolving? How will the next generation of designers work? What will they make? What new areas of human experience is design opening for us? Now that designers can do almost anything--what should they do? The Publisher has two cover versions for this title. The books will ship with either a black or white cover. The interior contents are the same.

In Pursuit of Justice Richard B. Zabel, James J. Benjamin, Human Rights First (Organization), 2008 In recent years, there has been much controversy about the proper forum in which to prosecute and punish suspected terrorists. Some have endorsed aggressive use of military commissions; others have proposed an entirely new national security court. However, as the nation strives for a vigorous and effective response to terrorism, we should not lose sight of the important tools that are already at our disposal, nor should we forget the costs and risks of seeking to break new ground by departing from established institutions and practices. As this White Paper shows, the existing criminal justice system has proved successful at handling a large number of important and challenging terrorism prosecutions over the past fifteen years--without sacrificing national security interests, rigorous standards of fairness and due process, or just punishment for those guilty of terrorism-related crimes.

Einstein's Bridge John Cramer, 2023-05-02 Somewhere in the Multiverse, in a lab distant from the Makers' Planet, Tunnel Maker, Creator of Bridges, answers an alarm. His inter-universe probe is detecting signals from another bubble universe, indicating that some new high-intelligence alien species is doing high-energy physics and creating hyperdimensional signals. Tunnel Maker knows that, in another bubble universe, the predatory Hive Mind should be receiving the same signals. It is time to make a Bridge . . . George Griffin, experimental physicist working at the newly-operational Superconducting Super Collider (SSC), observes a proton-proton collision that doesn't make sense. He chases it down and discovers a Bridgehead, a wormhole link to the Makers' universe. With help from theorist Roger Coulton and writer Alice Lancaster, he establishes communication with the Makers, only to learn that a Hive invasion of Earth is imminent. As the Hive invasion is destroying humanity, by wormhole the Makers transport George and Roger back to 1987, where they must undertake the task of manipulating the Reagan, Bush, and Clinton administrations to change the future and prevent construction of the SSC. At the publisher's request, this title is sold without DRM (Digital Rights Management).

*The Shape of Inner Space* Shing-Tung Yau, Steven J. Nadis, 2010-09-07 The leading mind behind the mathematics of string theory discusses how geometry explains the universe we see. Illustrations.

Expanded Cinema Gene Youngblood, 2020-03-03 Fiftieth anniversary reissue of the founding media studies book that helped establish media art as a cultural category. First published in 1970, Gene Youngblood's influential *Expanded Cinema* was the first serious treatment of video, computers, and holography as cinematic technologies. Long considered the bible for media artists, Youngblood's insider account of 1960s counterculture and the birth of cybernetics remains a mainstay reference in today's hypermediated digital world. This fiftieth anniversary edition includes a new Introduction by the author that offers conceptual tools for understanding the sociocultural and sociopolitical realities of our present world. A unique eyewitness account of burgeoning experimental film and the birth of video art in the late 1960s, this far-ranging study traces the evolution of cinematic language to the end of fiction, drama, and realism. Vast in scope, its prescient formulations include "the paleocybernetic age," "intermedia," the "artist as design scientist," the "artist as ecologist," "synaesthetics and kinesthetics," and "the technosphere: man/machine

symbiosis.” Outstanding works are analyzed in detail. Methods of production are meticulously described, including interviews with artists and technologists of the period, such as Nam June Paik, Jordan Belson, Andy Warhol, Stan Brakhage, Carolee Schneemann, Stan VanDerBeek, Les Levine, and Frank Gillette. An inspiring Introduction by the celebrated polymath and designer R. Buckminster Fuller—a perfectly cut gem of countercultural thinking in itself—places Youngblood’s radical observations in comprehensive perspective. Providing an unparalleled historical documentation, Expanded Cinema clarifies a chapter of countercultural history that is still not fully represented in the arthistorical record half a century later. The book will also inspire the current generation of artists working in ever-newer expansions of the cinematic environment and will prove invaluable to all who are concerned with the technologies that are reshaping the nature of human communication.

**Giger's Alien** Hansruedi Giger,1989 The classic status of Alien, the movie, is in large part due to Academy-Award winning artist and designer H.R. Giger. This book provides a complete illustrated record of the months of painstaking work that went into designing the most frightening movie monster of them all.

**Turing Test** E. M. Foner,2018-03-05 Alien AI is here to save Earth (and make a few bucks on the side). Mark Ai goes to work every day as a PC repairman, but fixing computers is just a cover job. Along with his mission managing the observation team, he's attempting to fill in as a parent for a teenage neighbor, provide a good home for a dog, and pick up a little money on the side. It's a juggling act that understandably leads to breaking a few rules, but things really start spinning out of control when competing aliens arrive.

*Ethics for the Information Age* Michael Jay Quinn,2006 Widely praised for its balanced treatment of computer ethics, *Ethics for the Information Age* offers a modern presentation of the moral controversies surrounding information technology. Topics such as privacy and intellectual property are explored through multiple ethical theories, encouraging readers to think critically about these issues and to make their own ethical decisions.

*HR Giger ARh+* Hansruedi Giger,Gaby Falk,2001 Giger's multi-faceted career: From surrealistic dream landscapes, to album cover designs, and sculpture For the last three decades H.R. Giger has reigned as one of the leading exponents of fantastic art. After he studied interior and industrial design for eight years at the School of Commercial Art in Zurich, Switzerland (1962-1970), he was soon gaining attention as an independent artist, with endeavors ranging from surrealistic dream landscapes created with a spray gun and stencils, to album cover designs for famous pop stars, and sculpture. In addition, Giger's multi-faceted career includes designing two bars, located in Tokyo and Chur, as well as work on various film projects--his creation of the set design and title figure for Ridley Scott's film Alien won him not only international fame but also an award for Best Achievement for Visual Effects (1980). The more famous I get, the more I am tolerated, albeit with some head-shaking. --H.R. Giger About the Series: Each book in TASCHEN's Basic Art Series features: a detailed chronological summary of the life and oeuvre of the artist, covering his or her cultural and historical importance a concise biography approximately 100 colour illustrations with explanatory captions

**Bearmageddon** Ethan Nicolle,2016-02-05 BEARS HAVE DECLARED WAR ON ALL HUMANS. When Joel Morley and his slacker friends ditch society to live in the forest, they discover bears have declared war on mankind. With the help of a mountain man they return to the city. But With bears mutating and invading in massive numbers, it looks like the end of civilization as we know it.

**This One Wild and Precious Life** Sarah Wilson,2020-12-29 As seen in USA Today's hottest releases and The Washington Post's 10 New Books Spotlight “Sarah Wilson is a force of nature – quite literally. She has taken her pain and grief about our sick and troubled world and alchemized it into action, advocacy, adventure, poetry, and true love.” —

ELIZABETH GILBERT Wake up and reclaim your one wild and precious life. New York Times bestselling author Sarah Wilson shows you how in this radical spiritual guidebook, the book we need NOW. Many of us are living with the sense that things are not right with the world and are in a state of spiritual PTSD. We have retreated, morally and psychologically; we are experiencing a crisis of disconnection—from one another, from our true values, from joy, and from life as we feel we are meant to be living it. Sarah Wilson argues that this sense of despair and disconnection is ironically what unites us—that deep down, we are all feeling that same itch for a new way of living. Drawing on science, literature, philosophy and the wisdom of some of the world’s leading experts, and her personal journey, Wilson offers a hopeful path forward to the life we love. En route, she shows us how to wake up and reconnect with life using “wild practices” that include: · Hike. Embrace the “walking cure” as great minds throughout history have. · Go to your edge. Do what scares you and embrace discomfort daily. · #Buylesslivemore. Break the cycle of mindless consumption and get light with your life. · Become a soul nerd. Light up your intellect with the arts. · Get “full-fat spiritual”. Have an active practice and use it to change the world. · Practice wild activism. Through sustained, non-violent protest we can create our better world. The time has come to boldly, wildly imagine better. We are being called upon, individually and as a society, to forge a new path and to find a new way of living. Will you join the journey?
