Maximillien De Lafayette,

Religion Must Die Rich Stanit, 2006-05 Besides being a polemic commentary on religion and giving clear reasons as to why it should perish, it is also a philosophical work, written by a deist. Television Aesthetics and Style Steven Peacock, Jason Jacobs, 2013-07-04
Although Film Studies has successfully (re)turned attention to matters of style and interpretation, its sibling discipline has left the territory uncharted - until now. The question of how television operates on a stylistic level has been critically underexplored, despite being fundamental to our viewing experience. This significant new work redresses a vital gap in Television Studies by engaging with the stylistic dynamics of TV; exploring the aesthetic properties and values of both the medium and particular types of output (specific programmes); and raising important questions about the way we judge television as both cultural artifact and art form. *Television Aesthetics and Style* provides a unique and vital intervention in the field, raising key questions about television's artistic properties and possibilities. Through a series of case-studies by internationally renowned

scholars, the collection takes a radical step forward in understanding TV's stylistic achievements.

The Search for Terrestrial Intelligence Mieczysław Taube, Klaus Leenders, 1998 The research on human intelligence is based on almost all disciplines of modern science. The following questions must be answered: What is information? How does information processing emerge? Can we trace the long and tortuous path of biotic evolution from reflex, through instinct, towards intelligence? The brain, as the most complex system of macro- and micro-structures, unifies energetic, electrical and chemical phenomena and carries human intelligence. Brain functions include memory, emotions, attention, etc. Are there gender differences? Speech, self-consciousness and the feeling of free will are tools of intelligence. What about genius, common sense and personality? Lies, myths, aesthetics and morality are inseparable parts of human intelligence. What about the chances and threats for human intelligence in the distant future? M Taube, a nuclear chemist specializing in the cosmic

evolution of matter and energy, and K Leenders, an academic neurologist and head of the positron emission tomography (PET) program at the Paul Scherrer Institute, address those questions in this fascinating book on human intelligence.

The Rational Mind Scott Sturgeon, 2020-01-30 Scott Sturgeon presents an original account of mental states and their dynamics. He develops a detailed story of coarse- and fine-grained mental states, a novel perspective on how they fit together, an engaging theory of the rational transitions between them, and a fresh view of how formal methods can advance our understanding in this area. In doing so, he addresses a deep four-way divide in literature on epistemic rationality. Formal epistemology is done in specialized languages—often seeming a lot more like mathematics than Plato—and so can alienate philosophers who are drawn to more traditional work on thought experiments in epistemic rationality. Conversely, informal epistemology appears to be a lot more like Plato than mathematics and, as such, it tends to deter philosophers drawn to formal models of the phenomena. Similarly, the epistemology of coarse-grained states boils down everything to a discussion of rational belief—making the area appear a lot more like foundations of knowledge than anything useful for the theory rational decision, such as decision-making under uncertainty. The Rational Mind unifies work in all of these areas for the first time.

Becoming Alien Sarah Welch-Larson, 2021-02-25 The Alien films are perceived to be a fractured franchise, each one loosely related to the others. They are nonlinear, complicated, convoluted: a collection of genre movies ranging from horror to war to farce. But on closer examination, the threads that bind together these films are strong and undeniable. The series is a model of Catherine Keller's cosmology as a cycle of order out of chaos, an illustration of her concept of evil as discreation. When viewed through the lens of Keller's Face of the Deep, the Alien films resolve into a cohesive whole. The series becomes six views of the idea of evil-as-exploitation, its origins, and its consequences. Each film expands on the concept of evil set forth by its predecessors, complicating that conception, and retroactively enriching readings of the films that came before.

UFOs, Chemtrails, and Aliens Donald R. Prothero, Timothy D.

Callahan, 2017-08-02 A wide-ranging survey offers “entertainment as well as wisdom for everyone who’s ever wondered what’s behind so many conspiracy theories and paranormal phenomena” (Publishers Weekly). UFOs. Aliens. Strange crop circles. Giant figures scratched in the desert surface along the coast of Peru. The amazing alignment of the pyramids. Strange lines of clouds in the sky. The paranormal is alive and well in the American cultural landscape. In *UFOs, Chemtrails, and Aliens*, Donald R. Prothero and Tim Callahan explore why such demonstrably false beliefs thrive despite decades of education and scientific debunking. Employing the ground rules of science and the standards of scientific evidence, Prothero and Callahan discuss a wide range of topics including the reliability of eyewitness testimony, psychological research into why people want to believe in aliens and UFOs, and the role conspiratorial thinking plays in UFO culture. They examine a variety of UFO sightings and describe the standards of evidence used to determine whether UFOs are actual alien spacecraft. Finally, they consider our views of aliens and the strong cultural signals that provide the shapes and behaviors of these beings. While their approach is firmly based in science, Prothero and Callahan also share their personal experiences of Area 51, Roswell, and other legendary sites, creating a narrative that is sure to engross both skeptics and believers.

EXPLORING THROUGH THE BIBLE Itty Mathews,2020-07-23 This study was done during personal devotion, and notes were made to keep intact what was gathered during that time. While reading through the bible the author made some simple notations, outlines of selected sections, and selected some verses that the author felt were promises, directions, advises, assurances, songs, praises, and prayers. The author copied some of the verses to keep the full meaning intact or full value of the section, and in other sections, the author paraphrased or summarized them. Information presented in this book is gathered and assembled in a way the user of this book can understand major key information in a thumbnail fashion. This book can be a helpful tool for beginning theological students, pastors, and lay leaders, as well as laymen and families who are serious about studying the Bible in an easier fashion. This book can be used for personal study and devotion as well as for bible study classes.
