Re:Align Jonathan Trevor, 2022-06-09 Why do some businesses thrive while many more struggle? In this age of disruption, a key reason is the failure of many leaders to realign all the moving parts of their enterprise, including its business strategy and how it is organised, to best support its enduring purpose. Thousands of enterprises globally are operating below their potential simply because they are not well aligned or fail to realign to reflect the new realities of their changing business environment. This book aims to change that. This book is about strategic realignment, a leadership process to overcome disruption and secure high performance on a sustainable basis. Given that change is a constant and disruption to the business environment ever more likely, strategic realignment must become a core competency in order that all enterprises and leaders can succeed in the future. Most executives recognise this but lack a robust system of thought to execute strategic realignment effectively and realise its full benefits. But once mastered, strategic realignment offers a means of turning disruption into an advantage. In Re:Align, Jonathan Trevor provides a blueprint to help leaders ask good questions, have better conversations and make the best possible choices to realign their enterprise to be fit for purpose. Drawing upon active research at the University of Oxford's Saïd Business School (with contributions from the joint works of Dr Jonathan Trevor and Dr Barry Varcoe), the book also provides practical case studies and evidence-based insights. Re:Align offers both a thoughtful and compelling message as well as an effective toolkit to help leaders everywhere to overcome disruption and improve enterprise performance.

Real-Time 3D Rendering with DirectX and HLSL Paul Varcholik, 2014-05-03 Get Started Quickly with DirectX 3D Programming: No 3D Experience Needed This step-by-step text demystifies modern graphics programming so you can quickly start writing professional code with DirectX and HLSL. Expert graphics instructor Paul Varcholik starts with the basics: a tour of the Direct3D graphics pipeline, a 3D math primer, and an introduction to the best tools and support libraries. Next, you'll discover shader authoring with HLSL. You'll implement basic lighting models, including ambient lighting, diffuse lighting, and specular highlighting. You'll write shaders to support point lights, spotlights, environment mapping, fog, color blending, normal mapping, and more. Then you'll employ C++ and the Direct3D API to develop a robust, extensible rendering engine. You'll learn about virtual cameras, loading and rendering 3D models, mouse and keyboard input, and you'll create a flexible effect and material system to integrate your shaders. Finally, you'll extend your graphics knowledge with more advanced material, including post-processing techniques for color filtering, Gaussian blurring, bloom, and distortion mapping. You'll develop shaders for casting shadows, work with geometry and tessellation shaders, and implement a complete skeletal animation system for importing and rendering animated models. You don't need any experience with 3D graphics or the associated math: Everything's taught hands-on, and all graphics-specific code is fully explained. Coverage includes • The Direct3D API and graphics pipeline • A 3D math primer: vectors, matrices, coordinate systems, transformations, and the DirectX Math library • Free and low-cost tools for authoring, debugging, and profiling shaders • Extensive treatment of HLSL shader authoring • Development of a C++ rendering engine • Cameras, 3D models, materials, and lighting • Post-processing effects • Device input, component-based architecture, and software services • Shadow mapping, depth maps, and projective texture mapping • Skeletal animation • Geometry and tessellation shaders • Survey of rendering optimization, global illumination, compute shaders, deferred shading, and data-driven engine architecture

Align Jonathan Trevor, 2019-11-28 Shortlisted for the 2020 Business Book Awards Why do some businesses thrive, while many more struggle and fail? A key reason – and the focus of this book – is strategic alignment. This is the careful arrangement of the various elements of an enterprise – from its business strategy to its organisation – to best support the fulfillment of its long-term purpose. The best-aligned enterprises are the best performing. Most executives recognise that their enterprises should be managed in this aligned way, but lack a robust system of thought to allow them to execute strategic alignment effectively and realise its full benefits. There are thousands of organisations globally that are operating below their potential simply because they are not aligned. This book aims to change that. In Align, Jonathan Trevor provides a blueprint for how strategic alignment can be effectively developed, implemented and sustained. Drawing upon active research at the University of Oxford's Saïd Business School (with contributions from the joint works of Dr Jonathan Trevor and Dr Barry Varcoe), Jonathan also provides practical case studies and evidence-based insights – culminating in a thoughtful and compelling message to help leaders everywhere to improve their alignment and enterprise performance.

The Rhetoric of Characterization of God, Jesus and Jesus' Disciples in the Gospel of Mark Paul L. Danove, 2005-03-28 This study develops a method for analyzing the semantic and narrative rhetoric of repetition and the narrative rhetoric and function of characterization and applies this method in studies of the characterization of God, Jesus, and Jesus' disciples in the Gospel of Mark. The studies of characterization distinguish beliefs that are assumed for the audience from beliefs that the narration cultivates for the audience, identifies the rhetorical relationships and organization of cultivated beliefs, and clarifies the contribution of each character's portrayal to the overall narrative development of Mark. The study then considers the contribution of the characterization of the women at the tomb to the portrayal of Jesus' disciples and narrative developments. A concluding inquiry investigates the possible applications of the studies of characterization for determining the rhetorical exigency of the narration and for formulating statements of Mark's proposed theology.

Phonological Projection Marc van Oostendorp,2011-07-11 The architecture of the human language faculty has been one of the main foci of the linguistic research of the last half century. This branch of linguistics, broadly known as Generative Grammar, is concerned with the formulation of explanatory formal accounts of linguistic phenomena with the ulterior goal of gaining insight into the properties of the 'language organ'. The series comprises high quality monographs and collected volumes that address such issues. The topics in this series range from phonology to semantics, from syntax to information structure, from mathematical linguistics to studies of the lexicon.

When Two Spines Align: Dressage Dynamics Beth Baumert,2015-09-14 Within riding exists a fundamental conflict of interest: The rider needs to have control—her confidence depends on her ability to control the balance of her own body as well as that of her very powerful horse. The horse, by nature, needs to feel free—free in both mind and body to express himself through movement. In *When Two Spines Align*, author Beth Baumert, writer and editor at the equestrian magazine *Dressage Today*, resolves the freedom-control enigma by taking a close look at the individual components that make up riding and dressage and providing practical ways riders can learn to harness the balance, energies, and forces at play. Readers will discover how to use “positive tension” and their body’s “power lines” to become balanced and effective in the saddle. They will then find ways to understand and manage the horse's balance and “coordination challenges.” Ultimately, the rider learns to regulate and monitor the horse's rhythm, energy, flexion, alignment, bend, and line of travel by properly aligning her spine with his. When the center of gravity of a balanced rider is over the center of gravity of a balanced horse, that place where two spines align becomes the hub for rider and horse harmony.
