Algorithms to Live By Brian Christian,Tom Griffiths,2016-04-19
An exploration of how computer algorithms can be applied to our everyday lives to solve common decision-making problems and illuminate the workings of the human mind. What should we do, or leave undone, in a day or a lifetime? How much messiness should we accept? What balance of the new and familiar is the most fulfilling? These may seem like uniquely human quandaries, but they are not. Computers, like us, confront limited space and time, so computer scientists have been grappling with similar problems for decades. And the solutions they've found have much to teach us. In a dazzlingly interdisciplinary work, Brian Christian and Tom Griffiths show how algorithms developed for computers also untangle very human questions. They explain how to have better hunches and when to leave things to chance, how to deal with overwhelming choices and how best to connect with others. From finding a spouse to finding a parking spot, from organizing one's inbox to peering into the future, *Algorithms to Live By* transforms the wisdom of computer science into strategies for human living.

The American Directory of Writer's Guidelines is a compilation of the actual writer's guidelines for more than 1,700 publishers. A one-of-a-kind source to browse for article, short story, poetry and book ideas.

The 100 Thing Challenge Dave Bruno,2010-12-28 "Reading this will lead you to a better life." —Dean Nelson, author of *God Hides in Plain Sight* In *The 100 Thing Challenge* Dave Bruno relates how he remade his life and regained his soul by getting rid of almost everything. But *The 100 Thing Challenge* is more than just the story of how one man started a movement to unhook himself from consumerism by winnowing his life's possessions down to 100 things in one year. It's also an inspiring, invigorating guide to how we all can begin to live simpler, more meaningful lives.
