🔖 **DIGITAL ARCHAEOLOGY** Michael W. Graves,2013 In Digital Archaeology, expert practitioner Michael Graves has written the most thorough, realistic, and up-to-date guide to the principles and techniques of modern digital forensics. He begins by providing a solid understanding of the legal underpinnings and critical laws affecting computer forensics, including key principles of evidence and case law. Next, he explains how to systematically and thoroughly investigate computer systems to unearth crimes or other misbehavior, and back it up with evidence that will stand up in court. Drawing on the analogy of archaeological research, Graves explains each key tool and method investigators use to reliably uncover hidden information in digital systems. Graves concludes by presenting coverage of important professional and business issues associated with building a career in digital forensics, including current licensing and certification requirements.

🔖 **ELECTRIC UNIVERSE** David Bodanis,2006-02-28 The bestselling author of E=mc² weaves tales of romance, divine inspiration, and fraud through an account of the invisible force that permeates our universe—electricity—and introduces us to the virtuoso scientists who plumbed its secrets. For centuries, electricity was seen as little more than a curious property of certain substances that sparked when rubbed. Then, in the 1790s, Alessandro Volta began the scientific investigation that ignited an explosion of knowledge and invention. The force that once seemed inconsequential was revealed to be responsible for everything from the structure of the atom to the functioning of our brains. In harnessing its power, we have created a world of wonders—complete with roller coasters and radar, computer networks and psychopharmaceuticals. In Electric Universe, the great discoverers come to life in all their brilliance and idiosyncrasy, including the visionary Michael Faraday, who struggled against the prejudices of the British class system, and Samuel Morse, a painter who, before inventing the telegraph, ran for mayor of New York City on a platform of persecuting Catholics. Here too is Alan Turing, whose dream of a marvelous thinking machine—what we know as the computer—was met with indifference, and who ended his life in despair after British authorities forced him to undergo experimental treatments to “cure” his homosexuality. From the frigid waters of the Atlantic to the streets of Hamburg during a World War II firestorm to the interior of the human body, Electric Universe is a mesmerizing journey of discovery.

🔖 **COMPETITION AS A DYNAMIC PROCESS** John Maurice Clark,1980-01-01 This volume offers a conceptual approach to the study of competition as a dynamic process. It critically examines the dynamic character of modern competition, appraises the inadequacies of equilibrium theory, and suggests a new approach to the study and interpretation of competitive activities in the economy.

🔖 **INSIDE CAVE HOLLYWOOD** Harvey Kubernik,2017-08 This is a book with interviews with various entertainment and artistic celebrities. This incorporates conversations with people from various ares of the entertainment industry. This provides an in depth look at what makes artictic people tick.

🔖 **THE AMERICAN MUSICAL LANDSCAPE** Richard Crawford,2000-06-30 This book reflects a breakthrough in American music studies, an unrecognized field among traditional musicologists until the past few decades, during which enormous progress has been made in documenting three centuries of American musical activities and figures. Time and effort had to be expended exclusively on the development of basic historical studies. The time has come for a new phase, one that can take a creative, interpretive approach. Professor Crawford’s study will introduce this higher level of scholarship into the field of American music studies.—Vivian Perlis, author of Charles Ives Remembered A major statement by a senior scholar on what American musicology is all about. . . These themes are also topical; they come at a time when much more research is being done in American music, but little thought is being given to the big picture, the vision, the philosophy, and the implications of historical research. Now is the time for a synthesis, and there are few scholars better equipped to do that in American music than Richard Crawford.—Michael Broyles, author of Music of the Highest Class

🔖 **MOON-FACE AND OTHER STORIES** Jack London,1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The Son of the Wolf (1900), the first of his collections of tales, is based upon life in the far north, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master’s death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London’s most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

🔖 **MAKING MUSIC MODERN** Carol J. Oja,2000 This book recreates an exciting and productive period in which creative artists felt they were witnessing the birth of a new age. Aaron Copland, Henry Cowell, George Gershwin, Roy Harris, and Virgil Thomson all began their careers then, as did many of their less widely recognized compatriots. While the literature and painting of the 1920’s have been amply chronicled, music has not received such treatment. Carol Oja’s book sets the growth of American musical composition against parallel developments in American culture, provides a guide for the understanding of the music, and explores how the notion of the concert tradition, as inherited from Western Europe, was challenged and revitalized through contact with American popular song, jazz, and non-Western musics.

🔖 **JOAN CRAWFORD** David Bret,2009-04-15 In the first biography of Joan Crawford to give the full, uncensored story, bestselling author David Bret tells Crawford’s rags to riches climb, from working in a Kansas City laundry to collecting an Oscar for her defining role in Mildred Pierce, and on to her devotion to Christian Science and reliance on vodka. He discusses the star’s legendary relationship with Clark Gable, her countless love affairs, her marriages -- three of them to gay men -- and her obsession with rough sex. Bret divulges what really happened that led her to disinherit two of her four children, earning her the nickname Mommie Dearest, as well as how her loathed mother forced Crawford to work as a prostitute, appear in pornographic films, and sleep her way to the top. Bret analyzes Crawford’s films, many of which were constructed purely as vehicles where actress and character were often indistinguishable. Overtly generous towards her coterie of gay friends, she was heartless towards her enemies, particularly Bette Davis, her co-star in Whatever Happened to Baby Jane, with whom she shared a lifelong feud. Drawing on a wealth of unpublished material and interviews, David Bret presents a unique, fascinating portrait of a single-minded, uncompromising woman.
