Bigger than Chaos Michael Strevens,2009-06-30

Michael Strevens shows how simplicity can co-exist with the tangled interconnections within complex systems. By looking at the foundations of statistical reasoning about complex systems (gases, ecosystems and even social systems) he provides an understanding of how simplicity emerges from complexity.

Computers and the Cybernetic Society Michael A. Arbib,2014-05-10 Computers and the Cybernetic Society, Second Edition examines the impact of computers on the cybernetic society and covers topics such as expert systems, management applications, and office automation. The idea of a computer program is considered, along with data banks and the movement and storage of information. Advances in computer technology are also discussed. Comprised of nine chapters, this book begins with an assessment of the interaction between computer developments and social pressures. The interplay between the exciting possibilities of computer networking and the social implications of computer technology is highlighted by focusing on planning networks and public information networks. The next two chapters provide a basic understanding of computers and

programming by describing key concepts such as computer graphics, networks, microcomputers, and program design. The next five chapters give a comprehensive overview of the impact of computers on the cybernetic society. The final chapter explains how hardware works and describes the circuitry that computers use to execute a program at the level of machine-language instructions. This monograph is intended for both students and instructors in the fields of computer science and cybernetics.

Khmer Legends: Part III Démaz Baker, 2022-11-09
Khmer Legends Part III is Démaz's new collection of Cambodian folktales, one of which is the famous story of A-Lêv. The narrative is about a boy born of poor and uneducated parents. At the age of seven, A-Lêv already understood the meaning of being deprived of even the basic necessities of survival. He wanted to make a difference, not only for his parents but also for himself. From a teenager to an adult, his shrewd brain concocted mischievous, hilarious schemes to cheat people out of their belongings or to gain money so his

parents could survive. He created trials and tribulations in doing so just to amuse himself. As years went by, he had a firm desire to educate himself by beginning to learn to read and write in order to deal with a high society that flaunted its wealth and status upon the poor and less fortunate. In the end, his humility and humbleness gained him more respect in the society that rejected him because of his low economic status.
