Andi Stein,Beth Bingham Evans

Advances in Design, Music and Arts Daniel Raposo,João Neves,José Silva,Luís Correia Castilho,Rui Dias,2020-09-11 This book presents the outcomes of recent endeavors that will contribute to significant advances in the areas of communication design, fashion design, interior design and product design, music and musicology, as well as overlapping areas. Gathering the proceedings of the 7th EIMAD conference, held on May 14–15, 2020, and organized by the School of Applied Arts, Campus da Talagueira, in Castelo Branco, Portugal, it proposes new theoretical perspectives and practical research directions in design and music, while also discussing teaching practices and some areas of intersection. It addresses strategies for communication and culture in a global, digital world, that take into account key individual and societal needs.

Private Television Communications--into the Eighties Judith M. Brush,Douglas P. Brush,1981

Psychological Life Robert Donald Romanyshyn,1982

Forces of Destiny Christopher Bollas,2018-10-03 Christopher Bollas is one of the most expressive and eloquent exponents of the ideas, meanings and experience of psychoanalysis currently writing. He has a real gift for taking the reader into the fine texture of the psychoanalytic process. Forces of Destiny examines and reflects on one of the most fundamental questions – what is it that is unique about us as individuals? How does it manifest itself in our personalities, our lives, relationships and in the psychoanalytic process? Drawing on classical notions of ‘fate’ and ‘destiny’ and Winnicott’s idea of the true self, Bollas develops the concept of ‘the human idiom’ to explore and show how we work out – both creatively and in the process of analysis – the ‘dialectics of difference’. In particular he reflects on how the patients may use particular parts of the psychoanalyst’s personality to express their own idiom and destiny drive. Forces of Destiny was Bollas’ second book. His first, The Shadow of the Object (1987), was described by the reviewer in the International Journal of Psycho-Analysis as a ‘unique and remarkable book. I think of it as one of the most interesting and important new books on psychoanalysis which I have read in the last decade.’ Forces of Destiny confirmed his position as one of the most important, thoughtful and engaging psychoanalytic writers. With a new preface from Christopher Bollas, Forces of Destiny remains a classic of psychoanalytic literature, appealing to psychoanalysts as well as readers in art history, literature, philosophy, and cultural studies.

An Introduction to the Entertainment Industry Andi Stein,Beth Bingham Evans,2009 Whether it's a favorite television show, an artist at the top of the music charts, a best-selling book, or a hometown sports team, we love entertainment. It's big business and in this accessible introduction, Andi Stein and Beth Bingham Evans give readers a glimpse inside the industry, to better understand how each segment operates and the challenges and trends it faces. Each chapter addresses a different segment of the entertainment industry including: - Film - Television - Radio - Theatre - Music - Travel/Tourism - Sports The book is designed as an introductory text for entertainment courses and as an overview of the industry for those looking to pursue careers in the field of entertainment. A list of resources is provided at the end of each chapter.

Digital Economy Report 2019 United Nations Publications,2019-10-18 The Digital Economy Report 2019 on Value creation and capture: Implications for developing countries takes stock of recent trends in the global digital landscape and discusses the development and policy implications of data and digital platforms. A key feature of the evolving digital economy is the increasing role of digital data as an economic resource, together with digital platforms as new influential actors, with capacity to collect, process, analyze and monetize data. The report considers policy options for countries to help ensure that they capture a fair part of the value created in the digital economy for inclusive development. Key issues include the market impact of emerging technologies and digital platforms, the impact on smaller businesses in developing countries and the implications for infrastructure, entrepreneurship, skills, competition, data flows, data protection, taxation and other relevant policies.

Graphic Thinking for Architects and Designers Paul Laseau,2000-08-03 Hier ist sie endlich - die langersehnte überarbeitete 3. Auflage des Klassikers in neuer Aufmachung: mit Hunderten neuer Illustrationen und neuen Technologien im Bereich 'Graphic Thinking' (bildhaftes Denken). Komplett aktualisiert, mit Computeranimationen für digitale und andere Kommunikationsmedien. Diskutiert werden u.a. folgende Themen: Grundlagen für Freihandzeichnen, Fertigen von Symbolzeichnungen, Notizen in Bildern und Diagrammen - alles im Kontext moderner Architektur und aktuellem Design. Der Begriff 'Graphic Thinking' beschreibt, welche Tools, Zeichen- und Skizziermethoden Architekten und Studenten verwenden, um eine Designlösung zu finden. In der Architektur wird diese Form des Denkens im allgemeinen mit der Entwurfsphase eines Projektes assoziiert - ein Zusammenspiel von Denken und Skizzieren. (y09/00)

Ron Arad Ron Arad,Paola Antonelli,2009 Even among the most influential designers of our time, Ron Arad stands out for the versatile nature of his work and his daredevil use of materials and technology. Idiosyncratic, suprising and always visually arreasting, Arads work communicates joy in creation, pleasure in invention, and pride in technical and constructive qualities. He has deftly avoided a recognizable style for over twenty years; his style is rather a matter of character, reflective of his disregard for established disciplines. Through his own work and his decade long tenure as the Head of Design Projects graduate programme at the Royal College of Art in London, Arad has greatly influenced the current debate on designs relationship with art, technology and innovation, and nurtured some of the most promising young designers in todays international scene. Published to accompany the first major retrospective of Arads work in the US, the catalogue features an interview with the artist and essays on his use of innovative materials and technology, his role as an educator and communicator on the importance of design, and his place in the larger design and art market. A lavishly illustrated plate section provides visual and written documentation of approximately eighty works.

A Desire for Death Saleem,2013-12-23 This novel treats the two themes of incurable diseases and euthanasia at various levels to bring into focus a web of dense arguments legal and medical woven together that never tire the readers in their attempts to grapple with issues of human suffering, disease and death and its over-arching subject of sympathy, pity and humanity. To lend credence to all the impressive arguments, the novel draws parallels from real life situations and cases that made possible a debate on physician-assisted suicides and importance of human dignity and right to life and death.

CAD and Rapid Prototyping for Product Design Douglas Bryden,2014-05-05 Computer-aided design (CAD) and rapid prototyping (RP) are now a fundamental part of the professional practice of product design and are therefore essential skills for product design undergraduate students. This book provides students with all the tools needed to get to grips with the range of both CAD software and RP processes used in the industry. Presented in a visually engaging format, this book is packed with case study examples from contemporary product designers, as well as screen shots, CAD models and images of rapid prototypes highlighting the design process. This book shows how CAD and RP software is used in product design and explains, in clear language, the similarities and differences between the different software packages and processes.

Design Revolution Emily Pilloton,2009 This smart, friendly, and well-designed volume makes the case for design as a tool to solve some of the world's biggest social problems. The book features more than 100 innovative, sustainable, need-based product designs that empower individuals, communities, and economies.

Asian Video Cultures Joshua Neves,Bhaskar Sarkar,2017-11-16 The contributors to this volume theorize Asian video cultures in the context of social movements, market economies, and local popular cultures to complicate notions of the Asian experience of global media. Whether discussing video platforms in Japan and Indonesia, K-pop reception videos, amateur music videos circulated via microSD cards in India, or the censorship of Bollywood films in Nigeria, the essays trace the myriad ways Asian video reshapes media politics and aesthetic practices. While many influential commentators overlook, denounce, and trivialize Asian video, the contributors here show how it belongs to the shifting core of contemporary global media, thereby moving conversations about Asian media beyond static East-West imaginaries, residual Cold War mentalities, triumphalist declarations about resurgent Asias, and budding jingoisms. In so doing, they write Asia's vibrant media practices into the mainstream of global media and cultural theories while challenging and complicating hegemonic ideas about the global as well as digital media. Contributors. Conerly Casey, Jenny Chio, Michelle Cho, Kay Dickinson, Bishnupriya Ghosh, Feng-Mei Heberer, Tzu-hui Celina Hung, Rahul Mukherjee, Joshua Neves, Bhaskar Sarkar, Nishant Shah, Abhigyan Singh, SV Srinivas, Marc Steinberg, Chia-chi Wu, Patricia Zimmerman

The Charm of Life ,1912

Teaching Music History Mary Natvig,2017-07-05 Unlike their colleagues in music theory and music education, teachers of music history have tended not to commit their pedagogical ideas to print. This collection of essays seeks to help redress the balance, providing advice and guidance to those who teach a college-level music history or music appreciation course, be they a graduate student setting out on their teaching career, or a seasoned professor having to teach outside his or her speciality. Divided into four sections, the book covers the basic music history survey usually taken by music majors; music appreciation and introductory courses aimed at non-majors; special topic courses such as women and music, music for film and American music; and more general issues such as writing, using anthologies, and approaches to teaching in various situations. In addition to these specific areas, broader themes emerge across the essays. These include how to integrate social history and cultural context into music history teaching; the shift away from the 'classical canon'; and how to organize a course taking into consideration time constraints and the need to appeal to students from a diverse range of backgrounds. With contributions from both teachers approaching retirement and those at the start of their careers, this volume provides a spectrum of experience which will prove valuable to all teachers of music history.

The Making of Design Gerrit Terstiege,2009-01-01 This book takes an in-depth look at design processes, with twenty-five depictions of the making of products from a wide variety of industries. Its primary focuses are furniture design, transportation design, and household appliances. Renowned designers like Konstantin Grcic, the Bouroullecs, Stefan Diez, Hella Jongerius, and Sir Norman Foster offer step by step accounts of how they go about designing products for Vitra, Grundig, Jura, and Authentics – the tools they use for visualization and how projects change during the model phase. Plus: an interview with design legend Dieter Rams on realized and unrealized products for Braun.

The Fragments of Heraclitus Heraclitus,2013 Heraclitus of Ephesus was a pre-Socratic Greek philosopher who lived a lonely life earning him the moniker of the Weeping Philosopher. His principal philosophy is embodied in the following statement No man ever steps in the same river twice, in other words man faces an ever-present change in the universe. He believed in the unity of opposites, stating that the path up and down are one and the same. According to Diogenes, Heraclitus worked on a continuous treatise On Nature, which was divided into three discourses, one on the universe, another on politics, and a third on theology. Only fragments of this work remain today many of which are quoted from other authors. Those fragments are presented here in a translation and with critical commentary by G. T. W. Patrick.

Handbook of Research on Business Models in Modern Competitive Scenarios Jamil, George Leal,Jamil, Liliane Carvalho,Pessoa, Cláudio Roberto Magalhães,Silveira, Werner,2018-12-21 Business models are regarded as a main emerging topic in the management area for opportune science-driven practical conceptions and applications. They represent how organizations are proposed and planned, as well as how they establish a market and social relations, manage strategic resources, and make decisions. However, companies must produce new solutions for strategic sustainability, performance measurement, and overall managerial conditions for these business models to be implemented effectively. The Handbook of Research on Business Models in Modern Competitive Scenarios depicts how business models contribute to strategic competition in this new era of technological and social changes as well as how they are conceptualized, studied, designed, implemented, and in the end, how they can be improved. Featuring research on topics such as creating shared value, global scenarios, and organizational intelligence, this book provides pivotal information for scientific researchers, business decision makers, strategic planners, consultants, managers, and academicians.

Decoding **Allsharevideo**: Revealing the Captivating Potential of Verbal Expression

In a period characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force.
