Poetic Machinations Michael Golston,2015-09-01 The shape, lineation, and prosody of postmodern poems are extravagantly inventive, imbuing both form and content with meaning. Through a survey of American poetry and poetics from the end of World War II to the present, Michael Golston traces the proliferation of these experiments to a growing fascination with allegory in philosophy, linguistics, critical theory, and aesthetics, introducing new strategies for reading American poetry while embedding its formal innovations within the history of intellectual thought. Beginning with Walter Benjamin's explicit understanding of Surrealism as an allegorical art, Golston defines a distinct engagement with allegory among philosophers, theorists, and critics from 1950 to today. Reading Fredric Jameson, Angus Fletcher, Roland Barthes, and Craig Owens, and working with the semiotics of Charles Sanders Pierce, Golston develops a theory of allegory he then applies to the poems of Louis Zukofsky and Lorine Niedecker, who, he argues, wrote in response to the Surrealists; the poems of John Ashbery and Clark Coolidge, who incorporated formal aspects of filmmaking and photography into their work; the groundbreaking configurations of P. Inman, Lyn Hejinian, Myung Mi Kim, and the Language poets; Susan Howe's *Pierce-Arrow*, which he submits to semiotic analysis; and the innovations of Craig Dworkin and the conceptualists. Revitalizing what many consider to be a staid rhetorical trope, Golston positions allegory as a creative catalyst behind American poetry's postwar avant-garde achievements.

The Modern Pistol and How to Shoot It Walter Winans,2011-01-01 There is now no use learning revolver shooting. That form of pistol is obsolete except in the few instances where it survives for target shooting, or is carried for self-defence; just as flintlock muskets even now survive in out-of-the-way parts of the world. If a man tries to defend himself with a revolver against another armed with an automatic pistol he is at a great disadvantage. The automatic is more accurate than a revolver, as the “blow-back” does not vary as much as does the escape of gas past the cylinder in a revolver. The bullet in the revolver has to jump into the cylinder, whereas in the automatic it is already fitted up against the rifling, before being fired. The single-shot pistol is the most accurate of any, there being no escape of gas. The automatic has not only a much longer range than the revolver (although the popular idea that it can be shot accurately at a thousand yards or more is nonsense) but it cocks itself instead of having to be cocked by the thumb, or trigger finger. Cocking by trigger-pull is such a strain on, not only the trigger finger, but the whole hand, that, after a few shots, good shooting cannot be made. I won all my rapid-firing revolver competitions using the single action and cocking with the thumb, as this rested my trigger finger. With the automatic, cocking is unnecessary and, with its lighter recoil, good scores in rapid-firing are very much easier to make. The penetration of the nickel-coated automatic bullet propelled by its big charge of nitro powder is very great. A man brought me a “pistol-proof” cuirass to test; I put a bullet at twelve yards clean through it and then through two “bullet proof” ones, placed one behind the other. (I used a regulation U. S. .45 Automatic pistol.) This was before the war. The inventor was disappointed. He had experimented only with revolvers shooting soft leaden bullets and these his cuirass had stopped. Unfortunately, in its present comparatively imperfect development, the automatic is the most dangerous firearm of all pistols for a novice to handle. The long barrel of a rifle can be struck aside if a beginner swings it round and points it at the instructor or a nearby spectator, but the short barrel of a pistol is easily pointed at and with difficulty brushed aside by the unfortunate person standing near a “brandishing” and “flourishing” man who is learning to shoot. In spite of all warnings even those who ought to know better do this swinging about. In fact, it is the recognized way of handling a pistol; according to reporters, they always say So and So “was brandishing a pistol” if he happens to be armed.

Understanding Close-Up Photography Bryan Peterson,2009-03-31 In his sixth book, renowned photographer, popular instructor, and best-selling author Bryan Peterson challenges and inspires us to see close-up photography in new ways when we view it through his eyes. You’ve seen the dewdrops, but what about dewdrops on a bird’s wing or raindrops on a car windshield? You’ve seen the bumblebees on vibrant flowers, but what about the fluid edge of just one petal or the colorful rusting metal at industrial sites? Even when Peterson does capture the more traditional subjects, it's done

in untraditional ways—and often with minimal specialized equipment! Most important, he moves beyond the commonplace to inspire new ways of getting close, using your lenses, and discovering unconventional subjects.

A Photo Curmudgeon's Tale Shawn M. Tomlinson,2015-06-17 Long-time columnist and lifelong photographer Shawn M. Tomlinson writes about the art and technique of photography with wit and humor. He focuses in his Photo Curmudgeon columns on getting started in as well as moving into advanced photography. Instead of concentrating upon the newest, shiniest photographic equipment, Tomlinson works with all levels of older equipment, makes recommendations and recounts his own Voyages of Photography. He helps the novice get started with higher end, older cameras and lenses, and helps with photo editing suggestions and techniques.

Nahw Meer English Mohammed Sajid Khan,2023-11-06 An English Translation of Nahw Meer for the student of Arabic Grammar by Meer Syed Shareef Abul Hasan Bin Mohammed Al-Jurjani (RA). Ilm un Nahw is that science that teaches us how to join Nouns, Verbs, and Particles to form a

complete sentence and what the vowel of the last letter of each word should be. This science started from the time of Omar bin Al-Khattab (RA) when one of the Bedouins read part of the Ayah 3 of Surah At-Tauba with a Kasrah at the very end as rasulih instead of Dammah as in rasuluhu. This changed the meaning from “that Allah and His prophet are free from obligations to the polytheists” to “that Allah is free from obligations to the polytheists and His prophet”. The Bedouin said if Allah dissolves his obligations to His prophet, so do I. After this incident, Omar (RA) ordered that the rules of Nahw be created. Why this book? First Meer Ali ibn Mohammed Al-Jurjani, the Author of Nahw Meer, does not need any introduction. His masterful book has been in use for centuries mostly in its original language of Persian and its Arabic and Urdu translations and it is taught in many schools in the Indian subcontinent and other parts of the world. I felt, that there is a need for a literal translation in today's English for those of us who are more comfortable with it.

Biology of Adventitious Root Formation Tim D. Davis,Bruce E. Haissig,2013-11-11 Charles E. Hess Department of Environmental Horticulture University of California Davis, CA 95616 Research in the biology of adventitious root formation has a special place in science. It provides an excellent forum in which to pursue fundamental research on the regulation of plant growth and development. At the same time the results of the research have been quickly applied by commercial plant propagators, agronomists, foresters and horticulturists (see the chapter by Kovar and Kuchenbuch, by Ritchie, and by Davies and coworkers in this volume). In an era when there is great interest in speeding technology transfer, the experiences gained in research in adventitious root formation may provide useful examples for other areas of science. Interaction between the fundamental and the applied have been and continue to be facilitated by the establishment, in 1951, of the Plant Propagators' Society, which has evolved into the International Plant Propagators' Society, with active programs in six regions around the world. It is a unique organization which brings together researchers in universities, botanical gardens and arboreta, and commercial plant propagators. In this synergistic environment new knowledge is rapidly transferred and new ideas for fundamental research evolve from the presentations and discussions by experienced plant propagators. In the past 50 years, based on research related to the biology of adventitious root formation, advances in plant propagation have been made on two major fronts.
