Always Up Front Helen Fried Kirshblum Goldstein,Myrna Frommer,2005 From the time she followed her big brother to kindergarten and got herself accepted a year ahead of time, Helen Fried Kirshblum Goldstein has pursued her goals with pluck, verve, and determination. In this forthright and engaging memoir, Helen looks through a lens that encompasses most of the last century and moves into the present one, telling the story Always Up Front. As president of Women's League for Conservative Judaism and a leader in the Jewish organizational world the author encountered such figures as Nelson Rockefeller, Golda Meir, Abraham Heschel, David Ben-Gurion, Teddy Kollek, Arthur Goldberg, Menachem Begin, Elie Wiesel, and involvement in such events as the creation and development of the State of Israel, the Civil Rights Movement, the Feminist Movement and its impact on Conservative Judaism, and open admissions policies in higher education were consequences of that MOVE and are described here with vivid recall.

Always Up Against It Dean Vinka,2003-06 Always Up Against It will tell you who the author, Dean Vinka, is, who he was, and who he is becoming. Read closely, but you need not look far to know that he is you and me. Not only enjoying the simple things in life, he sucks the marrow out of them, and puts it on display for us all to see. His life is his art form, the people in it are his characters, his experiences the story. You can be a part of it. The walls of narrow-mindedness, complacency, and conformity are no longer. Unified are spirits afire, breaking through and shining magnificently, so that nothing save the light itself could possibly exist. The feeling is warm, the taste is like honey. Always Up Against It is a unique collection of poems. It is a chemical reaction of thoughts, emotions, and experiences from an individual who speaks on behalf of us all. In a world of struggles against society, conformity, and self, Always Up Against It delivers a refreshingly insightful perspective on the trials of life.

The Many-body Problem Daniel Charles Mattis,1993 This book differs from its predecessor, Lieb & Mattis Mathematical Physics in One Dimension, in a number of important ways. Classic discoveries which once had to be omitted owing to lack of space ? such as the seminal paper by Fermi, Pasta and Ulam on lack of ergodicity of the linear chain, or Bethe's original paper on the Bethe ansatz ? can now be incorporated. Many applications which did not even exist in 1966 (some of which were originally spawned by the publication of Lieb & Mattis) are newly included. Among these, this new book contains critical surveys of a number of important developments: the exact solution of the Hubbard model, the concept of spinons, the Haldane gap in magnetic spin-one chains, bosonization and fermionization, solitons and the approach to thermodynamic equilibrium, quantum statistical mechanics, localization of normal modes and eigenstates in disordered chains, and a number of other contemporary concerns.
