The Greeks Paul Cartledge,2002-10-10 This book provides an original and challenging answer to the question: 'Who were the Classical Greeks?' Paul Cartledge - 'one of the most theoretically alert, widely read and prolific of contemporary ancient historians' (TLS) - here examines the Greeks and their achievements in terms of their own self-image, mainly as it was presented by the supposedly objective historians: Herodotus, Thucydides, and Xenophon. Many of our modern concepts as we understand them were invented by the Greeks: for example, democracy, theatre, philosophy, and history. Yet despite being our cultural ancestors in many ways, their legacy remains rooted in myth and the mental and material contexts of many of their achievements are deeply alien to our own ways of thinking and acting. The Greeks aims to explore in depth how the dominant group (adult, male, citizen) attempted, with limited success, to define themselves unambiguously in polar opposition to a whole series of 'Others' - non-Greeks, women, non-citizens, slaves and gods. This new edition contains an updated bibliography, a new chapter entitled 'Entr'acte: Others in Images and Images of Others', and a new afterword.

The Man Who Saw Everything Deborah Levy,2019-10-15 Longlisted for the Booker Prize Named a Best Book of the Year By: The New York Times Book Review (Notable Books of the Year) * The New York Public Library * The Washington Post * Time.com * The New York Times Critics' (Parul Seghal's Top Books of the Year) * St. Louis Post Dispatch * Apple * Publisher's Weekly An electrifying novel about beauty, envy, and carelessness from Deborah Levy, author of the Booker Prize finalists *Hot Milk* and *Swimming Home*. It is 1988 and Saul Adler, a narcissistic young historian, has been invited to Communist East Berlin to do research; in exchange, he must publish a favorable essay about the German Democratic Republic. As a gift for his translator's sister, a Beatles fanatic who will be his host, Saul's girlfriend will shoot a photograph of him standing in the crosswalk on Abbey Road, an homage to the famous album cover. As he waits for her to arrive, he is grazed by an oncoming car, which changes the trajectory of his life. *The Man Who Saw Everything* is about the difficulty of seeing ourselves and others clearly. It greets the specters that come back to haunt old and new love, previous and current incarnations of Europe, conscious and unconscious transgressions, and real and imagined betrayals, while investigating the cyclic nature of history and its reinvention by people in power. Here, Levy traverses the vast reaches of the human imagination while artfully blurring sexual and political binaries-feminine and masculine, East and West, past and present--to reveal the full spectrum of our world.

Existential Rationalism Marcel Eschauzier,2021-08-18 Words and equations cannot contain the existence stream. Science's confused adulation of reality breeds irrational fantasies like the quantum computer. Now, there is an alternative. Existential rationalism reconciles reason with Tao. The hero of this adventure is the first person: you and me. Join the exhilarating expedition into human knowledge that connects the dots between Schrödinger and Lao Tzu, Einstein and Kierkegaard, Heisenberg and Freud. At last, David Hume's centuries-old challenge to reason has been met. The depth, precision, and plain language make this a stunning story for both newcomers and experts in philosophy, psychology, and physics.

Destination Branding Nigel Morgan,Annette Pritchard,Roger Pride,2007-06-07 In today's highly competitive market, many destinations - from individual resorts to countries - are adopting branding techniques similar to those used by 'Coca Cola', 'Nike' and 'Sony' in an effort to differentiate their identities and to emphasize the uniqueness of their product. By focusing on a range of global case studies, *Destination Branding* demonstrates that the adoption of a highly targeted, consumer research-based, multi-agency 'mood branding' initiative leads to success every time.

Human Factors Considerations of Undergrounds in Insurgencies Us Army Special Operations Command,2017-08-31 From the preface: The 1966 'Human Factors' edition focused on the contemporary threat of Maoist insurgencies, particularly in Southeast Asia, and also drew extensively on World War II resistance movements in Europe. Much of this information is still relevant and has been retained and integrated. In the post-Cold War world, the most important insurgencies tend to be ethnic and religious. Long-simmering conflicts, sometimes with roots in colonial policies, have become prominent; examples include the Liberation Tigers of Tamil Eelam (LTTE) in Sri Lanka, Euskadi Ta Askatasuna (Basque Homeland and Freedom or ETA) in Spain, the Hutu-Tutsi genocides, the Ushtia ⬠lirimtare e Kosov⬠s (Kosovo Liberation Army, or KLA), and the Provisional Irish Republican Army (PIRA). Battle lines in these conflicts are often drawn along ethnic lines, even when land or politics are the immediate issues in contention. The other important new category is extremist religious movements, most prominently Islamic groups, including regional insurgent movements like Hizbollah and Harakat al-Muqawamah al'Isla⬠miyyah (Islamic Resistance Movement, or HAMAS) and global movements like Al Qaeda. These present a different profile of ideology, organizational forms, and psychology than either Cold War Maoists or post-colonial ethnic insurgencies (although the Palestinian cause could be considered a post-colonial issue). Globalization has also changed underground operations in numerous ways. Insurgencies, enabled by low-cost transportation, Internet based communications, and other information technologies, can more easily recruit, communicate, and operate across borders. It is correspondingly much more difficult to contain an insurgency in a region. Global media has led to development of new tactics, in particular new types of terrorism, designed to capture worldwide attention. Compared with what was available in the 1960s, there are orders of magnitude more academic research available relevant to this study's topics. We were able to draw on more recent work in psychology, political science, economics, sociology, organizational studies, and communications studies. Readers of this edition will, over the course of eleven chapters, get a wide exposure to basic concepts from a number of disciplines.

Velázquez Rediscovered Diego Velázquez,Jonathan Brown,Michael Brian Gallagher,2009 The interest generated by the conservation and rehanging of a Velazquez picture *Portrait of a Man*, led the Metropolitan Museum to consider how it might hold an exhibition of Velazquez's oeuvre, to show how his work led to this particular picture being painted, and how it informed his future work.

The Brand Innovation Manifesto John Grant, 2006-05-12 The days of the image brands are over, and 'new marketing' has gone mainstream. The world's biggest companies are pursuing a post-advertising strategy, moving away from advertising and investing in leading edge alternatives. In the vanguard of the revolution has been John Grant, co-founder of the legendary agency St. Luke's and author of The New Marketing Manifesto, whose radical thinking has informed a generation. Now Grant is set to stun the industry again. In The Brand Innovation Manifesto, he redefines the nature of brands, showing why old models and scales no longer work and revealing that the key to success today is impacting people's lifestyles (think Starbucks, iPod and eBay). At the heart of the book is the concept of the 'brand molecule' to which new cultural ideas can be constantly added to keep pace with change. Cataloguing 32 classes of idea, Grant presents a practical approach to mixing and matching them within your own market to develop new brand ideas - and new ideas for existing brands.

Kowalski, 2008-11-21 "This lively collection of essays on the ideas underpinning his films enriches and enlarges our understanding of Spielberg's complex body of work." —Joseph McBride, author of Steven Spielberg: A Biography Few directors have had as powerful an influence on the film industry and the movie-going public as Steven Spielberg. Whatever the subject—dinosaurs, war, extra-terrestrials, slavery, the Holocaust, or terrorism—one clear and consistent touchstone is present in all of Spielberg's films: an interest in the human condition. In movies ranging from Jaws to Schindler's List to Amistad to Jurassic Park, he has brought to life some of the most popular heroes—and most despised villains—of all time. In Steven Spielberg and Philosophy, Dean A. Kowalski and some of the nation's most respected philosophers investigate Spielberg's art to illuminate the nature of humanity. The book explores rich themes such as cinematic realism, fictional belief, terrorism, family ethics, consciousness, virtue and moral character, human rights, and religion in Spielberg's work. Avid moviegoers and deep thinkers will discover plenty to enjoy in this collection.

Emerging pests and vector-borne diseases in Europe Willem Takken, Bart G.J. Knols, 2023-08-28 This is a multi-authored book concerning the perceived threat and recorded increase of emerging pests and vector-borne diseases affecting man and animals in Europe. Historically, Europe suffered from numerous pests and vector-borne diseases, including yellow fever, malaria, plague and typhus. Introduction of hygienic measures, drugs and vector control caused the disappearance of many of these diseases from Europe. In the (sub)tropics, however, many of these diseases still thrive, causing serious health problems for humans and animals. Increased trade, leading to animal and human movement and climate change cause reason to assume that several of these diseases might become re-established or allow 'new' diseases and pests to be introduced in Europe. The recent outbreaks of bluetongue virus in North-western Europe highlights this concern, requiring an effective surveillance systems for the early detection of pests and vector-borne diseases. In 24 chapters this book provides examples of the most likely pests and diseases affecting man and animals in Europe, with emphasis on ecological factors favouring these diseases and methods for prevention and intervention. The authors are recognized experts in specific fields. All chapters are peer reviewed.

Lost and Living (In) Archives: Collectively Shaping New Memories Annet Dekker, 2017-11-21 An archive is a collection of documents and records that is preserved for historical purposes. As such, an archive is considered a site of the past, a place that contains traces of a collective memory of a nation, a people or a group. Digital archives have changed from stable entities into flexible systems, referred to with the term ?Living Archives?. But in which ways has this change affected our relationship to the past, present and future? Will the erased, forgotten and neglected be redeemed, and new memories be allowed? Will the fictional versus factual mode of archiving offer the democracy that the public domain implies, or is it another way for public instruments of power to operate? 'Lost and Living (in) Archives' shows that an archive is not simply a recording, a reflection, or an image of an event, but that it shapes the event itself and thus influences both present and past.
