Clifford Stoll

Eyes of Artillery Edgar F. Raines, 2000

The Horror Film Stephen Prince, 2004-02-09 In this volume, Stephen Prince has collected essays reviewing the history of the horror film and the psychological reasons for its persistent appeal, as well as discussions of the developmental responses of young adult viewers and children to the genre. The book focuses on recent postmodern examples such as *The Blair Witch Project*. In a daring move, the volume also examines Holocaust films in relation to horror. Part One features essays on the silent and classical Hollywood eras. Part Two covers the postWorld War II era and discusses the historical, aesthetic, and psychological characteristics of contemporary horror films. In contrast to horror during the classical Hollywood period, contemporary horror features more graphic and prolonged visualizations of disturbing and horrific imagery, as well as other distinguishing characteristics. Prince's introduction provides an overview of the genre, contextualizing the readings that follow. Stephen Prince is professor of communications at Virginia Tech. He has written many film books, including *Classical Film Violence: Designing and Regulating Brutality in Hollywood Cinema, 1930-1968*, and has edited *Screening Violence*, also in the *Depth of Field Series*.

Bricks, Sand and Marble Robert P. Grathwol, Donita M. Moorhus, 2010-04 Includes full color maps and illustrations throughout. Center of Military History publication CMH Pub 45-2-1. U.S. Army in the Cold War series. Traces the activities of American military engineers from the reconstruction that began in Greece after World War II through the construction of air bases in North Africa, the massive building program in Saudi Arabia, and support for the liberation of Kuwait in 1991. The history provides a background of the present role and position of the United States in that vital region.

CUCKOO'S EGG Clifford Stoll, 2012-05-23 Before the Internet became widely known as a global tool for terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is a computer-age detective story, instantly fascinating [and] astonishingly gripping (Smithsonian). Cliff Stoll was an astronomer turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The hacker's code name was Hunter—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting operation that finally gained the attention of the CIA . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.

Export Pioneers in Latin America Charles F. Sabel, 2012 Why do some export activities succeed while others fail? Here, research teams analyze export endeavors in Latin American countries to learn how export pioneers are born and jump-start a process leading to economic transformation. Case studies range from blueberries in Argentina and flowers in Colombia to aircraft in Brazil and software in Uruguay.

Pentagon 9/11 Alfred Goldberg, 2007-09-05 The most comprehensive account to date of the 9/11 attack on the Pentagon and aftermath, this volume includes unprecedented details on the impact on the Pentagon building and personnel and the scope of the rescue, recovery, and caregiving effort. It features 32 pages of photographs and more than a dozen diagrams and illustrations not previously available.

Reel Time Robert Morris Seiler, Tamara Palmer Seiler, 2013 In this authoritative work, Seiler and Seiler argues that the establishment and development of moviegoing and movie exhibition in Prairie Canada is best understood in the context of changing late-nineteenth-century and early-twentieth-century social, economic, and technological developments. From the first entrepreneurs who attempted to lure customers in to movie exhibition halls, to the digital revolution and its impact on

moviegoing, *Reel Time* highlights the pivotal role of amusement venues in shaping the leisure activities of working- and middle-class people across North America. As marketing efforts, the lavish interiors of the movie palace and the romantic view of the local movie theatre concealed a competitive environment in which producers, exhibitors, and distributors tried to monopolize the industry and drive their rivals out of business. The pitched battles and power struggles between national movie theatre chains took place at the same time that movie exhibitors launched campaigns to reassure moviegoers that theatres were no longer the unclean and immoral places of amusement of yesteryear. Under the leadership of impresarios, the movie theatre rose up from these attacks to become an important social and cultural centre - one deemed suitable for women and children. An innovative examination of moviegoing as a social practice and movie exhibition as a commercial enterprise, *Reel Time* depicts how the industry shaped the development of the Canadian Prairie West and propelled the region into the modern era. Robert M. Seiler is associate professor emeritus in communication and culture at the University of Calgary. Tamara P. Seiler is professor emeritus of Canadian studies at the University of Calgary. *Reel Time* is their second joint publication.

Seeing Like a State James C. Scott, 2020-03-17 "One of the most profound and illuminating studies of this century to have been published in recent decades."—John Gray, *New York Times Book Review* Hailed as "a magisterial critique of top-down social planning" by the *New York Times*, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. "Beautifully written, this book calls into sharp relief the nature of the world we now inhabit."—*New Yorker* "A tour de force."—Charles Tilly, Columbia University

The Biology of Chameleons Krystal A. Tolley, Anthony Herrel, 2013-11-16 They change color depending on their mood. They possess uniquely adapted hands and feet distinct from other tetrapods. They feature independently movable eyes. This comprehensive volume delves into these fascinating details and thorough research about one of the most charismatic families of reptiles—Chameleontidae. Written for professional herpetologists, scholars, researchers, and students, this book takes readers on a voyage across time to discover everything that is known about chameleon biology: anatomy, physiology, adaptations, ecology, behavior, biogeography, phylogeny, classification, and conservation. A description of the natural history of chameleons is given, along with the fossil record and typical characteristics of each genus. The state of chameleons in the modern world is also depicted, complete with new information on the most serious threats to these remarkable reptiles.

NATO's Air War for Kosovo Benjamin S. Lambeth, 2001-11-16 This book offers a thorough appraisal of Operation Allied Force, NATO's 78-day air war to compel the president of Yugoslavia, Slobodan Milosevic, to end his campaign of ethnic cleansing in Kosovo. The author sheds light both on the operation's strengths and on its most salient weaknesses. He outlines the key highlights of the air war and examines the various factors that interacted to induce Milosevic to capitulate when he did. He then explores air power's most critical accomplishments in Operation Allied Force as well as the problems that hindered the operation both in its planning and in its execution. Finally, he assesses Operation Allied Force from a political and strategic perspective, calling attention to those issues that are likely to have the greatest bearing on future military policymaking. The book concludes that the air war, although by no means the only factor responsible for the allies' victory, certainly set the stage for Milosevic's surrender by making it clear that he had little to gain by holding out. It concludes that in the end, Operation Allied Force's most noteworthy distinction may lie in the fact that the allies prevailed despite the myriad impediments they faced.

Fingerprints and Other Ridge Skin Impressions Christophe Champod, Chris J.

Lennard, Pierre Margot, Milutin Stoilovic, 2017-12-19 Since its publication, the first edition of *Fingerprints and Other Ridge Skin Impressions* has become a classic in the field. This second edition is completely updated, focusing on the latest technology and techniques—including current detection procedures, applicable processing and analysis methods—all while incorporating the expansive growth of literature on the topic since the publication of the original edition. Forensic science has been challenged in recent years as a result of errors, courts and other scientists contesting verdicts, and changes of a fundamental nature related to previous claims of infallibility and absolute individualization. As such, these factors represent a fundamental change in the way training, identifying, and reporting should be conducted. This book addresses these questions with a clear viewpoint as to where the profession—and ridge skin identification in particular—must go and what efforts and research will help develop the field over the next several years. The second edition introduces several new topics, including Discussion of ACE-V and research results from ACE-V studies Computerized marking systems to help examiners produce reports New probabilistic models and decision theories about ridge skin evidence interpretation, introducing Bayesnet tools Fundamental understanding of ridge mark detection techniques, with the introduction of new aspects such as nanotechnology, immunology and hyperspectral imaging Overview of reagent preparation and application Chapters cover all aspects of the subject, including the formation of friction ridges on the skin, the deposition of latent marks, ridge skin mark identification, the detection and enhancement of such marks, as well the recording of fingerprint evidence. The book serves as an essential reference for practitioners working in the field of fingermark detection and identification, as well as legal and police professionals and anyone studying forensic science with a view to understanding current thoughts and challenges in dactyloscopy.

Bio-Inspired Innovation and National Security National Defense University, 2010-10 Despite the vital importance of the emerging area of biotechnology and its role in defense planning and policymaking, no definitive book has been written on the topic for the defense policymaker, the military student, and the private-sector bioscientist interested in the emerging opportunities market of national security. This edited volume is intended to help close this gap and provide the necessary backdrop for thinking strategically about biology in defense planning and policymaking. This volume is about applications of the biological sciences, here called biologically inspired innovations, to the military. Rather than treating biology as a series of threats to be dealt with, such innovations generally approach the biological sciences as a set of opportunities for the military to gain strategic advantage over adversaries. These opportunities range from looking at everything from genes to brains, from enhancing human performance to creating renewable energy, from sensing the environment around us to harnessing its power.

Geospatial Thinking Marco Painho, Maribel Yasmina Santos, Hardy Pundt, 2010-07-20 For the fourth consecutive year, the Association of Geographic Information Laboratories for Europe (AGILE) promoted the edition of a book with the collection of the scientific papers that were submitted as full-papers to the AGILE annual international conference. Those papers went through a competitive review process. The 13 AGILE conference call for full-papers of original and unpublished fundamental scientific research resulted in 54 submissions, of which 21 were accepted for publication in this volume (acceptance rate of 39%). Published in the Springer Lecture Notes in Geoinformation and Cartography, this book is associated to the 13 AGILE Conference on Geographic Information Science, held in 2010 in Guimarães, Portugal, under the title “Geospatial Thinking”. The efficient use of geospatial information and related technologies assumes the

knowledge of concepts that are fundamental components of Geospatial Thinking, which is built on reasoning processes, spatial conc- tualizations, and representation methods. Geospatial Thinking is associated with a set of cognitive skills consisting of several forms of knowledge and cognitive operators used to transform, combine or, in any other way, act on that same knowledge. The scientific papers published in this volume cover an important set of topics within Geoinformation Science, including: Representation and Visualisation of Geographic Phenomena; Spatiotemporal Data Analysis; Geo-Collaboration, Participation, and Decision Support; Semantics of Geoinformation and Knowledge Discovery; Spatiotemporal Modelling and Reasoning; and Web Services, Geospatial Systems and Real-time Appli- tions.

Certain Victory Robert H. Scales,1998-02-27 The official U.S. Army account of Army performance in the Gulf War, *Certain Victory* was originally published by the Office of the Chief of Staff, U.S. Army, in 1993. Brig. Gen. Scales, who headed the Army's Desert Storm Study Project, offers a highly readable and abundantly illustrated chronicle.

Babes in Tomorrowland Nicholas Sammond,2005-07-20 Linking Margaret Mead to the Mickey Mouse Club and behaviorism to Bambi, Nicholas Sammond traces a path back to the early-twentieth-century sources of “the normal American child.” He locates the origins of this hypothetical child in the interplay between developmental science and popular media. In the process, he shows that the relationship between the media and the child has long been much more symbiotic than arguments that the child is irrevocably shaped by the media it consumes would lead one to believe. Focusing on the products of the Walt Disney company, Sammond demonstrates that without a vision of a normal American child and the belief that movies and television either helped or hindered its development, Disney might never have found its market niche as the paragon of family entertainment. At the same time, without media producers such as Disney, representations of the ideal child would not have circulated as freely in American popular culture. In vivid detail, Sammond describes how the latest thinking about human development was translated into the practice of child-rearing and how magazines and parenting manuals characterized the child as the crucible of an ideal American culture. He chronicles how Walt Disney Productions’ greatest creation—the image of Walt Disney himself—was made to embody evolving ideas of what was best for the child and for society. Bringing popular child-rearing manuals, periodicals, advertisements, and mainstream sociological texts together with the films, tv programs, ancillary products, and public relations materials of Walt Disney Productions, *Babes in Tomorrowland* reveals a child that was as much the necessary precursor of popular media as the victim of its excesses.
