How to Win at Online Roulette Samuel Blankson,2006

Roulette Edwin Silberstang,1980

Roulette Odds and Profits Catalin Barboianu,2008 Continuing his series of books on the mathematics of gambling, the author shows how a simple-rule game such as roulette is suited to a complex mathematical model whose applications generate improved betting systems that take into account a player's personal playing criteria. The book is both practical and theoretical, but is mainly devoted to the application of theory. About two-thirds of the content is lists of categories and sub-categories of improved betting systems, along with all the parameters that might stand as the main objective criteria in a personal strategy - odds, profits and losses. The work contains new and original material not published before. The mathematical chapter describes complex bets, the profit function, the equivalence between bets and all their properties. All theoretical results are accompanied by suggestive concrete examples and can be followed by anyone with a minimal mathematical background because they involve only basic algebraic skills and set theory basics. The reader may also choose to skip the math and go directly to the sections containing applications, where he or she can pick desired numerical results from tables. The book offers no new so-called winning strategies, although it discusses them from a mathematical point of view. It does, however, offer improved betting systems and helps to organize a player's choices in roulette betting, according to mathematical facts and personal strategies. It is a must-have roulette handbook to be studied before placing your bets on the turn of either a European or American roulette wheel.

Thirteen Against the Bank Norman Leigh,2006 In the summer of 1966 Norman Leigh took a team to the Casino Municipal in Nice with the express intention of systematically winning large sums of money at roulette. Two weeks later the team was banned from every casino in France. Not for cheating, or rowdy behaviour - but for winning, methodically and consistently. An absolute classic detailing the events leading up to - and, most importantly, the system that allowed this to happen - an event held as impossible by all expert opinion - breaking the bank at roulette.

The Roulette Supernova System (RSS15) Stephen Tabone,2020-01-22 The Roulette Supernova System (RSS15) / Flat Betting 15 Numbers into Profit - For use on European or American Roulette Wheels / The automatized skill of The Roulette Supernova System RSS15 is capable of outperforming the cleverest of computer programmes and the seasoned professional roulette bettor. It is the ultimate roulette predicting system. For use on European or American Roulette Wheels. / I am very excited to write about my new Roulette System. If you are looking for a roulette system that actually works, i.e. one that is able to make a profit during a Roulette session (certain amount of games/spins) most of the time, then look no further. This is it! The Roulette Supernova System (RSS15) works on single, double and triple zero 'live' wheels. When I write live, I mean human dealer-initiated games that are truly random and where games are conducted in regulated casinos, not online, non-random

algorithms or manipulated air wheels. After developing and testing RSS15, I discovered an anomaly. Now, when I observe live roulette wheels in casinos, I began to see roulette as all very easy and predictable. In using RSS15, I now consider a wheel as being small and the games in motion not so complex in terms of being able to generate profits. For more than 20 years I have studied bet selection options on the table layout in relation to previous outcomes. I have observed sequences of outcomes and considered the probabilities of one and more numbers appearing in any one session of play pertaining to a limited number of games. I have analysed many hundreds of thousands of live and random computer-generated outcomes. I have played and watched countless players bet in various casinos, considering why we chose the number/s we do and on what basis we believe those number/s have a chance of occurring moreover in most instances before the dealer has even spun the ball. No doubt you would have realized too that Roulette is a hard game to beat. I thought so too until I started to look at what drives the game. And by this, I mean the dealer, ball, wheel relationship. You see most people who play Roulette focus on their numbers, their lucky numbers, or where the dolly marker is placed on the table betting layout from spin to spin or go against or going with streaks of even chances or any of the 2-to-1 pay-out betting option odds. On the whole players are struggling to maintain not only a profitable advantage but are fighting to keep their bankrolls alive. It is like trying to keep a patient alive on life support while the vampire dealers, the casino bosses and demon house edge conspire to suck the blood from the poor souls. There are two main elements to winning when playing Roulette. The first is knowing when to stop and the second is knowing how to get to the profitable side of stopping. To know how to achieve both in order to win as an Advantage Player and Pro Roulette player, you need a proven Roulette System that will deliver. One that is able to hold its own on 'any live Roulette wheel' and you will need to learn when you should take profits and end a session and why this is important. I cover all these aspects in this book as I explain what my roulette system is, how and why it works and how to apply it in practice. Contents: Introduction to, The Roulette Supernova System (RSS15) Up and Down Waves Why Flat Betting for RSS15? Why RSS15 Works Why 15 Numbers? Live Wheels vs Computer or Air Wheels for Testing Outcomes How to Play RSS15 in Practice and why it works Session Winning Target How Much Profit to aim for Session Stop Loss Pros and cons of RSS15 Tweaking RSS15 End Statement

The European Roulette Book Kimo Li, 2007 The European Roulette Book: Innovative Strategies for the Single Zero Roulette Wheel contains roulette information which was converted from Kimo Li's first book, The Roulette Formula: How to Predict the Exact Number, a publication about the American double zero roulette wheel. The European edition depicts a revolutionary map of the European roulette wheel head called the Global Pie. • The Global Pie Method is an innovative system for memorizing the numbers on the European roulette wheel head, used to track ball movement without looking at the roulette wheel head. The roulette table layout reveals ingenious layout strategies using six-pack concepts and Francois and Louis Blanc's common sense approach for determining the number sequence of the roulette wheel head. • The Global Pie Method offers a universal language and lingo. Terms like the Nuking, Bow Tie-ing, and Doing a Hemi all describe specific ball movements. Other terms define multiple Global Pie strategies: Pendulum, Arrowheads and Boomerangs, Four-Leaf Clover, Clover XXX, and Numbered Partners. • These Global Pie strategies rely on innovative section characteristics to enhance betting strategies and limit the amount wagered to maximize optimum return. • The Global Star System is an independent system designed to track numbers evenly throughout the roulette wheel head. Several Global Star strategies emerge as a result of combining individual stars together: Helicopter, Numbered Partners, and Pinwheels. • When combined, the Global Pie Method and the Global Star System, produces a strategy called the Eclipse. The Eclipse is designed to track specific numbers that are due to come in. More importantly, when a Global Pie merges with a Global Star the exact number is exposed.
