Tuesday Takes Me There Luis Carlos Montalván,2016-06-14 From New York's Staten Island Ferry to a double-decker bus in Washington, DC, a delightful service dog, named Tuesday, narrates this fun and exciting journey — with his disabled veteran partner — to a very special place. Tuesday and Luis, an Iraq War veteran, must travel by boat, bus, train, horse, pedicab and more as they race from New York City to the countryside outside the nation's capitol for an important event. Along the way, they see many famous sites, share hilarious and touching adventures, and show young readers (along with their teachers and parents) how trained service dogs help people with disabilities. Full of beautiful photos of this lovable Golden Retriever and his best friend, Tuesday Takes Me There continues the bestselling true story of a wounded veteran and the dog that saved him.

Sounding Sensory Profiles in the Ancient Near East Annette Schellenberg,Thomas Krüger,2019 For several decades sociologists and cultural anthropologists have intensively researched the role of the senses in a variety of cultures, and their studies reveal how different cultures understand and evaluate the five or more senses in unique ways. In this collection of eighteen essays, biblical and ancient Near Eastern scholars apply the questions and methods raised by cultural anthropologists to Israel, Mesopotamia, and Egypt. Experts offer insights into the meaning of the senses in ancient texts and images, examining the classical senses (seeing, hearing, touching, smelling, tasting) as well as other senses (such as kinesthesia and the sense of balance) and sense-related issues (such as disgust, sensory imagination, and disabilities).--

Global Status Report on Road Safety 2018 World Health Organization,2019-01-10 The Global status report on road safety 2018 launched by WHO in December 2018 highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years.The burden is disproportionately borne by pedestrians cyclists and motorcyclists in particular those living in developing countries. The report suggests that the price paid for mobility is too high especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

Local Self-Government and the Right to the City Warren Magnusson,2015-06-01 Despite decades of talk about globalization, democracy still depends on local self-government. In Local Self-Government and the Right to the City, Warren Magnusson argues that it is the principle behind claims to personal autonomy, community control, and national self-determination, and holds the promise of more peaceful politics. Unfortunately, state-centred thinking has obscured understanding of what local self-government can mean and hindered efforts to make good on what activists have called the right to the city. In this collection of essays, Magnusson reflects on his own efforts to make sense of what local self-government can actually mean, using the old ideal of the town meeting as a touchstone. Why cannot communities govern themselves? Why fear direct democracy? As he suggests, putting more trust in the proliferating practices of government and self-government will actually make cities work better, and enable us to see how to localize democracy appropriately. He shows that doing so will require citizens and governments to come to terms with the multiplicity, indeterminacy, and uncertainty implicit in politics and steer clear of sovereign solutions. The culmination of a life’s work by Canada’s leading political theorist in the field, Local Self-Government and the Right to the City ranges across topics such as local government, social movements, constitutional law, urban political economy, and democratic theory.

Highway-rail Grade Crossing Surfaces Hoy A. Richards,1998 This synthesis will be of interest to state and local highway personnel who are responsible for the design, construction, and maintenance of road surfaces and to railroad personnel with similar responsibilities associated with highway-rail grade crossings. It will also be of interest to manufacturers and suppliers of pavement and track materials for crossings. It presents information on the current practices related to highway-rail grade crossing surfaces, including the design and selection of crossing surface materials. This report of the Transportation Research Board describes the various types of highway- rail crossing surfaces, and the issues related to design, operation, and maintenance. Design elements include intersection geometry; drainage; special users, such as bicyclists; and descriptions of failures and their causes. Information is presented on crossing material selection factors, including life-cycle costs and on state practices in selection. Funding issues are also discussed.

Pyrapoint Don E. Hall,2000-01-01 I SUBMIT TO YOU THAT THE PYRAPOINT SYSTEM IS THE PRINCIPLE WHICH W.D. GANN USED. We can prove it, I feel. But if you will accept our point, we intend to spend our time with “hands-on” proof so that WE CAN LEARN THE TRUE AND FULL POTENTIAL OF THE SYSTEM. THIS IS WHY WE GO TO A SEMINAR AND WHY WE STUDY THIS MANUAL. Incidentally, we should have no copyright infringements because, to our knowledge and research, Mr. Gann never taught this in any of his seminars. I had the privilege to personally know, for some seven years, Gann's assistant, Mr. Renato Alghini. “Reno” was with Gann for six years, actually sharing close trading desks. Reno confirmed the extremely private personality of his friend, shown in most of Gann's writings and seminars. Reno passed away a few years ago. However, during the author's years of acquaintance with him, he shared a few facts that made the direction of our efforts truly appear validated. One of the confirmation factors seemed especially worthwhile in the revelation that Gann carried a small paper in hand when in the “pit” for his most successfully recorded trades. This paper, Reno related, was a miniature Pythagorean Cube. One more reason to believe that we had to unravel this mystic marvel -- and that we were on

the right track for trading understanding. Mr. Gann died in 1956. It is significant to note that a favorite statement of Gann serves us well when we state that we believe that EVERY TOP AND EVERY BOTTOM in the markets have CALCULABLE counterpart -- a formula for projections and targets for both PRICE and for TIME. His quotes included that of the noted mathematician Faraday. Mr. Gann said, “If we wish to avert failure in speculation, we must deal with causes. Everything in existence is based on exact proportion and perfect relationship. There is no chance in nature, because mathematical principles of the highest order lie at the foundation of all things. Faraday said. There is nothing in the Universe but mathematical points of force.
