Theodore Kaufman

Ancient Board Games Irving Finkel, 1999 Here are four board games -- the Royal Game of Ur; Mehen, the Game of the Snake; Hounds and Jackals; and the Egyptian Game of Senet -- which were popular in the days of the pharaohs in ancient Egypt and in nearby countries from about 5,000 years ago, chosen and recreated by Dr. Irving Finkel of the British Museum. Everything you need to play them is here: the playing boards recreated in sumptuous colors, playing pieces, and full instructions including variations and other possibilities you may like to try.

Ritual Catherine Bell, 2009-12-29 From handshakes and toasts to chant and genuflection, ritual pervades our social interactions and religious practices. Still, few of us could identify all of our daily and festal ritual behaviors, much less explain them to an outsider. Similarly, because of the variety of activities that qualify as ritual and their many contradictory yet, in many ways, equally legitimate interpretations, ritual seems to elude any systematic historical and comparative scrutiny. In this book, Catherine Bell offers a practical introduction to ritual practice and its study; she surveys the most influential theories of religion and ritual, the major categories of ritual activity, and the key debates that have shaped our understanding of ritualism. Bell refuses to nail down ritual with any one definition or understanding. Instead, her purpose is to reveal how definitions emerge and evolve and to help us become more familiar with the interplay of tradition, exigency, and self-expression that

goes into constructing this complex social medium.

Aspects of Urbanization in China Gregory Bracken, 2012 China's opkomst als wereldmacht is een van de ingrijpendste gebeurtenissen van deze tijd. Honderden miljoenen mensen zijn de armoede ontvlucht dankzij de snelle industrialisatie van het land. De wonderbaarlijke economische groei van China heeft zijn nadelen, iets wat vaak het meest pijnlijk duidelijk wordt in de steden. Deze studie is geschreven door wetenschappers uit verschillende disciplines, waaronder architectuur, stedenbouw, sociale wetenschappen, aardrijkskunde en antropologie. Een deel van de auteurs behandelt de mondiale ambities van de steden, terwijl andere hun culturele en architecturale uitingen onderzoeken.

Supernatural America Robert Cozzolino, 2021-05-03 America is haunted. Ghosts from its violent history--the genocide of Indigenous peoples, slavery, the threat of nuclear annihilation, and traumatic wars--are an inescapable and unsettled part of the nation's heritage. Not merely in the realm of metaphor but present and tangible, urgently calling for contact, these otherworldly visitors have been central to our national identity. Through times of mourning and trauma, artists have been integral to visualizing ghosts, whether national or personal, and in doing so have embraced the uncanny and the inexplicable. This stunning catalog, accompanying the first major exhibition to assess the spectral in American art, explores the numerous ways American artists have made sense of their own experiences of the paranormal and the supernatural, developing a rich

visual culture of the intangible. □Featuring artists from James McNeill Whistler and Kerry James Marshall to artist/mediums who made images with spirits during séances, this catalog covers more than two hundred years of the supernatural in American art. Here we find works that explore haunting, UFO sightings, and a broad range of experiential responses to other worldly contact.

Imperial William T. Vollmann, 2009-07-30 From the author of *Europe Central*, winner of the National Book Award, a journalistic tour de force along the Mexican-American border – a finalist for the National Book Critics Circle Award For generations of migrant workers, Imperial Country has held the promise of paradise and the reality of hell. It sprawls across a stirring accidental sea, across the deserts, date groves and labor camps of Southeastern California, right across the border into Mexico. In this eye-opening book, William T. Vollmann takes us deep into the heart of this haunted region, exploring polluted rivers and guarded factories and talking with everyone from Mexican migrant workers to border patrolmen. Teeming with patterns, facts, stories, people and hope, this is an epic study of an emblematic region.

Bible Matrix Michael Bull, 2010-06-02 Ever wish someone could give you a big handle on the entire Bible without years of study? Well, this book not only promises to give you that big handle—it will deliver on the promise. You should be asking, how is this possible? The Bible is one story told over and over again, with many variations on the same

theme. This structure is the Bible's DNA. This basic seven-point pattern is the heartbeat of the Creation. It is the cycle of a human day and a human life. It is the pattern of the Tabernacle. It is the process of agriculture. It undergirds the speeches and Laws of God. It orders the rise and fall of nations and empires. It is also the structure of our worship. It is the rhythm of Christ, and it will open the Bible for you like never before.

Made to Be Seen Marcus Banks, Jay Ruby, 2012-08-01
Made to be Seen brings together leading scholars of visual anthropology to examine the historical development of this multifaceted and growing field. Expanding the definition of visual anthropology beyond more limited notions, the contributors to Made to be Seen reflect on the role of the visual in all areas of life. Different essays critically examine a range of topics: art, dress and body adornment, photography, the built environment, digital forms of visual anthropology, indigenous media, the body as a cultural phenomenon, the relationship between experimental and ethnographic film, and more. The first attempt to present a comprehensive overview of the many aspects of an anthropological approach to the study of visual and pictorial culture, Made to be Seen will be the standard reference on the subject for years to come. Students and scholars in anthropology, sociology, visual studies, and cultural studies will greatly benefit from this pioneering look at the way the visual is inextricably threaded through most, if not all, areas of human activity.

The Myth of Shangri-La Peter Bishop, 1989-01-01
Bishop's engrossing and readable account provides us with a fascinating picture of European myths concerning the Land of the Snows and of the role

these myths played in shaping perceptions of the Orient. Bishop's riveting portrait of European conceptions is an important and exceptionally well written contribution to an understanding of Western attitudes toward Tibet and all of East Asia.--Morris Rossabi, author of Khubilai Khan: His Life and Times

Eurogames Stewart Woods, 2012-08-16 While board games can appear almost primitive in the digital age, eurogames--also known as German-style board games--have increased in popularity nearly concurrently with the rise of video games. Eurogames have simple rules and short playing times and emphasize strategy over luck and conflict. This book examines the form of eurogames, the hobbyist culture that surrounds them, and the way that hobbyists experience the play of such games. It chronicles the evolution of tabletop hobby gaming and explores why hobbyists play them, how players balance competitive play with the demands of an intimate social gathering, and to what extent the social context of the game encounter shapes the playing experience. Combining history, cultural studies, leisure studies, ludology, and play theory, this innovative work highlights a popular alternative trend in the gaming community.
