Memory of Empires: Ancient Egypt - Ancient Greece - Persian Empire - Roman Empire - Byzantine Empire Elie Faure,Victoria Charles,2020-02-27 Empires are born. Empires reach their peak. Empires die, but leave their mark through their architecture and artistic achievements. From these specks of dust of memory, 40 centuries of history shape our world of the 21st century. The power of ancient Egypt was followed by the influence of Greece, which brought the Persian East together in the conquests of Alexander the Great. After Cleopatra, the last queen of Egypt, Rome became the power that ruled part of the world, finally dying out in the fall of the Byzantine Empire on 29 May 1453. The authors take the reader on a journey through time and space and highlight the succession of these civilisations that rubbed shoulders, even fought against each other and led us towards a more enlightened humanity.

Advancement in Ancient Civilizations Harald Haarmann,2020-09-18 Traditional scholarship on how ancient civilizations emerged is outmoded and new insights call for revision. According to the well-established paradigm, Mesopotamia is considered the cradle of civilization. Following the cliché of ex oriente lux (light from the East) all major achievements of humankind spread from the Middle East. Modern archaeology, cultural science and historical linguistics indicate civilizations did not originate from a single prototype. Several models produced divergent patterns of advanced culture, developing both hierarchical and egalitarian societies. This study outlines a panorama of ancient civilizations, including the still little-known Danube civilization, now identified as the oldest advanced culture in Europe. In a comparative view, a new paradigm of research and a new cultural chronology of civilizations in the Old and New Worlds emerges, with climate change shown to be a continual influence on human lifeways.

Ancient Empires Eric H. Cline, Mark W. Graham, 2011-06-27 Ancient Empires is a relatively brief yet comprehensive and even-handed overview of the ancient Near East, the Mediterranean, and Europe, including the Greco-Roman world, Late Antiquity, and the early Muslim period. Taking a focused and thematic approach, it aims to provoke a discussion of an explicit set of themes supplemented by the reading of ancient sources. By focusing on empires and imperialism as well as modes of response and resistance, it is relevant to current discussions about order, justice, and freedom. The book concludes that some of the ancient world's most enduring ideas, value systems, and institutions were formulated by peoples who were resisting the great empires. It analyzes the central, if problematic, connection between political and ideological power in both empire formation and resistance. The intricate interrelations among ideological, economic, military, and political power are explored for every empire and resisting group.
