Typeset in the Future Dave Addey, 2018-12-11 A designer's deep dive into seven science fiction films, filled with "gloriously esoteric nerdery [and] observations as witty as they are keen" (Wired). In Typeset in the Future, blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into 2001: A Space Odyssey, Star Trek: The Motion Picture, Alien, Blade Runner, Total Recall, WALL·E, and Moon, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera, plus original interviews with Mike Okuda (Star Trek), Paul Verhoeven (Total Recall), and Ralph Eggleston and Craig Foster (Pixar). Typeset in the Future is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.

Sachs-Villatte encyklopädisches französisch-deutsches und deutsch-französisches Wörterbuch: Deutsch-franz Karl Sachs, 1856

Laughing Atoms, Laughing Matter T.H.M. Gellar-Goad, 2020-03-02 The aim of this study is to track De Rerum Natura along two paths of satire. One is the broad boulevard of satiric literature from the beginnings of Greek poetry to the plays, essays, and broadcast media of the modern world. The other is the narrower lane of Roman verse satire, satura, whose canon begins in the Middle Republic with Ennius and Lucilius and closes with Juvenal, an author of the Flavian era. The first main portion of this book (chapters 2-3) focuses on Lucretius and Roman satura, while the following chapters broaden the scope to satiric elements of Lucretius more generally, but still with plenty of reference to the poets of Roman satura as satirists par excellence. By examining how Lucretius' poem employs the tools, techniques, and tactics of satire-by evaluating how and where in De Rerum Natura the speaker functions as a satirist-we gain, I argue, a fuller, richer understanding of how the poem works and how its poetry interacts with its purported philosophical program. Attention to the role of De Rerum Natura in the more specific tradition of Roman verse satire demonstrates that Lucretius' poem stands as a detour on the genre's highway, a swerve in the trajectory of satura. The numerous satiric passages and frequently satiric narrator of De Rerum Natura draw on earlier Roman satire, and in turn the poem influences the later satiric verse of Horace, Persius, and Juvenal. While De Rerum Natura is not in and of itself a member of the Roman genre of satire, it is an important player in the genre's development--

What Is Philosophy? Gilles Deleuze, Félix Guattari, 1996-05-23 Called by many France's foremost philosopher, Gilles Deleuze is one of the leading thinkers in the Western World. His acclaimed works and celebrated collaborations with Félix Guattari have established him as a seminal figure in the fields of literary criticism and philosophy. The long-awaited publication of What Is Philosophy? in English marks the culmination of Deleuze's career. Deleuze and Guattari differentiate between philosophy, science, and the arts, seeing as means of confronting chaos, and challenge the common view that philosophy is an extension of logic. The authors also discuss the similarities and distinctions between creative and philosophical writing. Fresh anecdotes from the history of philosophy illuminate the book, along with engaging discussions of composers, painters, writers, and architects. A milestone in Deleuze's collaboration with Guattari, What Is Philosophy? brings a new perspective to Deleuze's studies of cinema, painting, and music, while setting a brilliant capstone upon his work.

The Calamity Form Anahid Nersessian, 2020 The Romantic period in literature coincided with two of the most significant transformations in modern history: the Industrial Revolution and, with it, the inflection point of the Anthropocene. Literary critics have shown that much of Romantic poetry expresses an uncanny insight into both of these transformations, including the human and ecological costs of what we now call a carbon-based economy. But was art really capable of making sense of the emerging crisis-or of changing the future? In a superbly nuanced work of literary criticism, Anahid Nersessian shows that poets began to disqualify themselves from explaining the train of consequences that industry set in motion. Their form of knowledge-if knowledge it be-was of an order different from science or economics, and could not bear the burden of accounting for environmental

calamity. Romanticism, Nersessian argues, is of the Anthropocene but not about it, and she cautions against investing its poetry with a straightforwardly testimonial power. In doing so, she models an approach to criticism that reads within what Charles Olson calls the shapeful, emphasizing the role of rhetorical figures in fashioning the posture a poem takes on a historical question. While focusing on the Romantics, Nersessian also ranges back to the seventeenth century (e.g., the poetry of Andrew Marvell) and forward to examples of contemporary poetry and conceptual art (e.g., Derek Jarman's poetry, and installations by Agnes Denes and Helen Mirra). Within literary studies, this is a widely anticipated book by one of the most brilliant critics of her generation--

Process-Structure-Properties in Polymer Additive Manufacturing Swee Leong Sing,Wai Yee Yeong,2021-09-01 Additive manufacturing (AM) methods have grown and evolved rapidly in recent years. AM for polymers is an exciting field and has great potential in transformative and translational research in many fields, such as biomedical, aerospace, and even electronics. Current methods for polymer AM include material extrusion, material jetting, vat polymerisation, and powder bed fusion. With the promise of more applications, detailed understanding of AM—from the processability of the feedstock to the relationship between the process–structure–properties of AM parts—has become more critical. More research work is needed in material development to widen the choice of materials for polymer additive manufacturing. Modelling and simulations of the process will allow the prediction of microstructures and mechanical properties of the fabricated parts while complementing the understanding of the physical phenomena that occurs during the AM processes. In this book, state-of-the-art reviews and current research are collated, which focus on the process–structure–properties relationships in polymer additive manufacturing.

Queer in Europe during the Second World War Régis Schlagdenhauffen,2018-09-18 At the height of the Second World War, Switzerland decriminalised homosexuality. At the same time, France chose to introduce a law punishing homosexual relationships in certain circumstances. These two examples illustrate contradictory attitudes adopted by European states towards homosexuals during the Second World War. Going beyond the issue of the persecution of homosexuals and the central role played by Nazi Germany between 1939 and 1945, this book is the first to examine the daily lives of homosexual men and women in wartime. By bringing together European specialists on the subject, it relates a different history, one which was indeed marked by repression but also by enlistment in armies at war and resistance groups, not to mention collaboration. Chapter by chapter, it enables us to better understand why the Second World War was a turning point for gays and lesbians in Europe and why our continent is a leader in the fight against discrimination. For the Council of Europe, this book contributes to two separate programmes, the Passing on the Remembrance of the Holocaust and Prevention of Crimes against Humanity programme and the Promoting Human Rights and Equality for LGBT People programme, within the framework of Committee of Ministers Recommendation CM/Rec(2010)5 on combating discrimination on grounds of sexual orientation or gender identity programme. It also continues work towards acknowledging all of the victims of the Nazi regime. Régis Schlagdenhauffen is a lecturer at the École des hautes études en sciences sociales (EHESS), head of the gender-based social history department, member of the Laboratory of Excellence “Writing a new history of Europe” (LabEx EHNE) and co-author of the Council of Europe pedagogical factsheets for teachers entitled “Victims of Nazism. A mosaic of fates” (2015).

The Joy of Search Daniel M. Russell,2023-06-06 How to be a great online searcher, demonstrated with step-by-step searches for answers to a series of intriguing questions (for example, “Is that plant poisonous?”). We all know how to look up something online by typing words into a search engine. We do this so often that we have made the most famous search engine a verb: we Google it—“Japan population” or “Nobel Peace Prize” or “poison ivy” or whatever we want to know. But knowing how to Google something doesn't make us search experts; there's much more we can do to access the massive collective knowledge available online. In *The Joy of Search*, Daniel Russell shows us how to be great online researchers. We don't have to be computer geeks or a scholar searching out obscure facts; we just need to know some basic methods. Russell demonstrates these methods with step-by-step searches for answers to a series of intriguing questions—from “what is the wrong side of a towel?” to “what is the most likely way you will die?” Along the way, readers will discover essential tools for effective online searches—and learn some fascinating facts and interesting stories. Russell explains how to frame search queries so they will yield information and describes the best ways to use such resources as Google Earth, Google Scholar, Wikipedia, and Wikimedia. He shows when to put search terms in double quotes, how to use the operator (*), why metadata is important, and how to triangulate information from multiple sources. By the end of this engaging journey of discovering, readers will have the definitive answer to why the best online searches involve more than typing a few words into Google.

Leftism: from de Sade and Marx to Hitler and Marcuse Erik von Kuehnelt-Leddihn,1974

Refugee Routes Vanessa Agnew,Kader Konuk,Jane O. Newman,2020-09-30 The displaced are often rendered silent and invisible as they journey in search of refuge. Drawing on historical and contemporary examples from Turkey, the Ottoman Empire, Iraq, Syria, UK, Germany, France, the Balkan Peninsula, US, Canada, Australia, and Kenya, the contributions to this volume draw attention to refugees, asylum seekers, exiles, and forced migrants as individual subjects with memories, hopes, needs, rights, and a prospective place in collective memory. The book's wide-ranging theoretical, literary, artistic, and autobiographical contributions appeal to scholarly and lay readers who share concerns about the fate of the displaced in relation to the emplaced in this age of mass mobility.

Assisted Suicide and the European Convention on Human Rights Stevie Martin,2021-04-13 Locating assisted suicide within the broader medical end-of-life context and drawing on the empirical data available from the increasing number of permissive jurisdictions, this book provides a novel examination of the human rights implications of the prohibition on assisted suicide in England and Wales and beyond. Assisted suicide is a contentious topic and one which has been the subject of judicial and academic debate internationally. The central objective of the book is to approach the question of the ban's compatibility with the European Convention on Human Rights afresh; freed from the constraints of the existing case law and its erroneous approach to the legal issues and selective reliance on empirical data. The book also examines the compatibility of the ban on assisted suicide with rights which have either been erroneously disregarded or not considered by either the domestic courts or the European Court of Human Rights. Having regard to human rights jurisprudence more broadly, including in the context of abortion, the research and analysis undertaken here demonstrates that the ban on assisted suicide violates the rights of a significant number of individuals to life, to freedom from torture or inhuman or degrading treatment and to private life. Such analysis does not depend on a strained or contrived approach to the rights at issue. Rather, the conclusions flow naturally from a coherent, logical application of the established principles governing those rights. While the focus of the book is the Suicide Act 1961, the conclusions reached have implications beyond England and Wales, including for the other devolved jurisdictions and international jurisdictions. Beyond courts and legislators, it will be a valuable resource for students of human rights and medical law, as well as medical and legal practitioners and academics working in human rights and end-of-life care.

Hand and Wrist Injuries In Combat Sports Riccardo Luchetti,Loris Pegoli,Gregory I. Bain,2018-10-17 This well-illustrated book describes the injuries to the hand and wrist that are commonly encountered among participants in combat sports, explaining the mechanisms of injury and offering state of the art guidance on diagnosis and treatment. It covers both injuries characteristic of individual sports, such as kendo, karate, judo, jiu-jitsu, aikido, and mixed martial arts, and pathologies encountered across the full range of combat sports, including boxing, wrestling, and taekwondo. In addition to management, careful attention is paid to rehabilitation following injury and to psychological aspects of recovery from injury. The book is the result of a collaboration with the International Society for Sport Traumatology of the Hand (ISSPORTH) and has been designed to meet the needs of all practitioners who work with combat sports athletes. While especially helpful for surgeons, physicians, therapists, and rehabilitators, it will also be of value to coaches, trainers, and players. The authors are leading international experts in the field who have been involved with international societies and in some cases have personal experience of combat sports at a high level.
