Global Media Discourse David Machin, Theo Van Leeuwen, 2007-05-17 Featuring a wide range of exercises, examples, and images, this textbook provides a practical way of analyzing the discourses of the global media industries. Building on a comprehensive introduction to the history and theory of global media communication, specific case studies of lifestyle and entertainment media are explored with examples from films, global women's magazines, Vietnamese news reporting and computer war games. Finally, this book investigates how global media communication is produced, looking at the formats, languages and images used in creating media materials, both globally and in localized forms. At a time when the

media is becoming increasingly global, often with the same films, news and television programmes shown all over the world; Global Media Discourse provides an accessible, lively introduction into how globalization is changing the language and communicative practices of the media. Integrating a range of approaches, including political economy, discourse analysis and ethnography, this book will be of particular interest to students of media and communication studies, applied linguistics, and (critical) discourse analysis.

Negotiating Marian Apparitions Agnieszka Halemba, 2015-10-01 This book concerns the politics of religion as expressed through apparitions of the Virgin Mary in Dzhublyk in Transcarpathian Ukraine. On the one hand, the analysis provides insights into the present position of Transcarpathia in regional, Ukraine-wide, and European struggles for identity and political belonging. The way in which the apparitions site has been conceived and managed raises questions concerning the fate of religious communities during and after socialism, the significance of national projects for religious organizations, and the politics of religious management in a situation in which local religious commitments are relatively strong and religious organizations are relatively weak. The analysis contributes to the ethnography and history of this particular region and of the post-socialist world in general. On the other hand, the changing status of the apparition site over the years allows investigation of the questions concerning authority, legitimacy, and power in religious organizations, especially in relation to management of religious experiences. The analysis aims at clarification of such concepts as religious institutions, organizations but also religious experiences and is relevant to anthropology, sociology and religious studies. It is argued that the important question in analyses of religious apparitions should not be how an individual experience becomes institutionalized and instrumentalized, but how experience becomes a tool for negotiation and transformation in the religious field. Key word: 1. Mary, Blessed Virgin, Saint--Apparitions and miracles--Ukraine--Zakarpats'ka oblast'. 2. Zakarpats'ka oblast' (Ukraine)--Church history.

Forensis Lawrence Abu Hamdan, Nabil Ahmed, Maayan Amir, Hisham Ashkar, Emily Dische-Becker, Ryan Bishop, 2014 The role of material forensics in articulating new notions of the public truth of political struggle, violent conflict, and climate change are the focus of Forensis, the HKW exhibition catalog based on the theories of Eyal Weizman. - The concept of forensis was developed as a research project by Goldsmiths College, Centre for Research Architecture by theorist Eyal Weizman. The project is the subject of a major exhibition at the Haus der Kulturen der Welt (HKW) and catalog cum theoretical reader presenting the findings and contributions of over 20 influential architects, artists, filmmakers, and academics. Forensis, (Latin for pertaining to the forum) argues for the role of material forensics as central to the interpretation of the ways in which states police and govern their subjects. Forensics engages struggles for justice across frontiers of contemporary conflict through the study of how technology mediates the testimony of material objects such as bones, ruins, toxic substances, etc. In the hopes of unlocking forensics potential as a political practice, the project participants present innovative investigations aimed at producing new kinds of evidence for use by international prosecutorial teams, political organizations, NGOs, and the UN.

E-Business Fundamentals Peter Eckersley, Lisa Harris, Paul Jackson, 2003-05-29 This comprehensive textbook considers all of the key business, management and technical issues of e-Business, examining and explaining how technologies can help organizations in both the public and private sectors conduct business in new ways. After addressing the changing nature of the e-Economy and the impact of the dot.com 'bubble' of the late 1990s, Eckersley, Harris and Jackson go on to analyse key software developments and the impact these have had on organizational practices. They then outline the legal and ethical frameworks of e-Business, and consider how companies use various e-commerce tools to enter new markets. Finally, they trace the progress public sector organizations have made in adopting e-Business practice. This is an accessible, jargon-free and focused

textbook that offers readers both a technical and managerial overview of the issues surrounding e-Business. It uses illustrative cases and discussion questions to help students and managers in organizations not only to familiarize themselves with e-Business but also to equip themselves with the skills to challenge and analyze the changing business environment.

Planet of the Apes Pierre Boulle, 2011-04-13 The original novel that inspired the films! First published more than fifty years ago, Pierre Boulle's chilling novel launched one of the greatest science fiction sagas in motion picture history. In the not-too-distant future, three astronauts land on what appears to be a planet just like Earth, with lush forests, a temperate climate, and breathable air. But while it appears to be a paradise, nothing is what it seems. They soon discover the terrifying truth: On this world humans are savage beasts, and apes rule as their civilized masters. In an ironic novel of nonstop action and breathless intrigue, one man struggles to unlock the secret of a terrifying civilization, all the while wondering: Will he become the savior of the human race, or the final witness to its damnation? In a shocking climax that rivals that of the original movie, Boulle delivers the answer in a masterpiece of adventure, satire, and suspense.

Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence-based pedagogies in higher education, at something a level approaching large-scale impact. By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation, we aim to change the conversation and focus on how we work and learn together – i.e. extending the implementation and knowledge of co-design methods. In this first edition of our Research Topic on Active Learning, we highlight two (of the three) types of publications we wish to promote. First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community. These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research-practitioner partnerships. Second are studies empirically examining the implementations of evidence-based designs in naturalistic settings and under naturalistic conditions. Interestingly, the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as “in-betweens” straddling the two worlds. As a result, these publications represent both the rigours of research and the pragmatism of reflective practice. In forthcoming editions, we will add to this collection a third type of publication -- design profiles. These will present practitioner-developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners, instructional designers and researchers alike. We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner-researcher interactions that promote co-design in pedagogical innovation.

Archigram Simon Sadler,2005-06-24 The first book-length critical and historical account of an ultramodern architectural movement of the 1960s that advocated living equipment instead of buildings. In the 1960s, the architects of Britain's Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes. In drawings inspired by pop art and psychedelia, architecture floated away, tethered by wires, gantries, tubes, and trucks. In Archigram: Architecture without Architecture, Simon Sadler argues that Archigram's sense of fun takes its place beside the other cultural agitants of the 1960s, originating attitudes and techniques that became standard for architects rethinking social space and building technology. The Archigram style was assembled from the Apollo missions, constructivism, biology, manufacturing, electronics, and popular culture, inspiring an architectural movement—High Tech—and influencing the postmodern and deconstructivist trends of the late twentieth century. Although most Archigram projects were at the limits of possibility and remained unbuilt, the six architects at the center of the movement, Warren Chalk, Peter Cook, Dennis Crompton, David Greene, Ron Herron, and Michael Webb, became a focal point for the architectural avant-garde, because they redefined the purpose of architecture. Countering the habitual building practice of setting walls and spaces in place, Archigram architects wanted to provide the equipment for amplified living, and they welcomed any cultural rearrangements that would ensue. Archigram: Architecture without Architecture—the first full-length critical and historical account of the Archigram phenomenon—traces Archigram from its rediscovery of early modernist verve through its courting of students, to its ascent to international notoriety for advocating the disappearance of architecture.
