Dogtripping David Rosenfelt, 2013-07-23 David Rosenfelt's Dogtripping is moving and funny account of a cross-country move from California to Maine, and the beginnings of a dog rescue foundation When mystery writer David Rosenfelt and his family moved from Southern California to Maine, he thought he had prepared for everything. They had mapped the route, brought three GPSs for backup, as well as refrigerators full of food, and stoves and microwaves on which to cook them. But traveling with twenty-five dogs turned out to be a bigger ordeal than he anticipated, despite the RVs, the extra kibble, volunteers (including a few readers), and camping equipment. Rosenfelt recounts the adventure of moving his animal companions across the United States with humor and warmth, and tells the tale of how he and his wife became passionate foster parents for rescue dogs, culminating in the creation of the Tara Foundation and successfully placing several thousand dogs with loving families. An NPR Best Book of 2013

Mutual Rescue Carol Novello, 2019-04-09 A moving and scientific look at the curative powers--both physical and mental--of rescuing a shelter animal, by the president of Humane Society Silicon Valley. MUTUAL RESCUE profiles the transformational impact that shelter pets have on humans, exploring the emotional, physical, and spiritual gifts that rescued animals provide. It explores through anecdote, observation, and scientific research, the complexity and depth of the role that pets play in our lives. Every story in the book brings an unrecognized benefit of adopting homeless animals to the forefront of the rescue conversation. In a nation plagued by illnesses--16 million adults suffer from depression, 29 million have diabetes, 8 million in any given year have PTSD, and nearly 40% are obese--rescue pets can help: 60% of doctors said they prescribe pet adoption and a staggering 97% believe that pet ownership provides health benefits. For people in chronic emotional, physical, or spiritual pain, adopting an animal can transform, and even save, their lives. Each story in the book takes a deep dive into one potent aspect of animal adoption, told through the lens of people's personal experiences with their rescued pets and the science that backs up the results. This book will resonate with readers hungering for stories of healing and redemption.

But she DOES want a gold star from her teacher. Except stars are for good readers, for understanding words, and for saying them out loud—things that Madeline Finn doesn't believe she

can do. Fortunately, Madeline Finn finds a little help when she meets Bonnie, a library dog. Reading out loud to Bonnie isn't so bad, and when Madeline Finn gets stuck, Bonnie doesn't mind. As it turns out, it's fun to read when you're not afraid of making mistakes. Bonnie teaches Madeline Finn that it's okay to go slow—and, most importantly, to keep trying. The Lives and Deaths of Shelter Animals Katja M Guenther, 2020-08-18 "By investigating the . . . connection between the . . . shelter and the community . . . vastly expands . . . notions of intersectionality, democracy, and inclusivity." —Leslie Irvine, *American Journal of Sociology* Monster is an adult pit bull, muscular and grey, who is impounded in a large animal shelter in Los Angeles. Like many other dogs at the shelter, Monster is associated with marginalized humans and assumed to embody certain behaviors because of his breed. And like approximately one million shelter animals each year, Monster will be killed. *The Lives and Deaths of Shelter Animals* takes us inside one of the country's highest-intake animal shelters. Katja M. Guenther witnesses the dramatic variance in the narratives assigned different animals, including Monster, which dictate their chances for survival. She argues that these inequalities are powerfully linked to human ideas about race, class, gender, ability, and species. Guenther deftly explores internal hierarchies, breed discrimination, and importantly, instances of resistance and agency. "Powerful and timely. . . Katja M. Guenther unlocks the shelter door and eloquently explains this complicated and contested multispecies space, as she reflects on issues such as witnessing, vulnerability, advocacy, grievability, compassion, and animal resistance." —Carol J. Adams, author of *The Sexual Politics of Meat* "In this compassionate, incisive ethnography . . . Katja M. Guenther illuminates the entangled injustices that shape human relationships with other animals." —Lori Gruen, author of *Entangled Empathy* "With the perfect balance of intimacy and analytical depth, the author reminds us of how messy things can get when caring and killing become one, or when the value of the animal companion's life is measured by the race, gender, and zip code

of the owner.” —Bénédicte Boisseron, author of *Afro-Dog*

Infectious Disease Management in Animal Shelters Lila Miller, Stephanie Janeczko, Kate F. Hurley, 2021-04-13 Since the publication of the first edition of *Infectious Disease Management in Animal Shelters* in 2009, research and practice in the field of shelter medicine have advanced significantly. This updated second edition of that seminal work provides the most up-to-date and comprehensive guide to preventing, managing, and treating infectious diseases affecting cats, dogs and exotic small companion mammals in animal shelters. Throughout the book, the authors—noted experts on the topic—bridge the gap between medicine (both individual and group) and management. The book is filled with practical strategies that draw on the latest research and evidence-based medicine as well as the authors’ personal experience in the field. While the text highlights strategies for the prevention of illness and mitigation of disease spread, the book also contains practical information on treatment and considerations for adoption. This important text: Offers the only book dedicated to the topic of infectious disease management in shelters Presents guidelines for general management and disease prevention and control in cats and dogs Includes shelter medicine’s core principles of humane population management in the context of supporting shelters’ goals for preserving welfare, saving lives and protecting human health Contains a new chapter on exotic companion mammals Written for shelter veterinarians, managers, and workers, the revised second edition of *Infectious Disease Management in Animal Shelters* is the only book to focus exclusively on infectious diseases in the shelter setting, blending individual animal care with a unique herd health perspective.

Lost and Found Elizabeth Hess, 2000 Elizabeth Hess, a journalist and former art critic, walked into the Columbia Greene Animal Shelter in upstate New York looking for a new dog. Touched by the animals' plight and the dedication of the workers, she began to volunteer at the shelter on a regular basis. In *Lost and Found*, Hess brings you behind the scenes in this thorough examination of the day-to-day workings of the shelter. From the weekly adoption days, when families come to find a new dog or cat, to investigations of animal abuse and a thrilling puppy mill raid, we come to know both the animals and their caretakers on a deeply personal level. With a keen eye for detail and profound emotional insight, Hess dispels common myths about shelter animals and captures the boundless compassion and courage of the people who comfort and defend them, especially during their desperate efforts to find homes for the animals, lest they be put to sleep. A vivid portrait of a world many of us are blissfully unaware of, *Lost and Found* is a must-read for every pet owner (Seattle Times).

Redemption Nathan J. Winograd, 2007 Explains the No Kill movement, tracing the history of animal sheltering and describing what can be done for homeless dogs and cats by shelters without the need to kill them.

Animal Housing and Human-Animal Relations Kristian Bjørkdahl, Tone Druglitrø, 2016-05-12 This book provides an in-depth investigation into the practices of animal housing systems with international contributions from across the humanities and social sciences. By attending to a range of

different sites such as the zoo, the laboratory, the farm and the animal shelter, to name a few, the book explores material technologies from the perspective that these are integrated parts of a larger biopolitical infrastructure and questions how animal housing systems, and the physical infrastructures that surround central human-animal practices, come into being. The contributions in the book show in various ways how physical infrastructures of animal housing are always part of a much broader sociocultural and political infrastructure, where the material reality of housing systems combines with human and animal agents, with politics, and with practices. As such, the book explores what kind of practices and relations develop around the physical structures of animal housing, and by whom, and for whom, they are developed. This innovative collection will be of great interest to student and scholars in animal studies, more than human studies, geography, anthropology, and sociology.

Topics are separated by animal to allow for easy accessibility by professionals who are actively working in the field.
