Drive Daniel H. Pink,2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction-at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Wilma Jean the Worry Machine Julia Cook,2012-01-15 My stomach feels like it's tied up in a knot. My knees lock up, and my face feels hot. You know what I mean? I'm Wilma Jean, The Worry Machine. Anxiety is a subjective sense of worry, apprehension, and/or fear. It is considered to be the number one health problem in America. Although quite common, anxiety disorders in children are often misdiagnosed and overlooked. Everyone feels fear, worry and apprehension from time to time, but when these feelings prevent a person from doing what he/she wants and/or needs to do, anxiety becomes a disability. This fun and humorous book addresses the problem of anxiety in a way that relates to children of all ages. It offers creative strategies for parents and teachers to use that can lessen the severity of anxiety. The goal of the book is to give children the tools needed to feel more in control of their anxiety. For those worries that are not in anyone's control (i.e. the weather) a worry hat is introduced. A fun read for Wilmas of all ages! Includes a note to parents and educators with tips on dealing with an anxious child.

Figure and Force in Animation Aesthetics Ryan Pierson,2019 How can we describe movements in animated films? In Figure and Force in Animation Aesthetics, Ryan Pierson introduces a powerful new method for the study of animation. By looking for figures--arrangements that seem to intuitively hold together--and forces--underlying units of attraction, repulsion, and direction--Pierson reveals startling new possibilities for animation criticism, history, and theory. Drawing on concepts from Gestalt psychology, Pierson offers a wide-ranging comparative study of four animation techniques--soft-edged forms, walk cycles, camera movement, and rotoscoping--as they appear in commercial, artisanal, and avant-garde works. In the process, through close readings of little-analyzed films, Pierson demonstrates that figures and forces make fertile resources for theoretical speculation, unearthing affinities between animation practice and such topics as the philosophy of mathematics, scientific and political revolution, and love. Beginning and ending with the imperative to look closely, Figure and Force in Animation Aesthetics is a performance in seeing the world of motion anew. Keywords: animation, film theory, Gestalt psychology, phenomenology, film-philosophy, modernism--

Yorkshire County Magazine Joseph Horsfall Turner,1893 **Animation in Asia and the Pacific** John A. Lent,2001 Animation has had a global renaissance during the 1990s, and nowhere is this more evident than in Asia. With the exception of China and Japan, most Asian nations are relatively new to this art form. Over the last decade, countries such as Taiwan, South Korea, the Philippines, and Thailand, as well as China, have acted as major offshore production plants for North American and European studios. One of the spurs for this increase in activity has been the global growth of terrestrial, cable, satellite, and video systems, all demanding large menus of programming, including animation. A second spur has been the exceptional popularity that Japanese animé has enjoyed across Asia, Europe, and the United States. Despite these developments, there has not been corresponding growth of a serious literature covering industrial and aesthetic issues about Asian animation, and the small amount of work that has been produced has not been published in English. *Animation in Asia and the Pacific* provides the first continent-wide analysis, delving into issues of production, distribution, exhibition, aesthetics, and regulation in this burgeoning field. *Animation in Asia and the Pacific* also offers vignettes of the fascinating experiences of a group of animation pioneers. The historical and contemporary perspectives derive from interviews, textual analysis, archival research, and participation/observation data.
