*September 11 in Popular Culture* Sara E. Quay, Amy M. Damico, 2010-09-14 This book offers an exploration of the comprehensive impact of the events of September 11, 2001, on every aspect of American culture and society. On Thanksgiving day after September 11, 2001, comic strip creators directed readers to donate money in their artwork, generating \$50,000 in relief funds. The world's largest radio network, Clear Channel, sent a memo to all of its affiliated stations recommending 150 songs that should be eliminated from airplay because of assumptions that their lyrics would be perceived as offensive in light of the events of 9/11. On the first anniversary of September 11th, choirs around the world performed Mozart's Requiem at 8:46 am in each time zone, the time of the first attack on the World Trade Center. These examples are just three of the ways the world—but especially the United States—responded to the events of September 11, 2001. Each chapter in this book contains a chronological overview of the sea of changes in everyday life, literature, entertainment, news and media, and visual culture after September 11. Shorter essays focus on specific books, TV shows, songs, and films.

*The Routledge History of Disease* Mark Jackson, 2016-08-05 The Routledge History of Disease draws on innovative scholarship in the history of medicine to explore the challenges involved in writing about health and disease throughout the past and across the globe, presenting a varied range of case studies and perspectives on the patterns, technologies and narratives of disease that can be identified in the past and that continue to influence our present. Organized thematically, chapters examine particular forms and conceptualizations of disease, covering subjects from leprosy in medieval Europe and cancer screening practices in twentieth-century USA to the ayurvedic tradition in ancient India and the pioneering studies of mental illness that took place in nineteenth-century Paris, as well as discussing the various sources and methods that can be used to understand the social and cultural contexts of disease. The History of Chinese Animation II Lijun Sun, 2020-05-27 China has been one of the first countries to develop its own aesthetic for dynamic images and to create animation films with distinctive characteristics. In recent years, however, and subject to the influence of Western and Japanese animation, the Chinese animation industry has experienced several new stages of development, prompting the question as to where animation in China is heading in the future. This book describes the history, present and future of China's animation industry. The author divides the business's 95-year history into six periods and analyses each of these from an historical, aesthetic, and artistic perspective. In addition, the book focuses on representative works, themes, directions, artistic styles, techniques, industrial development, government support policies, business models, the nurturing of education and talent, broadcasting systems, and animation. Scholars and students who are interested in the history of Chinese animation will benefit from this book and it will appeal additionally to readers interested in Chinese film studies.

**Moving Images** David Buckingham, 1996 Concerns about the effects of television on young children are a recurrent focus of public controversy. Yet amid all the anxiety, children's voices are rarely heard. In this book, one of Britain's leading television researchers investigates children's own perspectives on what they find frightening, moving and upsetting. From Nightmare on Elm Street to My Girl, from The Colour Purple to The News at Ten, what children find upsetting is often difficult to predict. David Blackburn gives a detailed insight into children's responses to horror films, to weepies and soap operas, to news and to reality programmes. He looks at how they learn to cope with their feelings about such material, and how their parents help or hinder them in doing so. This study offers a new approach to studying the role of television in children's lives, and should be of interest to parents and teachers, as well as policy makers and educationalists.

*Early Chinese Texts on Painting* Susan Bush, Hsio-yen Shih, 2012-11-01 For students of Chinese art and culture this anthology has proven invaluable since its initial publication in 1985. It collects important Chinese writings about painting, from the earliest examples through the fourteenth century, allowing readers to see how the art of this rich era was seen and understood in the artists' own times. Some of the texts in this treasury fall into the broad category of aesthetic theory; some describe specific techniques; some discuss the work of individual artists. The texts are presented in accurate and readable translations, and prefaced with artistic and historical background information to the formative periods of Chinese theory and criticism. A glossary of terms and an appendix containing brief biographies of 270 artists and critics add to the usefulness of this volume.

*Hazlitt on English Literature: An Introduction to the Appreciation of Literature* William Hazlitt, 2019-11-19 The present selection of Hazlitt's critical essays has been planned to serve two important purposes. In the first place, it provides the materials for an estimate of the character and scope of Hazlitt's contributions to criticism and so acquaints students with one of the greatest of English critics. And in the second place, what is perhaps more important, such a selection, embodying a series of appreciations of the great English writers, should prove helpful in the college teaching of literature. There is no great critic who by his readableness and comprehensiveness is as well qualified as Hazlitt to aid in bringing home to students the power and the beauty of the essential things in literature. There is, in him, a splendid stimulating energy which has not yet been sufficiently utilized.

Making Images Move Gregory Zinman, 2020-01-03 Making Images Move reveals a new history of cinema by uncovering its connections to other media and art forms. In this richly illustrated volume, Gregory Zinman explores how moving-image artists who worked in experimental film pushed the medium toward abstraction through a number of unconventional filmmaking practices, including painting and scratching directly on the film strip; deteriorating film with water, dirt, and bleach; and applying materials such as paper and glue. This book provides a comprehensive history of this tradition of "handmade cinema" from the early twentieth century to the present, opening up new conversations about the production, meaning, and significance of the moving image. From painted film to kinetic art, and from psychedelic light shows to video synthesis, Gregory Zinman recovers the range of forms, tools, and intentions that make up cinema's shadow history, deepening awareness of the intersection of art and media in the twentieth century, and anticipating what is to come.

*Oliphant's Presidents: Wendy Wick Reaves, 1990* Oliphant's Presidents is a unique presentation of some of the best of this artist's work--a review of artwork dating from 1964 and spanning more than 20 years, gauging the political peaks and valleys from LBJ and Vietnam to Tricky Dick and Watergate.

*Magical Suspension* James Combs, 2015-09-04 This book builds upon the author's extensive previous work on the movies, adopting a more comprehensive and inquisitive stance for the study of moving pictures as a cultural movement and ludenic innovation. It returns to earlier analysis and commentary on this new invention and recreation quickly termed "the movies", and develops the initial impression of both moviegoers and observers that the movies appealed because they were fun. As such, the book examines the characteristics that made films so enjoyable, namely their use of magic, presentation of myth, and persistence of mnemonic recollection. The enduring appeal of moving pictures remains consistent, even though the medium has proliferated and diversified, so much so that now a good portion of the human race spends a great deal of time looking at moving pictures. The book is eclectic and exploratory, designed to urge consideration of moving pictures in

this larger perspective as something that has changed and perhaps enriched the lives of many people, leaving inquirers the task of calculating the enormous significance and consequences of our motion picture experience for the conduct of our lives. Such an effort is not without merit, since it now seems quite clear that the whole world is watching.

**Tuai** Alison Jones,Kuni Kaa Jenkins,2017-07-10 In early 1817 Tuai, a young Ngare Raumati chief from the Bay of Islands, set off for England. He was one of a number of Māori who, after encountering European explorers, traders and missionaries in New Zealand, seized opportunities to travel beyond their familiar shores to Australia, England and Europe in the late eighteenth and early nineteenth centuries. They sought new knowledge, useful goods and technologies, and a mutually beneficial relationship with the people they knew as Pākehā. On his epic journey Tuai would visit exotic foreign ports, mix with teeming crowds in the huge metropolis of London, and witness the marvels of industrialisation at the Ironbridge Gorge in Shropshire. With his lively travelling companion Tītere, he would attend fashionable gatherings and sit for his portrait. He shared his deep understanding of Māori language and culture. And his missionary friends did their best to convert him to Christianity. But on returning to his Māori world in 1819, Tuai found there were difficult choices to be made. His plan to integrate new European knowledge and relationships into his Ngare Raumati community was to be challenged by the rapidly shifting politics of the Bay of Islands. With sympathy and insight, Alison Jones and Kuni Kaa Jenkins uncover the remarkable story of one of the first Māori travellers to Europe.

**Funny Pictures** Daniel Ira Goldmark,Charles Keil,2011-07-21 This collection of essays explores the link between comedy and animation in studio-era cartoons, from filmdom's earliest days through the twentieth century. Written by a who's who of animation authorities, Funny Pictures offers a stimulating range of views on why animation became associated with comedy so early and so indelibly, and illustrates how animation and humor came together at a pivotal stage in the development of the motion picture industry. To examine some of the central assumptions about comedy and cartoons and to explore the key factors that promoted their fusion, the book analyzes many of the key filmic texts from the studio years that exemplify animated comedy. Funny Pictures also looks ahead to show how this vital American entertainment tradition still thrives today in works ranging from The Simpsons to the output of Pixar.

**George Washington on Screen** Leigh Ehlers Telotte,2023-07-17 One of the most moving narratives from the American Revolution is the first presidential administration and the many precedents set by George Washington. While media historians have extensively analyzed screen portrayals of the more sensational events of America in the 1750s to the 1790s, far less attention has been paid to portrayals of the first presidency and the character of George Washington in film, television and other formats. This book addresses that gap by providing the most comprehensive analysis of the character of George Washington on screen. Divided into two parts, the book begins with an analysis of how the Washington character has evolved through time and screen media, from early silent films to modern multimedia products. In Part II, a filmography documents each piece of screen media that features a representation of Washington. It includes silent films, theatrical films, cartoons, television and screen media from the 21st century, such as streaming, video games and multimedia presentations. Arranged alphabetically, each entry includes format type, production details, crew and cast lists and a brief description of Washington's character in relation to the plot.

**Educational Technology and Narrative** Brad Hokanson,Gregory Clinton,Karen Kaminski,2017-12-09 This volume is the result of a 2016 research symposium sponsored by the Association for Educational Communications and Technology (AECT) focused on the growing theoretical areas of integrating story and narrative into educational design. Narrative, or storytelling, is often used as a means for understanding, conveying, and remembering the events of our lives. Our lives become a series of stories as we use narrative to structure our thinking; stories that teach, train, socialize, and create value. The contributions in this volume examine stories and narrative in instructional design and offer a diverse exploration of instructional design and learning environments. Among the topics discussed: The narrative imperative: creating a story telling culture in the classroom. Narrative qualities of design argumentation. Scenario-based workplace training as storytelling. Designing for adult learners' metacognitive development & narrative identity. Using activity theory in designing science inquiry games . Changing the narrative of school: toward a neurocognitive redefinition of learning. Educational Technology and Narrative is an invaluable resource offering application-ready ideas to students of instructional design, instructional design practitioners, and teachers seeking to utilize theories of story and narrative to the ways that they convey and express ideas of instructional design and educational technology.
