**Quantum Pythagoreans** Mike Ivsin,2006-08-01 Numbers, operators, and degrees of independence facilitate creation and organization of the real environment. The explanation and application of quantum mechanics on atomic and cosmic scales is suggested by the Pythagorean tradition

**Astro-Imaging Projects for Amateur Astronomers** Jim Chung,2015-07-09 This is the must-have guide for all amateur astronomers who double as makers, doers, tinkerers, problem-solvers, and inventors. In a world where an amateur astronomy habit can easily run into the many thousands of dollars, it is still possible for practitioners to get high-quality results and equipment on a budget by utilizing DIY techniques. Surprisingly, it's not that hard to modify existing equipment to get new and improved usability from older or outdated technology, creating an end result that can outshine the pricey higher-end tools. All it takes is some elbow grease, a creative and open mind and the help of Chung's hard-won knowledge on building and modifying telescopes and cameras. With this book, it is possible for readers to improve their craft, making their equipment more user friendly. The tools are at hand, and the advice on how to do it is here. Readers will discover a comprehensive presentation of astronomical projects that any amateur on any budget can replicate – projects that utilize leading edge technology and techniques sure to invigorate the experts and elevate the less experienced. As the maker community continues to expand, it has wonderful things to offer amateur astronomers with a willingness to get their hands dirty. Tweaking observing and imaging equipment so that it serves a custom purpose can take your observing options to the next level, while being fun to boot.

**Nitroxides** Gertz I. Likhtenshtein,2020-01-03 Written by a pioneer in the development of spin labeling in biophysics, this expert book covers the fundamentals of nitroxide spin labeling through cutting-edge applications in chemistry, physics, materials science, molecular biology, and biomedicine. Nitroxides have earned their place as one of the most popular organic paramagnets due to their suitability as inhibitors of oxidative processes, as a means to polarize magnetic nuclei, and, in molecular biology, as probes and labels to understand molecular structures and dynamics **AS DRAGS FOR CANCER AND OTHER DISEASES**. Beginning with an overview of the basic methodology and nitroxides' 145-year history, this book equips students with necessary background and techniques to undertake original research and industry work in this growing field.

**The Traveling Salesman Problem** David L. Applegate,Robert E. Bixby,Vašek Chvátal,William J. Cook,2011-09-19 This book presents the latest findings on one of the most intensely investigated subjects in computational mathematics--the traveling salesman problem. It sounds simple enough: given a set of cities and the cost of travel between each pair of them, the problem challenges you to find the cheapest route by which to visit all the cities and return home to where you began. Though seemingly modest, this exercise has inspired studies by mathematicians, chemists, and physicists. Teachers use it in the classroom. It has practical applications in genetics, telecommunications, and neuroscience. The authors of this book are the same pioneers who for nearly two decades have led the investigation into the traveling salesman problem. They have derived solutions to almost eighty-six thousand cities, yet a general solution to the problem has yet to be discovered. Here they describe the method and computer code they used to solve a broad range of large-scale problems, and along the way they demonstrate the interplay of applied mathematics with increasingly powerful computing platforms. They also give the fascinating history of the problem--how it developed, and why it continues to intrigue us.

**Computer Performance Engineering** Maria Simonetta Balsamo,William Knottenbelt,Andrea Marin,2013-08-19 This book constitutes the refereed post-proceedings of the 10th European Performance Engineering Workshop, EPEW 2013, held in Venice, Italy, in September 2013. The 16 regular papers presented together with 8 short papers and 2 invited talks were carefully reviewed and selected from 33 submissions. The Workshop aims to gather academic and industrial researchers working on all aspects of performance engineering. Original papers related to theoretical and methodological issues as well as case studies and automated tool support are solicited in the following areas: performance modeling and evaluation, system and network performance engineering, and software performance engineering.

**Chemistry of Polymeric Metal Chelates** Gulzhian I. Dzhardimalieva,Igor E. Uflyand,2018-02-13 This book deals with the chemistry of polymeric metal chelates. The main results and the production and chemical structure of polymers with chelate units as well as the specificity of metal complex binding of different structure are presented here. This book also reveals the transformations which components undergo in the course of chelation. Special attention is paid not only to synthetic but also to natural (including living) systems. The usage of polymeric metal chelates and their development are examined. The related research was performed for chelates with chain structure. This book is useful to researchers being active in synthesis and design of macromolecular metal chelates

**Data Mining** Krzysztof J. Cios,Witold Pedrycz,Roman W. Swiniarski,Lukasz Andrzej Kurgan,2007-10-05 This comprehensive textbook on data mining details the unique steps of the knowledge discovery process that prescribes the sequence in which data mining projects should be performed, from problem and data understanding through data preprocessing to deployment of the results. This knowledge discovery approach is what distinguishes Data Mining from other texts in this area. The book provides a suite of exercises and includes links to instructional presentations. Furthermore, it contains appendices of relevant mathematical material.

**Transit When Planets Cross the Sun** Michael J. de F. Maunder,Patrick Moore,2000 Although transits of planets across the Sun are rare (only Mercury and Venus orbit the Sun closer than us, and so can transit the Sun's disc) amateur astronomers can observe, record and image other kinds of transits that are much more frequent. This book first tells the fascinating story of the early scientific expeditions to observe transits. It then explains how to observe transits of all sorts - even transits of aircraft as they fly between the observer and the Sun.

**101 Design Methods** Vijay Kumar,2012-10-11 The first step-by-step guidebook for successful innovation planning Unlike other books on the subject, 101 Design Methods approaches the practice of creating new products, services, and customer experiences as a science, rather than an art, providing a practical set of collaborative tools and methods for planning and defining successful new offerings. Strategists, managers, designers, and researchers who undertake the challenge of innovation, despite a lack of established procedures and a high risk of failure, will find this an invaluable resource. Novices can learn from it; managers can plan with it; and practitioners of innovation can improve the quality of their work by referring to it.

**Bernard's Promise** S. D. Falchetti,2019-09 In Janus 2, the crew of Gossamer Goose made disastrous first contact with the Silver Stars, costing them Earth's first starship. Now, with the Centauri probe revealing a world with a breathable atmosphere and possible life, James Hayden must build the ship capable of taking them to the stars. But the Centauri worlds have their own dangers and mysteries, and not everything they find is what it seems. The crew of Gossamer Goose returns for a planet-hopping interstellar adventure in the first full-length hard science fiction novel set in the Hayden's World universe. Join James, Ananke, Hitoshi, Isaac, Julian, Ava, Beckman and new shipmate Willow as James's dream finally becomes reality.

**Discrete and Computational Geometry, Graphs, and Games** Jin Akiyama,Reginaldo M. Marcelo,Mari-Jo P. Ruiz,Yushi Uno,2021-10-28 This book constitutes the thoroughly refereed post-conference proceedings of the 21st Japanese

Conference on Discrete and Computational Geometry and Graphs, JCDCGGG 2018, held in Quezon City, Philippines, in September 2018. The total of 14 papers included in this volume was carefully reviewed and selected from 25 submissions. The papers feature advances made in the field of computational geometry and focus on emerging technologies, new methodology and applications, graph theory and dynamics.

The Birth of Star Clusters Steven Stahler,2017-11-04 All stars are born in groups. The origin of these groups has long been a key question in astronomy, one that interests researchers in star formation, the interstellar medium, and cosmology. This volume summarizes current progress in the field, and includes contributions from both theorists and observers. Star clusters appear with a wide range of properties, and are born in a variety of physical conditions. Yet the key question remains: How do diffuse clouds of gas condense into the collections of luminous objects we call stars? This book will benefit graduate students, newcomers to the field, and also experienced scientists seeking a convenient reference.

**Theory and Applications of Colloidal Suspension Rheology** Norman J. Wagner,Jan Mewis,2021-04-15 Essential text on the practical application and theory of colloidal suspension rheology, written by an international coalition of experts.

**Rogers Groups** Chetwood 1873- Smith,2021-09-10 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. *Pokémon Mystery Dungeon: Ginji's Rescue Team* Makato Mizobuchi,2007-03-06 If you were transformed into your favorite Pokémon, what would you do? Ginji is a normal schoolboy until the day he awakes to discover that he's been transformed into a Pokémon! Now in the form of a Torchic, Ginji meets a very friendly Mudkip who convinces him to join his Rescue Team. Their mission: to help any and all Pokémon in need. Saving adorable Pokémon is good and fine, but will Ginji ever be able to turn back into a human again? And has his very presence turned the entire Pokémon world topsy-turvy? The adventure--and mystery--is on! What would you do if you turned into a Pokémon? Ginji is a regular schoolboy until he wakes up one day as a Torchic! Before Ginji can figure out how to change back, a friendly Mudkip convinces him to become his partner and form a Rescue Team. Saving adorable Pokémon from disaster is exciting work, but can Ginji save himself? Will he ever be human again? And has his transformation turned the Pokémon world topsy-turvy? The adventure--and mystery--is on!

*Advanced Heterogeneous Catalysts, Volume 1* Sudarsanam Putla,Lakhveer Singh,2021-05-07 Advances and applications of nanosized catalysts Over the last five years, tremendous advances have been made in heterogeneous catalysis. In particular, catalysts' design from the bulk to nano-scale (1-100 nm), with desirable active sites, has received great attention in current catalysis research with the aim to fill the gap between homogeneous and heterogeneous catalysis. This volume focuses on applications of nanosized catalysts. Articles describe characterization, synthesis, and applications in biomass conversion, auto-exhaust purification, selective oxidation/hydrogenation, syngas conversion, and other important reactions. Readers will find examples of catalysts designed to be tunable for specific outcomes, inspiring their research. Scientists and engineers in chemistry, materials science, nanotechnology, and chemical engineering will find this volume useful.

**Assessment of value chain system for horticulture in Khyber Pakhtunkhwa including Newly Merged Districts (former FATA)** Rana, Abdul Wajid,ul Haq, Zahoor,Asghar, Sobia,Haider, Zeeshan,Davies, Stephen,2021-10-08 Rapid urbanization and rising income levels in developing countries, such as Pakistan, changing diet habits, information and communication technologies, structural transformation in retail markets as well as export market opportunities are catalyzing dynamic change in horticulture value chains. This is causing a paradigm shift in the way horticulture products are produced, processed, and sold, both within domestic markets and in export markets across the globe. The emergence of local, regional, and global value chains is contributing to increasing engagement of the private sector in horticulture, as these firms and markets look for better quality, greater productivity, efficiency, and market penetration. At the same time, consumers demand for safety, quality, convenience and affordable prices is underlining the role of the private sector in the efficacy of the value chains.

Exultant Stephen Baxter,2004-10-26 “Baxter has an uncanny gift for mixing a punchy, cyberpunk cynicism with his resolutely hard SF story base. . . . [Exultant] rivals Asimov in its boundless vision for the future evolution of humanity.”—Kirkus Reviews (starred review) For more than twenty thousand years, humans have been at war with the alien race of Xeelee. Faced with certain death, a young pilot, Pirijs, disobeys orders and travels into the future. Upon his return, Pirijs is court-martialed and sentenced to penal servitude. But it is not only Pirijs who pays the price. In flying into the future and back again, Pirijs returned to a time before he'd left, a time inhabited by his younger self, who also receives punishment. Commissary Nilis believes that the elder Pirijs, whom he dubs Pirijs Blue, may know how to defeat the Xeelee. But Nilis can do nothing for Pirijs Blue. Instead, he takes the younger Pirijs—Pirijs Red—back to Earth. There Pirijs Red will discover truths that shatter his preconceived notions of all that he is fighting for, while Pirijs Blue will learn even harsher truths. But the most shocking revelation of all is still to come. “Absurdly ambitious, technically brilliant, and downright exciting.”—SFX Magazine “Striking . . . chilling . . . [with] a triumphant conclusion.”—Starburst

Giuseppe Peano between Mathematics and Logic Fulvia Skof,2011-04-30 This book contains the papers developing out the presentations given at the International Conference organized by the Torino Academy of Sciences and the Department of Mathematics Giuseppe Peano of the Torino University to celebrate the 150th anniversary of G. Peano's birth - one of the greatest figures in modern mathematics and logic and the most important mathematical logician in Italy - a century after the publication of *Formulario Mathematico*, a great attempt to systematise Mathematics in symbolic form.
