*Backup & Recovery* W. Curtis Preston, 2007-01-03  
Packed with practical, freely available backup and recovery solutions for Unix, Linux, Windows, and Mac OS X systems -- as well as various databases - - this new guide is a complete overhaul of Unix Backup & Recovery by the same author, now revised and expanded with over 75% new material. Backup & Recovery starts with a complete overview of backup philosophy and design, including the basic backup utilities of tar, dump, cpio, ntbackup, ditto, and rsync. It then explains several open source backup products that automate backups using those utilities, including AMANDA, Bacula, BackupPC, rdiff-backup, and rsnapshot. Backup & Recovery then explains how to perform bare metal recovery of AIX, HP-UX, Linux, Mac OS, Solaris, VMWare, & Windows systems using freely-available utilities. The book also provides overviews of the current state of the commercial backup software and hardware market, including overviews of CDP, Data De-duplication, D2D2T, and VTL technology.

Finally, it covers how to automate the backups of DB2, Exchange, MySQL, Oracle, PostgreSQL, SQL-Server, and Sybase databases - without purchasing a commercial backup product to do so. For environments of all sizes and budgets, this unique book shows you how to ensure data protection without resorting to expensive commercial solutions. You will soon learn to: Automate the backup of popular databases without a commercial utility Perform bare metal recovery of any popular open systems platform, including your PC or laptop Utilize valuable but often unknown open source backup products Understand the state of commercial backup software, including explanations of CDP and data de-duplication software Access the current state of backup hardware, including Virtual Tape Libraries (VTLs)

*Pro Data Backup and Recovery* Steven Nelson, 2011-07-18 Good backup and recovery strategies are key to the health of any organization. Medium- to very-large-scale systems administrators have to protect large amounts of critical data as well as design backup solutions that are scalable and optimized to meet changing conditions. *Pro Data Backup and Recovery* will cover some of the more common backup applications, such as Symantec NetBackup/BackupExec, EMC NetWorker, and CommVault, but the main discussion will focus on the implementation of 21st century architectures that allow the backup software to be

a “commodity” item. The underlying architecture provides the framework for meeting the requirements of data protection for the organization. This book covers new developments in data protection as well as the impact of single-instance storage upon backup infrastructures. It discusses the impact of backup and data replication, the often misapplied B2D and D2D strategies, and “tapeless” backup environments. Continuous data protection and remote replication strategies are also addressed as they are integrated within backup strategies—a very important topic today. Learn backup solution design regardless of specific backup software Design realistic recovery solutions Take into account new data protection standards and the impact of data replication Whether you are using NetBackup, CommVault, or some other backup software, Pro Data Backup and Recovery will give you the information you need to keep your data safe and available.

**Energy Security for the 21st Century** Anco S. Blazev, 2021-01-15 This book takes a very close look at energy and energy security from a hands-on, technical point of view with an ultimate goal of sorting out and explaining the deep meaning of energy as well as the key factors and variables of our energy security. The book reviews the major energy sources—coal, crude oil, natural gas, the renewables, and other alternative fuels and technologies—according to the way they affect our energy security now and what consequences might be expected in the future. Topics include the different technical, logistics, regulatory, social, political, and financial aspects of modern energy products and technologies. The advantages and disadvantages of the different fuels, technologies, energy strategies, regulations, and policies are reviewed in detail, sorted, and clearly laid out as well as their effects on our present and future energy security in a way that is easy to understand by high school students, engineers, and professors alike. This book is a must-read for energy executives, environmental specialists, investors, bankers, lawyers, regulators, politicians, and anyone involved, or interested, in today's energy production and use and their effects on our energy security.

*Reimagining Reference in the 21st Century* David A. Tyckoson, John G. Dove, 2015 Libraries today provide a wider variety of services, collections, and tools than at any time in the past. This book explores how reference librarianship is changing to continue to help users find information they need in this shifting environment.

*Critical Perspectives on Privacy Rights and Protections in the 21st Century* Rita Santos, 2018-07-15 As consumers become more comfortable with buying smart devices and corporations and governments are accused of spying through such artificial intelligence, the question of privacy is often invoked. Should you know if data from your wearable device is being sold to other corporations? How comfortable are you with the possibility that your searches online can be easily retrieved? In this book, these questions and more are considered by various experts on privacy and technology, including digital and political activists, legal advisors, and the media.

Digital Transformation for a Sustainable Society in the 21st Century Ilias O. Pappas, Patrick Mikalef, Yogesh K. Dwivedi, Letizia Jaccheri, John Krogstie, Matti Mäntymäki, 2019-09-09 This book constitutes the proceedings of the 18th IFIP WG 6.11 Conference on e-Business, e-Services, and e-Society, I3E 2019, held in Trondheim, Norway, in September 2019. The total of 61 full and 4 short papers presented in this volume were carefully reviewed and selected from 138 submissions. The papers were organized in topical sections named: e-business; big data analytics, open science and

open data; artificial intelligence and internet of things; smart cities and smart homes, social media and analytics; digital governance; digital divide and social inclusion; learning and education; security in digital environments; modelling and managing the digital enterprise; digital innovation and business transformation; and online communities.

### **Structural Firefighting: Strategy and Tactics**

Bernard "Ben" J. Klaene, Thomas C.

Lakamp, 2020-08-19 The fourth edition of Structural Firefighting: Strategy and Tactics meets and exceeds the course objectives and outcomes for the National Fire Academy's Fire and Emergency Services Higher Education (FESHE) non-core course, Strategy and Tactics (C0279). Structural Firefighting: Strategy and Tactics prepares the fire officer to take command at structure fires, effectively using available resources. The goal of this text is to explain proven tactics and strategies used at structure fires. It is designed to be used by all fire officers, from company officer to chief of department. The Fourth Edition provides the necessary tools to achieve maximum productivity under adverse fireground conditions. It references NFPA fire investigations, applicable NFPA statistics and standards, the NIOSH Firefighter Fatality Investigation and Prevention Program, and the Technical Report Series from the U.S. Fire Administration. It has been expanded to include information from recent studies by the National Institute of Standards and Technology (NIST), Underwriters Laboratories (UL), and others. The Fourth Edition contains new content on

integration of initial rapid intervention crews, updated content on vent-enter-isolate-search tactics, and more, while continuing to emphasize the role of preincident planning and command decisions that maximize life safety, extinguishment, and property conservation. A multitude of case studies, incident summaries, and extensive end-of-chapter activities promote application of chapter content and critical thinking skills. This text allows a company officer or incident commander to learn fireground procedures at an accelerated pace, thus reducing the cost in lives and property associated with learning by experience only. The Fourth Edition also includes: New and significantly expanded, in-depth Suggested Activities that challenge the reader to apply the strategies and tactics presented in each chapter Incident Summaries that summarize real fireground events and lessons learned Fallacy/Fact boxes that defuse myths and clarify the facts Updated statistics on significant fires in various occupancy types Safety and strategy tips throughout each chapter

### **Planting Growing Churches for the 21st Century**

Aubrey Malphurs, 2004-10-01 If the church is to thrive in the twenty-first century, it will have to take on a new form as it ministers to the 120 million unchurched people in the United States. Planting Growing Churches for the 21st Century is still virtually the only available text on church planting in North America and beyond. In this third edition, readers will find material on the importance of healthy, biblical change in our churches, updated appendixes, insight on our

postmodern ministry context, and strategies for reaching new population demographics such as Generations X and Y. Pastors, ministry leaders, and church planters will find the information and advice found in this book invaluable as they carry out their ministries.

21st Century Management: A Reference Handbook

Charles Wankel, 2007-12-17 The Handbook of 21st Century Management provides authoritative insight into the key issues for students in college or corporate courses with a particular emphasis on the current structure of the topic in the literature, key threads of discussion and research on the topic, and emerging trends. This resource

is useful in structuring exciting and meaningful papers and presentations and assists readers in deciding on management areas to take elective coursework in or to orient themselves towards for a career. Indeed, familiarity with many of the topics in this Handbook would be very useful in job interviews for positions in business.

### **Survivability and Traffic Grooming in WDM**

**Optical Networks** Arun Somani, 2006-01-19 The advent of fiber optic transmission systems and wavelength division multiplexing (WDM) have led to a dramatic increase in the usable bandwidth of single fiber systems. This book provides detailed coverage of survivability (dealing with the risk of losing large volumes of traffic data due to a failure of a node or a single fiber span) and traffic grooming (managing the increased complexity of smaller user requests over high capacity data pipes), both of which are key issues in modern optical networks. A framework is developed to deal with these problems in wide-area networks, where the topology used to service various high-bandwidth (but still small in relation to the capacity of the fiber) systems evolves toward making use of a general mesh. Effective solutions, exploiting complex optimization techniques, and heuristic methods are presented to keep network problems tractable. Newer networking technologies and efficient design methodologies are also described.

### **MPLS in the SDN Era** Antonio Sanchez

Monge, Krzysztof Grzegorz Szarkowicz, 2015-12-07 How can you make multivendor services work smoothly on today's complex networks? This practical book

shows you how to deploy a large portfolio of multivendor Multiprotocol Label Switching (MPLS) services on networks, down to the configuration level. You'll learn where Juniper Network's Junos, Cisco's IOS XR, and OpenContrail, interoperate and where they don't. Two network and cloud professionals from Juniper describe how MPLS technologies and applications have rapidly evolved through services and architectures such as Ethernet VPNs, Network Function Virtualization, Seamless MPLS, Egress Protection, External Path Computation, and more. This book contains no vendor bias or corporate messages, just solid information on how to get a multivendor network to function optimally. Topics include: Introduction to MPLS and Software-Defined Networking (SDN) The four MPLS Builders (LDP, RSVP-TE, IGP SPRING, and BGP) Layer 3 unicast and multicast MPLS services, Layer 2 VPN, VPLS, and Ethernet VPN Inter-domain MPLS Services Underlay and overlay architectures: data centers, NVO, and NFV Centralized Traffic Engineering and TE bandwidth reservations Scaling MPLS transport and services Transit fast restoration based on the IGP and RSVP-TE FIB optimization and egress service for fast restoration
