Organizational Strategy, Structure, and Process

Raymond E. Miles, Charles C. Snow, 2003-03-26 Books and articles come and go, endlessly. But a few do stick, and this book is such a one. Organizational Strategy, Structure, and Process broke fresh ground in the understanding of strategy at a time when thinking about strategy was still in its early days, and it has not been displaced since. —David J. Hickson, Emeritus Professor of International Management & Organization, University of Bradford School of Management Originally published in 1978, Organizational Strategy, Structure, and Process became an instant classic, as it bridged the formerly separate fields of strategic management and organizational behavior. In this Stanford Business Classics reissue, noted strategy scholar Donald Hambrick provides a new introduction that describes the book's contribution to the field of organization studies. Miles and Snow also contribute new introductory material to update the book's central concepts and themes. Organizational Strategy, Structure, and Process focuses on how organizations adapt to their environments. The book introduced a theoretical framework composed of a dynamic adaptive cycle and an empirically based strategy typology showing four different types of adaptation. This framework helped to define subsequent research by other scholars on important topics such as configurational analysis, organizational fit, strategic human resource management, and multi-firm network organizations.

Global Business Strategy Kazuyuki Motohashi, 2015-03-25 This book presents theories and case studies for corporations in

developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

Exploring Corporate Strategy Gerry Johnson, Kevan Scholes, Richard Whittington, 2009-12 An extensive process of market research and product development has formed the basis for this new edition. It covers all of the underlying concepts, processes of development and analytical methods of corporate strategy within a variety of organisations.

Using Trends and Scenarios as Tools for Strategy Development Ulf Pillkahn, 2008-09-26 Is my enterprise really prepared for future business? What can I do to become more competitive? Ulf Pillkahn's book is directed at all of those seeking answers to these questions: executives in strategic positions, business analysts, consultants, trend scouts, marketing and product managers and research engineers. The book presents the two most powerful tools for future planning: environmental analysis, based on the use of trends, as well as the development of visions of the future through the use of scenarios. While scenarios are generally regarded as a classical management tool, it is expected that the importance of trends will gain tremendously in the coming years. Pillkahn demonstrates how to build robust strategies by aligning the results of environmental and enterprise scenarios, thereby offering entirely new insights. Using Trends and Scenarios as Tools

for Strategy Development convincingly illustrates why efficient observation of the environment of an enterprise is an absolutely essential factor for strategy development, and why strategy development only works if it is institutionalized as a permanent enterprise process. It also addresses the issue of what information is needed to keep both processes running. The book further describes how trends can be categorized, and offers advice on how to glean the essential information from the vast variety of trends. Information is provided on how scenarios are used as a holistic instrument for creating visions and pictures of the future, and how the results of trend research and scenario techniques find their way into entrepreneurial strategy development. An optimized strategy development process is also outlined. Practical examples and real-life pictures of the future round off Pillkahn's insightful discussion of future business planning.

Problem Solving in Business and Management MICHAEL J. HICKS, 2013-11-27

International Construction Management Igor

Martek, 2022-02-07 This book tells you everything you need to know about international construction: the companies, their markets, the types of projects they build, how they compete and operate and how it affects us all. It paints a comprehensive portrait of an overlooked global business that generates a major portion of the GDP in every developed nation. As with any mature sector, countries make efforts to export their expertise, but the competition in construction is fierce, and the risks are many. Only the leanest and meanest survive. What, then, does it take to win? Most writing on construction focuses at the project-management level or even more narrowly at the level of technical performance. This book presents the big picture; it tells you what successful international construction companies do to stay in the game and thrive. The book examines international construction through three lenses. The first is theory. The body of existing knowledge on construction is here brought together, condensed and explained.

The second are the actors. The companies that lead the way in global construction are showcased, and the features that make countries desirable hosts are appraised. Finally, what is it that firms actually do? This last part delves into the various strategic approaches taken by 60 construction firms in carving out and defending an overseas market niche. The insights provide guidance on how global construction companies develop competitive advantage and stay resilient in the face of a mercurial global economy. These lessons will be of interest to the student and manager alike.

Scenario-based Strategic Planning Burkhard

Schwenker, Torsten Wulf, 2013-12-05 In a world characterized by increasing complexity and volatility, managers must be able to flexibly adapt their strategies to changing environmental conditions. Traditional strategic management frameworks often fail in this context. Therefore, we present scenario-based strategic planning as a framework for strategic management in an uncertain world. Previous approaches to scenario planning were complex and focused on the long term, but the approach developed by Roland Berger and the Center for Strategy and Scenario Planning at HHL Leipzig Graduate School of Management is different. By designing appropriate tools and integrating scenario planning into strategic planning, we have made our approach less complex and easier for firms to apply. We illustrate the approach with examples from different industries.

Strategy as Practice Gerry Johnson, Leif Melin, Richard

Whittington, 2007-08-02 This is an analysis of what managers actually do in relation to the development of strategy in organisations.

Strategic Planning and Management Nagy Hanna, 1985

Masterpieces of Swiss Entrepreneurship Jean-Pierre Jeannet, Thierry Volery, Heiko Bergmann, Cornelia Amstutz, 2021-04-21 This open access book focuses on Switzerland-based medium-sized companies with a longstanding export tradition and a proven dominance in global niche markets. Based upon in-depth documentation and analysis of 36 Swiss companies over their entire history, an expert team of authors presents several parallels in the pathways and success factors which allowed these firms to become dominant and operate from a high-cost location such as Switzerland. The book enhances these

insights by providing detailed company profiles documenting the company history, development, and how their relevant global niche positions were reached. Readers will benefit from these profiles as they compile a diverse selection of industries, mainly active within the B2B sector, with mostly mature companies (60 years to older than 100 years since founding) and different types of ownership structures including family firms. 'Masterpieces of Swiss Entrepreneurship' brings unique learning opportunities to owners and leaders of SMEs in Switzerland and elsewhere. Findings are based on detailed bottom-up research of 36 companies -- without any preconceived notions. The book is both conceptual and practical. It fosters understanding for different choices in development pathways and management practices. Matti Alahuhta, Chairman DevCo Partners, ex-CEO Kone, Board member of several global listed companies, Helsinki, Finland Start-up entrepreneurs need proven models from industry which demonstrate the various paths to success. "Masterpieces of Swiss Entrepreneurship" provides deep insights highlighting these models and the important trade-offs entrepreneurial teams must consider when choosing the path of high growth or of maximum control, as they are often mutually exclusive. Gina Domanig, Managing Partner, Emerald Technology Ventures, Zurich

Nation branding Keith Dinnie, 2010-05-14 Nation Branding: Concepts, Issues, Practice is a comprehensive and exciting text that demonstrates why nations are embracing the principles of brand management. It clearly explains how the concepts and techniques of branding can be adapted to the context of nations- as opposed to the more usual context of products, services, or companies. Concepts grounded in the brand management literature such as brand identity, brand image, brand positioning, and brand equity, are transposed to the domain of nation branding and supported by country case insights that provide vivid illustrations of nation branding in practice. It illustrates each model through real, successful case studies of globalization of factor, efficiency, and innovation-driven SMEs. It will benefit scholars of entrepreneurship, international business, regional development as well as managers, governmental institutions, and regional development, and consultants to SMEs.
