Shakespeare: Invention of the Human Harold Bloom, 1999-09-01 The indispensable critic on the indispensable writer. -Geoffrey O'Brien, New York Review of Books A landmark achievement as expansive, erudite, and passionate as its renowned author, this book is the culmination of a lifetime of reading, writing about, and teaching Shakespeare. Preeminent literary critic and ultimate authority on the western literary tradition, Harold Bloom leads us through a comprehensive reading of every one of the dramatist's plays, brilliantly illuminating each work with unrivaled warmth, wit and insight. At the same time, Bloom presents one of the boldest theses of Shakespearean scholarship: that Shakespeare not only invented the English language, but also created human nature as we know it today.

Legitimacy of Philanthropic Foundations Stefan Toepler, 2006-10-27 Though privately controlled, foundations perform essential roles that serve society at large. They spearhead some of the world's largest and most innovative initiatives in science, health, education, and the arts, fulfilling important needs that could not be addressed adequately in the marketplace or the public sector. Still, many people have little understanding of what foundations do and how they continue to earn public endorsement. The Legitimacy of Philanthropic Foundations provides a thorough examination of why foundations exist and the varied purposes they serve in contemporary democratic societies. The Legitimacy of Philanthropic Foundations looks at foundations in the United States and Europe to examine their relationship to the state, the market, and civil society. Peter Frumkin argues that unlike elected officials, who must often shy away from topics that could spark political opposition, and corporate officers, who must meet bottom-line priorities, foundations can independently tackle sensitive issues of public importance. Kenneth Prewitt argues that foundations embody elements of classical liberalism, such as individual autonomy and limited government interference in private matters and achieve legitimacy by putting private wealth to work for the public good. Others argue that foundations achieve legitimacy by redistributing wealth from the pockets of rich philanthropists to the poor. But Julian Wolpert finds that foundations do not redistribute money directly to the poor as much as many people believe. Instead, many foundations focus their efforts on education, health, and scientific research, making investments that benefit society in the long-term, and focusing on farsighted issues that a myopic electorate would not have patience to permit its government to address. Originating from private fortunes but working for the public good, independently managed but subject to legal prescriptions, philanthropic foundations occupy a unique space somewhere between the public and private sectors. The Legitimacy of Philanthropic Foundations places foundations in a broad social and historical context, improving our understanding of one of society's most influential—and least understood—organizational forms.

Capital as Power Jonathan Nitzan, Shimshon Bichler, 2009-06-02 Conventional theories of capitalism are mired in a deep crisis: after centuries of debate, they are still unable to tell us what capital is. Liberals and Marxists both think of capital as an 'economic' entity that they count in universal

units of 'utils' or 'abstract labour', respectively. But these units are totally fictitious. Nobody has ever been able to observe or measure them, and for a good reason: they don't exist. Since liberalism and Marxism depend on these non-existing units, their theories hang in suspension. They cannot explain the process that matters most – the accumulation of capital. This book offers a radical alternative. According to the authors, capital is not a narrow economic entity, but a symbolic quantification of power. It has little to do with utility or abstract labour, and it extends far beyond machines and production lines. Capital, the authors claim, represents the organized power of dominant capital groups to reshape – or creorder – their society. Written in simple language, accessible to lay readers and experts alike, the book develops a novel political economy. It takes the reader through the history, assumptions and limitations of mainstream economics and its associated theories of politics. It examines the evolution of Marxist thinking on accumulation and the state. And it articulates an innovative theory of 'capital as power' and a new history of the 'capitalist mode of power'.

Post Memes Daniel Bristow, Alfie Bown, 2019 Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, lololololol, mode of critique, mode of production, means of politicisation, even of subjectivation - memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticals alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. **POST MEMES: SEIZING THE MEMES OF PRODUCTION** takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. With contributions from Scott and McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon. **ABOUT THE EDITORS** ALFIE BOWN is the author of several books including *The Playstation Dreamworld* (Polity, 2017) and *In the Event of Laughter: Psychoanalysis, Literature and Comedy* (Bloomsbury, 2018). He is also a journalist for the Guardian, the Paris Review, and other outlets. DAN BRISTOW is a recovering academic, a bookseller, and author of *Joyce and Lacan: Reading, Writing, and Psychoanalysis* (Routledge, 2016) and *2001: A Space Odyssey and Lacanian Psychoanalytic Theory* (Palgrave, 2017). He is also the co-creator with Alfie Bown of *Everyday Analysis*, now based at New Socialist magazine.

The Chinese at the Negotiating Table Alfred D. Wilhelm, 1994 Examines the process of negotiating with the Chinese, using historical examples and analyses of cases from 1953 to the present. The author debunks the myth of legendary Chinese patience, assesses American reaction to negotiating with the Chinese, and analyzes the Chinese approach to negotiations. He reveals the elements of continuity in Chinese behavior that surfaced during talks with the U.S. as early as 1949. 10 photos. Bibliography. Index.

The Pandemic Century: One Hundred Years of Panic, Hysteria, and Hubris Mark Honigsbaum, 2019-04-09 With a New Chapter and Updated Epilogue on Coronavirus A Financial Times Best Health Book of 2019 and a New York Times Book Review Editors' Choice Honigsbaum does a superb job covering a century's worth of pandemics and the fears they invariably unleash. —Howard Markel, MD, PhD, director of the Center for the History of Medicine, University of Michigan How can we understand the COVID-19 pandemic? Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing such catastrophic outbreaks of infectious disease. Yet despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. In *The Pandemic Century*, a lively account of scares

both infamous and less known, medical historian Mark Honigsbaum combines reportage with the history of science and medical sociology to artfully reconstruct epidemiological mysteries and the ecology of infectious diseases. We meet dedicated disease detectives, obstructive or incompetent public health officials, and brilliant scientists often blinded by their own knowledge of bacteria and viruses—and see how fear of disease often exacerbates racial, religious, and ethnic tensions. Now updated with a new chapter and epilogue.
