*New Understandings of Twin Relationships* Barbara Klein, Stephen A. Hart, Jacqueline M. Martinez, 2020-12-23 *New Understandings of Twin Relationships* takes an experience-based approach to exploring how twin attachment and estrangement are critical to understanding the push and pull of closely entwined personal relationships. Based on the research expertise of each of the authors (all identical twins in their own right), and vignettes from twins across the globe, this book describes the inner workings of the twin-world, showing how the twin-world creates experiences that are often more intense and intricately textured than those in the singleton-world. Chapters debunk myths surrounding twinship and analyze the developmental stages of the twin relationship as well as the effect of being a twin on one's mental health from different perspectives. The authors articulate how attachment, separation anxiety, loneliness, estrangement, and the subjective experience of the twin and non-twin other impact behavior, thinking, and feeling. Through its careful study of the many psychological challenges that twins face throughout their lifetime, this text will help psychologists, scholars, clinicians, and twins themselves attain a deeper understanding of all interpersonal relationships.

*Twins Talk* Dona Lee Davis, 2015-01-01 *Twins Talk* is an ethnographic study of identical twins in the United States, a study unique in that it considers what twins have to say about themselves, instead of what researchers have written about them. It presents, in the first person, the grounded and practical experiences of twins as they engage, both individually and together, the "who am I" and "who are we" questions of life. Here, the twins themselves are the stars. Dona Lee Davis conducted conversational interviews with twenty-two sets of identical twins attending the Twins Days Festival in Twinsburg, Ohio, the largest such gathering in the world. Lively and often opinionated, each twin comes through as a whole person who at the same time maintains a special bond that the vast majority of people will never experience. The study provides a distinctive and enlightening insider's challenge to the nature/nurture debates that dominate contemporary research on twins. The author, herself an identical twin, draws on aspects of her own life to inform her analysis of the data throughout the text. Each chapter addresses a different theme from multiple viewpoints, including those of popular science writers, scientific researchers, and singletons, as well as those of the twins themselves.

**A Guide to Graph Algorithms** Ton Kloks, Mingyu Xiao, 2022-02-22 This book *A Guide to Graph Algorithms* offers high-quality content in the research area of graph algorithms and explores the latest developments in graph algorithmics. The reader will gain a comprehensive understanding of how to use algorithms to explore graphs. It is a collection of texts that have proved to be trend setters and good examples of that. The book aims at providing the reader with a deep understanding of the structural properties of graphs that are useful for the design of efficient algorithms. These algorithms have applications in finite state machine modelling, social network theory, biology, and mathematics. The book contains many exercises, some up at present-day research-level. The exercises encourage the reader to discover new techniques by putting things in a clear perspective. A study of this book will provide the reader with many powerful tools to model and tackle problems in real-world scenarios.

**Twin Peaks: Fire Walk with Me** Lindsay Hallam, 2018-05-29 David Lynch's prequel film *Twin Peaks: Fire Walk with Me* has received renewed appreciation with the broadcast of *Twin Peaks: The Return*. Lindsay Hallam argues that what Lynch created was not a parody of soap opera and detective television but a horror movie. She examines initial reaction to and subsequent reevaluation of the film.

**Antimatter** Frank Close, 2018-10-18 *Antimatter* explores a strange mirror world, where particles have identical yet opposite properties to those that make up the familiar matter we encounter everyday; where left becomes right, positive becomes negative; and where, should matter and antimatter meet, the two annihilate in a blinding flash of energy that makes even thermonuclear explosions look feeble by comparison. It is an idea long beloved of science-fiction stories—but here, renowned science writer Frank Close shows that the reality of antimatter is even more fascinating than the fiction itself. We know that once, antimatter and matter existed in perfect counterbalance, and that antimatter then perpetrated a vanishing act on a cosmic scale that remains one of the greatest mysteries of the universe. Today, antimatter does not exist normally, at least on Earth, but we know that it is real for scientists are now able to make small pieces of it in particle accelerators, such as that at CERN in Geneva. Looking at the remarkable prediction of antimatter and how it grew from the meeting point of relativity and quantum theory in the early 20th century, at the discovery of the first antiparticles, at cosmic rays, annihilation, antimatter bombs, and antiworlds, Close separates the facts from the fiction about antimatter, and explains how its existence can give us profound clues about the origins and structure of the universe. Oxford Landmark Science books are 'must-read' classics of modern science writing which have crystallized big ideas, and shaped the way we think.

**Disintegration in Four Parts** Jean Marc Ah-Sen, Emily Anglin, Devon Code, Lee Henderson, 2021-06-15 Four writers, four different perspectives on the problematic notion

of purity. All purity is created by resemblance and disavowal. With this sentence as a starting point, four authors each write a novella considering the concept of purity, all from astonishingly different angles. Jean Marc Ah-Sen writes about love blooming between two writers belonging to feuding literary movements. Emily Anglin explores an architect's search for her twin at a rural historic house. Devon Code documents the Wittgensteinian upheavals of the last days of an elderly woman. And Lee Henderson imagines Dada artist Kurt Schwitters finding unlikely inspiration in a Second World War internment camp in northern Norway. Wildly different in style and subject matter, these four virtuoso pieces give us a 360-degree view of a philosophical theme that has never felt so urgent. "Despite the disparity of their subject matter – a Nazi-evading Dadaist detained in Norway, urban and familial estrangements, complicated love amid the avant-garde, the vicissitudes of old age – these brilliantly inventive, delightfully strange stories cling together like four unlikely soulmates, unified by art's pursuit of coherence through life's various disintegrations." –Pasha Malla, author of *Kill the Mall*

The Trauma Question Roger Luckhurst, 2013-06-17 In this book, Roger Luckhurst both introduces and advances the fields of cultural memory and trauma studies, tracing the ways in which ideas of trauma have become a major element in contemporary Western conceptions of the self. The Trauma Question outlines the origins of the concept of trauma across psychiatric, legal and cultural-political sources from the 1860s to the coining of Post-Traumatic Stress Disorder in 1980. It further explores the nature and extent of 'trauma culture' from 1980 to the present, drawing upon a range of cultural practices from literature, memoirs and confessional journalism through to photography and film. The study covers a diverse range of cultural works, including writers such as Toni Morrison, Stephen King and W. G. Sebald, artists Tracey Emin, Christian Boltanski and Tracey Moffatt, and film-makers David Lynch and Atom Egoyan. The Trauma Question offers a significant and fascinating step forward for those seeking a greater understanding of the controversial and ever-expanding field of trauma research.

Identical Strangers Elyse Schein, Paula Bernstein, 2007-10-02 As seen in the hit documentary *Three Identical Strangers* • "[A] poignant memoir of twin sisters who were split up as infants, became part of a secret scientific study, then found each other as adults."—Reader's Digest (Editors' Choice) WINNER OF A BOOKS FOR A BETTER LIFE AWARD Elyse Schein had always known she was adopted, but it wasn't until her mid-thirties while living in Paris that she searched for her biological mother. What she found instead was shocking: She had an identical twin sister. What's more, after being separated as infants, she and her sister had been, for a time, part of a secret study on separated twins. Paula Bernstein, a married writer and mother living in New York, also knew she was adopted, but had no inclination to find her birth mother. When she answered a call from her adoption agency one spring afternoon, Paula's life suddenly divided into two starkly different periods: the time before and the time after she learned the truth. As they reunite, taking their tentative first steps from strangers to sisters, Paula and Elyse are left with haunting questions surrounding their origins and their separation. And when they investigate their birth mother's past, the sisters move closer toward solving the puzzle of their lives. Praise for *Identical Strangers* "Remarkable . . . powerful . . . [an] extraordinary experience . . . The reader is left to marvel at the reworking of individual identities required by one discovery and then another."—Boston Sunday Globe "Absorbing."—Wired "[A] fascinating memoir . . . Weaving studies about twin science into their personal reflections . . . Schein and Bernstein provide an intelligent exploration of how identity intersects with bloodlines. A must-read for anyone interested in what it means to be a family."—Bust "Identical Strangers has all the heart-stopping drama you'd expect. But it has so much more—the authors' emotional honesty and clear-eyed insights turn this unique story into a universal one. As you accompany the twins on their search for the truth of their birth, you witness another kind of birth—the germination and flowering of sisterly love."—Deborah Tannen, #1 New York Times bestselling author of *You Just Don't Understand* "A transfixing memoir."—Publishers Weekly

**Laura's Ghost** Courtenay Stallings, Sheryl Lee, 2020-10-20 In 1990, the groundbreaking television series *Twin Peaks*, co-created by David Lynch and Mark Frost, opened with a murder mystery when a beautiful homecoming queen, wrapped in plastic, washed up on a cold and rocky beach. Laura Palmer's character began as a plot device that triggered a small town to face its fractured self. But after three seasons and a film, Laura Palmer is no longer just a plot device. Instead of solely focusing on the murderer, like most traditional storytelling at the time, the audience gets to know the victim, a complex young woman who explores her sexuality and endures incredible abuse. *Laura's Ghost: Women Speak About Twin Peaks* is an examination of Laura Palmer's legacy on the 30th anniversary of *Twin Peaks*. Palmer's character was one of the few frank and horrific representations of sexual abuse victims which did not diminish the strength and complexity of the victim. Sheryl Lee, who played Laura Palmer, discusses the challenges of the role and how it has impacted herself as well as women she has met over the years, many of whom are survivors of sexual abuse. The role demanded Lee give all of her vulnerability as an actor to this role. This role is one she cannot escape, one with which she will forever be identified. It's a role that still haunts her today. For many women, this character represents them. Here was a woman who was not just a victim, but who was owning her sexuality as well—a woman coming into her own and discovering her sources of power. This book is a reckoning in which women from the show and community speak about grief, mischief, humor, sexuality, strength, weakness, wickedness, and survival.

He is now retired from an active career in health physics while maintaining his readings in cosmology, relativity, and quantum mechanics. He hopes to bring some of his knowledge of the latest findings in physics to those who are discovering some of these wonders for the first time. *The Anthropology of the Future* Rebecca Bryant, Daniel M. Knight, 2019-03-28 Study of the future is an important new field in anthropology. Building on a philosophical tradition running from Aristotle through Heidegger to Schatzki, this book presents the concept of 'orientations' as a way to study everyday life. It analyses six main

orientations - anticipation, expectation, speculation, potentiality, hope, and destiny - which represent different ways in which the future may affect our present. While orientations entail planning towards and imagining the future, they also often involve the collapse or exhaustion of those efforts: moments where hope may turn to apathy, frustrated planning to disillusion, and imagination to fatigue. By examining these orientations at different points, the authors argue for an anthropology that takes fuller account of the teleologies of action.

**Philosophical Approaches to Cormac McCarthy** Christopher Eagle, 2017-03-27 This book is the first edited collection to explore the role of philosophy in the works of Cormac McCarthy, significantly expanding the scope of philosophical inquiry into McCarthy's writings. There is a strong and growing interest amongst philosophers in the relevance of McCarthy's writings to key debates in contemporary philosophy, for example, debates on trauma and violence, on the relationship between language and world, and the place of the subject within history, temporality, and borders. To this end, the contributors to this collection focus on how McCarthy's writings speak to various philosophical themes, including violence, war, nature, history, materiality, and the environment. Emphasizing the form of McCarthy's texts, the chapters attend to the myriad ways in which his language effects a philosophy of its own, beyond the thematic content of his narratives. Bringing together scholars in contemporary philosophy and McCarthy Studies, and informed by the release of the Cormac McCarthy Papers, the volume reflects on the theoretical relationship between philosophical thinking and literary form. This book will appeal to all scholars working in the rapidly-growing field of McCarthy Studies, Philosophy and Literature, and to philosophers working on a wide range of problems in ethics, aesthetics, epistemology, Philosophy of Nature, and Philosophy of Film across ancient, modern, and contemporary philosophy.

**Mining the Heartland** Erik Kojola, 2023-06-06 A riveting portrait of the cultural struggles and political conflicts of proposed copper-nickel mines in Minnesota's Iron Range. On an unseasonably warm October afternoon in Saint Paul, hundreds of people gathered to protest the construction of a proposed copper-nickel mine in the rural northern part of their state. The crowd eagerly listened to speeches on how the project would bring long-term risks and potentially pollute the drinking water for current and future generations. A year later, another proposed mining project became the subject of a public hearing in a small town near the proposed site. But this time, local politicians and union leaders praised the mine proposal as an asset that would strengthen working-class communities in Minnesota. In many rural American communities, there is profound tension around the preservation and protection of wilderness and the need to promote and profit from natural resources. In *Mining the Heartland*, Erik Kojola looks at both sides of these populist movements and presents a thoughtful account of how such political struggles play out. Drawing on over a hundred ethnographic interviews with people of the region, from members of labor unions to local residents to scientists, Kojola is able to bring this complex struggle over mining to life. Focusing on both pro- and anti-mining groups, he expands upon what this conflict reveals about the way whiteness and masculinity operate among urban and rural residents, and the different ways in which class, race, and gender shape how people relate to the land. *Mining the Heartland* shows the negotiation and conflict between two central aspects of the state's culture and economy: outdoor recreation in the Land of Ten Thousand Lakes and the lucrative mining of the Iron Range.

**One Hundred Years of Socialism** Donald Sassoon, 2010-07-30 On 14 July 1889, the centenary of the French Revolution, socialist parties from all corners of Europe met in Paris. On the same day in the same city, the Exposition Universelle was launched to mark the achievements of capitalist production. The two events symbolized the beginning of the epic struggle between socialism and capitalism in Europe.; In this comprehensive study of a century of socialism, the author traces the fortunes of the political parties of the Left in Western Europe. From the rise of the Bolsheviks to the fall of the Berlin wall, from the Second International through two world wars to the Cold War and the birth of the welfare state, from the working class militancy and student uprisings of the 1960s, through the revival of feminism and the arrival of green politics, to the reluctant embrace of market economics en route to the millennium, Donald Sassoon charts the course of socialism across 14 countries.; He shows that throughout their history the fortunes of socialism and capitalism have been inextricably linked. They have grown up side by side, each one challenging and seeking to destroy, yet nourishing and shaping the other.

The Final Testimony of Raphael Ignatius Phoenix Paul Sussman, 2014-05-22 This page-turner with a difference by multimillion copy bestselling author Paul Sussman is a must-read for anyone looking for something original. 'More than lives up to its promise... it's the first novel Sussman ever wrote, yet the things that made him such a distinctive writer - his boundless imagination, his love of the bizarre, his ability to keep a complex plot bowling along - are already firmly in place. The book is as darkly funny as it is original' - MAIL ON SUNDAY 'A must-read. This deserves to be a classic.' -- \*\*\*\*\* Reader review 'Fantastic. An absolute joy throughout.' -- \*\*\*\*\* Reader review 'If you like Jona Jonasson books then you will get a real kick out of this one!' -- \*\*\*\*\* Reader review

\*\*\*\*\* 'My name is Raphael Ignatius Phoenix and I am a hundred years old - or will be in ten days' time, in the early hours of January 1st, 2000, when I kill myself...' Raphael Ignatius Phoenix has had enough. Born at the beginning of the 20th century, he is determined to take his own life as the old millennium ends and the new one begins. But before he ends it all, he wants to get his affairs in order and put the record straight. Beginning with a fateful first adventure with Emily, the childhood friend who would become his constant companion, Raphael here remembers the multitude of experiences, the myriad encounters and, of course, the ten murders he committed along the way... And so begins one man's wholly unorthodox account of the twentieth century - or certainly his own riotous, often outrageous, somewhat unreliable and undoubtedly singular interpretation of it...

**Arab Brazil** Wail S. Hassan, 2024 Arab-Brazilian relations have been largely invisible to area studies and Comparative Literature scholarship. Arab Brazil is the first book of its kind to highlight the representation of Arab and Muslim immigrants in Brazilian literature and popular culture since the early twentieth century, revealing anxieties and contradictions in the country's ideologies of national identity. Author Wail S. Hassan analyzes these representations in a century of Brazilian novels, short stories, and telenovelas. He shows how the Arab East works paradoxically as a site of otherness (different language, culture, and religion) and solidarity (cultural, historical, demographic, and geopolitical ties). Hassan explores the differences between colonial Orientalism's binary structure of Self/Other, East/West, and colonizer/colonized, on the one hand; and on the other hand Brazilian Orientalism's tertiary structure, which defines the country's

identity in relation to both North and East.
