*The University of Georgia* Thomas G. Dyer,1985-12-01 Thomas G. Dyer's definitive history of the University of Georgia celebrates the bicentennial of the school's founding with a richly varied account of people and events. More than an institutional history, The University of Georgia is a contribution to the understanding of the course and development of higher education in the South. The Georgia legislature in January 1785 approved a charter establishing "a public seat of learning in this state." For the next sixteen years the university's trustees struggled to convert its endowment--forty thousand acres of land in the backwoods--into enough money to support a school. By 1801 the university had a president, a campus on the edge of Indian country, and a few students. Over the next two centuries the small liberal arts college that educated the sons of lawyers and planters grew into a major research university whose influence extends far beyond the boundaries of the state. The course of that growth has not always been smooth. This volume includes careful analyses of turning points in the university's history: the Civil War and Reconstruction, the rise of land-grant colleges, the coming of intercollegiate athletics, the admission of women to undergraduate programs, the enrollment of thousands of World War II veterans, and desegregation. All are considered in the context of what was occurring elsewhere in the South and in the nation.

Musical Creativity in Restoration England Rebecca Herissone,2013 Musical Creativity in Restoration England is the first comprehensive investigation of approaches to creating music in late seventeenth-century England. Understanding creativity during this period is particularly challenging because many of our basic assumptions about composition - such as concepts of originality, inspiration and genius - were not yet fully developed. In adopting a new methodology that takes into account the historical contexts in which sources were produced, Rebecca Herissone challenges current assumptions about compositional processes and offers new interpretations of the relationships between notation, performance, improvisation and musical memory. She uncovers a creative culture that was predominantly communal, and reveals several distinct approaches to composition, determined not by

individuals, but by the practical function of the music. Herissone's new and original interpretations pose a fundamental challenge to our preconceptions about what it meant to be a composer in the seventeenth century and raise broader questions about the interpretation of early modern notation.

*Astrology and Cosmology in Early China* David W. Pankenier, 2013-10-10 The ancient Chinese were profoundly influenced by the Sun, Moon and stars, making persistent efforts to mirror astral phenomena in shaping their civilization. In this pioneering text, David W. Pankenier introduces readers to a seriously understudied field, illustrating how astronomy shaped the culture of China from the very beginning and how it influenced areas as disparate as art, architecture, calendrical science, myth, technology, and political and military decision-making. As elsewhere in the ancient world, there was no positive distinction between astronomy and astrology in ancient China, and so astrology, or more precisely, astral omenology, is a principal focus of the book. Drawing on a broad range of sources, including archaeological discoveries, classical texts, inscriptions and paleography, this thought-provoking book documents the role of astronomical phenomena in the development of the 'Celestial Empire' from the late Neolithic through the late imperial period.

The State of the World's Children 2006 UNICEF., 2005 The 2006 edition of UNICEF's annual report focuses on the millions of children who are most in need of access to essential education, health and protection services, but who are also the hardest to reach and often overlooked by current development programmes. These include children living in the poorest countries and most deprived communities within countries, children who face discrimination on the basis of gender, ethnicity or disability, children caught up in armed conflicts or affected by HIV/AIDS, children who lack a formal identity and who suffer from abuse and exploitation. The report examines the factors which result in their exclusion from current child development programmes and services, and highlights the policy options and actions required to address these challenges, in order to ensure all children benefit from the progress being made to achieve the Millennium Development Goals. Topics discussed include: income disparities and child survival, the marginalisation of Roma communities and their children, disability issues, children and HIV/AIDS, children living on the streets, early marriages, child labour, child protection and child rights.

Fiji International Monetary Fund,1995-02-07 This paper reviews economic developments in Fiji during 1990–95. The reorientation of policies, although incomplete, led to stronger growth of nontraditional exports and non-sugar manufacturing, and to a pickup in GDP growth to an average of 4.1 percent between 1988 and 1993. Fiscal deficits declined in the early 1990s, although often larger than budgeted, and the external current account progressively turned into a surplus position. Despite the actions undertaken, however, private investment did not recover from its slump in the late 1980s impeding the economy from fully exploiting its growth potential.
