Doing Honest Work in College Charles Lipson, 2013-04-01 Since its publication in 2004, *Doing Honest Work in College* has become an integral part of academic integrity and first-year experience programs across the country. This helpful guide explains the principles of academic integrity in a clear, straightforward way and shows students how to apply them in all academic situations—from paper writing and independent research to study groups and lab work. Teachers can use this book to open a discussion with their students about these difficult issues. Students will find a trusted resource for citation help whether they are studying comparative literature or computer science. Every major reference style is represented. Most important of all, many universities that adopt this book report a reduction in cheating and plagiarism on campus. For this second edition, Charles Lipson has updated hundreds of examples and included many new media sources. There is now a full chapter on how to take good notes and use them properly in papers and assignments. The extensive list of citation styles incorporates guidelines from the American Anthropological Association. The result is the definitive resource on academic integrity that students can use every day. “Georgetown’s entering class will discover that we actually have given them what we expect will be a very useful book, *Doing Honest Work in College*. It will be one of the first things students see on their residence hall desks when they move in, and we hope they will realize how important the topic is.”—James J. O’Donnell, Provost, Georgetown University “A useful book to keep on your reference shelf.”—Bonita L. Wilcox, *English Leadership Quarterly*

Emotion in the Human Face Paul Ekman, Wallace V. Friesen, Phoebe Ellsworth, 2013-10-22 *Emotion in the Human Face: Guidelines for Research and an Integration of Findings* reviews research findings about the link between the face and emotion and provides some guidelines for study of this complicated but intriguing phenomenon. Some of the conceptual ambiguities that have hindered research and the methodological decisions that must be made in planning research on the face and emotion are discussed. How past investigators handled these matters is presented critically, and a set of standards is offered. This book is comprised of 21 chapters and begins with an overview of questions about how the face provides information about emotion, with emphasis on evidence based on scientific research (largely in psychology). The reader is then introduced to conceptual ambiguities and methodological decisions related to research on the face-emotion connection (including sampling), along with some important research findings. In particular, emotion categories and dimensions that observers can judge on the basis of facial behavior are analyzed, and whether such judgments can be accurate. The similarities and differences in facial behavior across cultures are also considered, along with the relative contribution of facial behavior and contextual information to the judgment of emotion. This monograph is intended primarily for students of psychology, anthropology, ethology, sociology, and biology, as well as those planning or already conducting research on the face.

Ebola, Culture and Politics: The Anthropology of an Emerging Disease Barry S. Hewlett, Bonnie L. Hewlett, 2008 The case studies in this new, acclaimed series illustrate the great value of anthropology in understanding and addressing problems faced by human societies around the world. Each case study examines an issue of socially recognized importance in the historical, geographical, and cultural context of a particular region of the world and includes comparative analysis to highlight not only the local effects of globalization but also the global dimensions of the issue. With readable narrative styles and an engagement with people that goes beyond that of observer and researcher, these anthropologists describe how their work has implications for advocacy, community action, and policy formation. Lehmberg, Thomas William Heyck, Meredith Veldman, 2016 *The Peoples of the British Isles* examines the conflicts and commonalities among the peoples of England, Ireland, Scotland, and Wales from prehistoric times to the present. The series focuses throughout on the lives of real people—how they made a living, organized their society and institutions, related to each other, and understood themselves and their world. The new edition of these books features a fuller treatment of the Celtic countries and expanded and integrated content on both popular culture and the changing roles of women in society throughout history. Volume I covers the development of the Four Nations of the British Isles from the prehistoric era up to the revolution of 1688.
