**Advances in Powder Metallurgy** Isaac Chang, Yuyuan Zhao, 2013-08-31 Powder metallurgy (PM) is a popular metal forming technology used to produce dense and precision components. Different powder and component forming routes can be used to create an end product with specific properties for a particular application or industry. Advances in powder metallurgy explores a range of materials and techniques used for powder metallurgy and the use of this technology across a variety of application areas. Part one discusses the forming and shaping of metal powders and includes chapters on atomisation techniques, electrolysis and plasma synthesis of metallic nanopowders. Part two goes on to highlight specific materials and their properties including advanced powdered steel alloys, porous metals and titanium alloys. Part three reviews the manufacture and densification of PM components and explores joining techniques, process optimisation in powder component manufacturing and non-destructive evaluation of PM parts. Finally, part four focusses on the applications of PM in the automotive industry and the use of PM in the production of cutting tools and biomaterials. Advances in powder metallurgy is a standard reference for structural engineers and component manufacturers in the metal forming industry, professionals working in industries that use PM components and academics with a research interest in the field. The Crimmigrant Other Katja Franko,2019-12-06 Western societies are immersed in debates about immigration and illegality. This book examines these processes and outlines how the figure of the crimmigrant other has emerged not only as a central object of media and political discourse, but also as a

distinct penal subject connecting migration and the logic of criminalization and insecurity. Illegality defines not only a quality of certain acts, but becomes an existential condition, which shapes the daily lives of large groups within the society. Drawing on rich empirical material from national and international contexts, Katja Franko outlines the social production of the crimmigrant other as a multi-layered phenomenon that is deeply rooted in the intricate connections between law, scientific knowledge, bureaucratic practices, politics and popular discourse.

**Scrupulosity (al-Wara ') in Early Islam** Mateusz

Wilk, 2019-12-31 This book aims to discuss religious scrupulousness (al-wara') - an important phenomenon in Islamic spirituality and tradition in the 3rd/9th century. Through the study of hadith compilations devoted to piety the author tries not only to define the concept of scrupulousness itself, but also to present the world of Muslim scholars who composed these collections of traditions. An important aspect of the book will be a discussion of a possible social impact of religious scrupulousness as well as of its cultural context. Thus, another examined subject will be the link of religious scrupulousness with the Islamic eschatology, as well as with the visions of the Hereafter. On the whole, religious scrupulousness will be analysed as one of the portents of changes occurring in the Islamic society and civilisation in the 3rd/9th century, when new forms of piety are accompanied by apocalyptic fears and anxieties.

**The Family in Question** R. D. Grillo, 2008 The family lives of immigrants and ethnic minority populations have become central to arguments about the right and wrong ways of living in multicultural societies. While the characteristic cultural practices of such families have long been scrutinized by the media and policy makers, these groups themselves are beginning to reflect on how to manage their family relationships. Exploring case studies from Austria, the Netherlands, Norway, Portugal, Spain,

Switzerland, the United Kingdom, and Australia, *The Family in Question* explores how those in public policy often dangerously reflect the popular imagination, rather than recognizing the complex changes taking place within the global immigrant community. In hoeverre allochtonen vrij zijn hun cultuur te uiten in de multiculturele samenleving staat bijna dagelijks ter discussie in de media en politiek. Vaak wordt vergeten dat ook migrantenfamilies zelf worstelen om hun tradities en gebruiken vorm te geven in een pluriforme samenleving waarin relaties met familie zeer complex kunnen zijn. In *The Family Question* worden migrantenfamilies in onder andere Nederland, Oostenrijk en Noorwegen onderzocht. Hieruit blijkt dat spelers op het vlak van beleidsvorming vaak toegeven aan populaire misverstanden over allochtonen en zo bijdragen aan de heersende xenofobie en stereotypering van immigranten.

*Preventing Corporate Accidents* R B Whittingham, 2012-06-25

The passing of the Corporate Manslaughter and Corporate Homicide Bill in the UK and increasing public and investor pressure for good Corporate Governance and Corporate Social Responsibility, means organizations now, more than ever, need to ensure they do all they can to prevent major accidents. However, past experience shows that just implementing safety management systems is not enough and this book makes the case for a more holistic and ethical approach to improving corporate systems as a whole. *Preventing Corporate Accidents* shows how major accidents can result from human error and defects in corporate systems. The book describes accident prevention strategies, from safety culture, safety management systems, foresight and planning to safety regulations, corporate ethics, corporate social responsibility and the learning organization. Barry Whittingham illustrates with

international case studies from various industries how and why these defences have failed in the past, and more importantly, how to strengthen corporate systems to prevent future major accidents. The case studies include: The loss of the space shuttle Columbia Infant heart surgery at Bristol Royal Infirmary The Davis-Besse nuclear power plant incident The fire and explosion at the Conoco-Phillips Humber oil refinery Herald of Free Enterprise and Southall rail accident manslaughter prosecutions This book is essential reading for all those with a professional interest in health and safety management, the control of major risk and accident prevention, in particular for directors, senior managers and health & safety professionals in high-hazard industries and public operations, such as nuclear, chemicals, construction, oil and gas, energy, manufacturing and transportation. Barry Whittingham has worked as a senior manager, design engineer and consultant for the chemical, nuclear, offshore, oil and gas, railway and aviation sectors. He developed a career as a safety consultant specializing in the human factors aspects of accident causation. Barry is a Fellow of the Safety and Reliability Society.

Pioneers Or Pawns? Marina de Regt, 2007-10-22 Marina de Regt provides an invaluable analysis of gender, health care training, and globalization, demonstrating women's positive impact on the complex workings of Yemeni health institutions. Using the Hodeida Urban Primary Health Care Project as a case study, the author looks at how development policies of the state interconnect with agendas of global donor organizations and the employment of women in the face of social disapproval and barriers to advancement. Her highly accessible writing blends keen observations steeped in personal experience, with a thorough grounding in theoretical literature. Through interviews and the experience of working directly with the women she writes about, De Regt gives voice to her subjects and offers an extraordinary portrait of the lives, emotions, and work of women dedicated to healing in a time of great political change. This vitally

important work challenges not only preconceived notions of the way in which health care is distributed in the Middle East, but also questions the way women participate, facilitate, and resist the political change around them.

**Kinship and Continuity** Alison Shaw, 2014-02-04 Kinship and Continuity is a vivid ethnographic account of the development of the Pakistani presence in Oxford, from after World War II to the present day. ### **Chinese Migrant Networks and Cultural Change** Adam

McKeown, 2001-05 Inspired by recent work on diaspora and cultural globalization, Adam McKeown asks in this new book: How were the experiences of different migrant communities and hometowns in China linked together through common networks? Chinese Migrant Networks and Cultural Change argues that the political and economic activities of Chinese migrants can best be understood by taking into account their links to each other and China through a transnational perspective. Despite their very different histories, Chinese migrant families, businesses, and villages were connected through elaborate networks and shared institutions that stretched across oceans and entire continents. Through small towns in Qing and Republican China, thriving enclaves of businesses in South Chicago, broad-based associations of merchants and traders in Peru, and an auspicious legacy of ancestors in Hawaii, migrant Chinese formed an extensive system that made cultural and commercial exchange possible.

### **Migration Control in the North Atlantic World** Andreas

Fahrmeir, Olivier Faron, Patrick Weil, 2005 The migration movements of the 20th century have led to an increased interest in similarly dramatic population changes in the preceding century. The contributors to this volume - legal scholars, sociologists, political scientist and historians - focus on migration control in the 19th century, concentrating on three areas in particular: the impact of the French Revolution on the development of modern citizenship laws and on the development of new forms of migration control in France and elsewhere; the theory and practice of migration control in various European states is examined, focusing on the control of paupers, emigrants and ordinary travelers as well as on the interrelationship between the different administrative levels - local, regional and national - at which migration control was exercised. Finally, on the development of migration control in two countries of immigration: the United States and France. Taken altogether, these essays demonstrate conclusively that the image

of the 19th century as a liberal era during which migration was unaffected by state intervention is untenable and in serious need of revision.

**The Immigrant Threat** Leo Lucassen, 2005 Since the 1980s, anti-immigrant discourse has shifted away from the color of immigrants to their religion and culture, focusing on newcomers from Muslim countries who are feared as terrorists and the products of tribal societies with values fundamentally opposed to those of secular western Europe. Leo Lucassen's *The Immigrant Threat* tackles the question of whether it is reasonable to believe that the integration process of these new immigrants will indeed be fundamentally different in the long run (over multiple generations) from ones experienced by similar immigrant groups in the past.

**Gender and Refugee Status** Thomas Spijkerboer, 2017-03-02 This is the first comprehensive socio-legal study of the interrelation between gender and the law of refugee status. In the past decade, the issue has received increasing attention in academic writing, the media and the courtroom. This book contains an interdisciplinary analysis. The empirical data, collected for this study and not published previously, concerns Dutch asylum practice. The Netherlands is a prominent refugee-receiving country in Europe, yet hardly any English texts address Dutch refugee law. The book also covers foreign case law and academic writing. Therefore, the analysis is relevant for all refugee-receiving countries in the Western world; the empirical data on The Netherlands functions as a case study. The book combines perspectives of post-structuralist feminism and post-colonial studies. Refugee women are constructed as a double other. This intersectionality is related to the construction of the Third World as feminine (passive, in need of active outside intervention etc., etc.). The book provides a comprehensive overview of academic writing and of case law on the subject. On this basis of theoretical perspectives that were almost ignored

until now, it develops an innovative critique of refugee law discourse and outlines its possible consequences for legal doctrine.

*Reproducing the French Race* Elisa Camiscioli, 2009-09-18 In *Reproducing the French Race*, Elisa Camiscioli argues that immigration was a defining feature of early-twentieth-century France, and she examines the political, cultural, and social issues implicated in public debates about immigration and national identity at the time. Camiscioli demonstrates that mass immigration provided politicians, jurists, industrialists, racial theorists, feminists, and others with ample opportunity to explore questions of French racial belonging, France's relationship to the colonial empire and the rest of Europe, and the connections between race and national anxieties regarding depopulation and degeneration. She also shows that discussions of the nation and its citizenry consistently returned to the body: its color and gender, its expenditure of labor power, its reproductive capacity, and its experience of desire. Of paramount importance was the question of which kinds of bodies could assimilate into the "French race." By focusing on telling aspects of the immigration debate, Camiscioli reveals how racial hierarchies were constructed, how gender figured in their creation, and how only white Europeans were cast as assimilable. Delving into pronatalist politics, she describes how potential immigrants were ranked according to their imagined capacity to adapt to the workplace and family life in France. She traces the links between racialized categories and concerns about industrial skills and output, and she examines medico-hygienic texts on interracial sex, connecting those to the crusade against prostitution and the related campaign to abolish "white slavery," the alleged entrapment of (white) women for sale into prostitution abroad. Camiscioli also explores the debate surrounding the 1927 law that first made it possible for French women who married foreigners to keep their French nationality. She concludes by linking the Third Republic's impulse to create

racial hierarchies to the emergence of the Vichy regime.
