Impact of New Media in Tourism Dinis, Maria Gorete, Bonixe, Luís, Lamy, Sónia, Breda, Zélia, 2021-02-19 Tourism consumers are increasingly demanding and seek to base their travel decision-making process on relevant and credible tourism information. In recent years, user-generated content on social media, the opinion of travel bloggers, and entertainment programs in the media have influenced the public's travel purchasing behavior and acted as a driving force for the development of tourism products, such as film tourism. It also has played a role in the evolution and development of marketing, giving rise to new applications, as in the case of digital and influence marketing. On the other hand, tourism organizations and destination management organizations face major challenges in communicating the attributes of a tourism product, since this cannot be experienced before consumption. Thus, they need to know how and in which means or platforms of communication they can inform potential consumers. *Impact of New Media in Tourism* provides theoretical and practical contributions in tourism and communication including current research on the influence of new media and the active role of consumers in tourism. With a focus on decision making and increasing the visibility of products and destinations, the book provides support for tourism agencies and organizations around the world. Covering themes that include digital marketing, social media, and online branding, this book is essential for professionals, academicians, researchers, and students working or studying in the field of tourism and hospitality management, marketing, advertising, and media and communications.

Cruise Business Development Alexis Papathanassis, 2016-04-20 This book addresses innovation management and product development in the cruise tourism industry. It explains how experience management has evolved from a strictly company-level, product- or service-focused tactical task to an industry-wide strategic challenge, and analyses the role of intangible reputational aspects of cruise experiences, as well as peripheral components and stakeholders, as increasingly important factors for customer acquisition and retention. Safety and risk issues are a central theme, as well as the cruise sector's environmental and socio-economic impacts. Lastly, the book considers the increasing size of cruise vessels and the accompanying standardisation of facilities and itineraries, in conjunction with the hybridisation of cruise passengers in connection with expanding the competitive boundaries and intensity of competition in the cruise sector. The book approaches these issues as more than a mere public relations campaign, recognising the fact that they have since become the very essence of strategic cruise business development.
