**Charles S. Peirce and the Linguistic Sign** David A. Pharies, 1985-01-01 This monograph is about the semiotics of lexical signs, and is of particular interest for historical linguists, in particular those interested in etymology. Specialists in linguistic change have long noticed that certain classes of words seem to be in part exempt from regular patterns of sound change, or perhaps more likely to undergo unusual analogical shifts. The problem is far worse for the etymologist, since the lexicon of every language contains some hundreds of semiotically problematic vocables which must, if the etymological dictionaries are ever to be completed, be explained somehow.

Always been struck by the sheer capriciousness of etymologies in which some sort of unusual form-meaning relations are involved, the author, with the help of C.S. Peirce, provides answers to crucial questions in his search to make sense of those capricious etymologies.

**Images of the Divine: The Theology of Icons at the Seventh Ecumenical Council - Revised Edition** Ambrosios Giakalis, 2005-08-01 This book, newly revised and updated, examines the Eastern Church's theology of icons chiefly on the basis of the acta of the Seventh Ecumenical Council of 787. The political circumstances leading to the outbreak of the iconoclast controversy in the eighth century are discussed in detail, but the main emphasis is on the theological arguments and assumptions of the council participants. Major themes include the nature of tradition, the relationship between image and reality, and the place of christology. Ultimately the argument over icons was about the accessibility of the divine. Icons were held by the iconophiles to communicate a deifying grace which raised the believer to participation in the life of God.
