The Vacuum Cleaner Carroll Gantz,2012-09-21 House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

Mrs. Meyer's Clean Home Thelma Meyer,2009-03-02 When Thelma Meyer tells it to you, she tells it straight: Clean the kitchen daily! Don't waste anything (not even the water leftover from those potatoes you just boiled)! Always work hard! This philosophy meant that when Thelma's daughter Monica founded Mrs. Meyer's Clean Day products (named after her mom), the products were designed to work hard for you. Now for the first time, Thelma's sage advice is being made available in this revolutionary cleaning guide chock full of practical tips and secrets based on the premise that life is hectic and messy -- and so keeping your house clean and nice is the only sensible thing to do. With shortcuts and tips for cleaning the kitchen, bathroom, bedroom and living room, MRS MEYER'S CLEAN HOME contains unexpected advice such as: --Never use vinegar and water on wood floors. One part dish soap and four parts water is the only way to truly get them clean. And remember to buff with a terrycloth towel. --Always clean out the fridge before grocery shopping. Serve the kids Musko (must go) for dinner, using the items that were fast approaching expiration. --Wash windows on a cloudy day to avoid the nasty streaking that happens when the sun's out and glass dry too fast. MRS MEYER'S CLEAN HOME is two parts common sense and one part inspiration. Read it and learn how to clean like the dickens.

Clean Production K.B. Misra,2012-12-06 The world has witnessed several revolutions since the dawn of industrial revolution some two centuries ago. During the current century itself, three revolutions in the area of communication, information processing and quality have taken place and each time the standard of living of man improved beyond predictions. But during the same period, the world population has also phenomenally increased dwarfing the gains achieved from the development. Increased level of industrial activity to meet the of humanity has caused irreversible damage to the pristine environment that the demand Earth once had. Economic disparity between the haves and havenots has widened, aggravating the situation further more. Ozone layer depletion, warming up of Earth's atmosphere and the pollution created by uncontrolled industrial activity to gain economic strength are now assuming the proportion of a catastrophe that may eventually threaten the survival of life on Earth. Developed countries blame the Third World countries for the uncontrolled emissions through burning of fossil fuels and for wasting precious resources of energy by using inefficient and uneconomical technologies, while the developed countries are equally responsible for avoidable over-consumption and for the wastage of resources and energy and for not sharing the improved and efficient technologies with the developing countries. Thus the wastage by

both these set of countries continues unabated. After all, resources of the world are finite and are meant to be shared by all its inhabitants.
