Handbook of Terminology Management ,1997

Basic Aspects of Terminology Management ,1997-03-21 The Handbook of Terminology Management is a unique work designed to meet the practical needs of terminologists, translators, lexicographers, subject specialists (e.g., engineers, medical professionals, etc.), standardizers and others who have to solve terminological problems in their daily work. In more than 900 pages, the Handbook brings together contributions from approximately 50 expert authorities in the field. The Handbook covers a broad range of topics integrated from an international perspective and treats such fundamental issues as: practical methods of terminology management; creation and use of terminological tools (terminology databases, on-line dictionaries, etc.); terminological applications. The high level of expertise provided by the contributors, combined with the wide range of perspectives they represent, results in a thorough coverage of all facets of a burgeoning field. The lay-out of the Handbook is specially designed for quick and for cross reference, with hypertext and an extensive index. See also Handbook of Terminology Management set (volumes 1 and 2).

Trends in E-Tools and Resources for Translators and Interpreters ,2017-12-11 Trends in E-Tools and Resources for Translators and Interpreters offers a collection of contributions from key players in the field of translation and interpreting that accurately outline some of the most cutting-edge technologies in this field.

Building and Using Comparable Corpora Serge Sharoff,Reinhard Rapp,Pierre Zweigenbaum,Pascale Fung,2013-12-13 The 1990s saw a paradigm change in the use of corpus-driven methods in NLP. In the field of multilingual NLP (such as machine translation and terminology mining) this implied the use of parallel corpora. However, parallel resources are relatively scarce: many more texts are produced daily by native speakers of any given language than translated. This situation resulted in a natural drive towards the use of comparable corpora, i.e. non-parallel texts in the same domain or genre. Nevertheless, this research direction has not produced a single authoritative source suitable for researchers and students coming to the field. The proposed volume provides a reference source, identifying the state of the art in the field as well as future trends. The book is intended for specialists and students in natural language processing, machine translation and computer-assisted translation.

The Marriage Law of the People's Republic of China China,1982

Illinois Forms for Common Law and Chancery Pleading, Practice and Procedure in County and Probate Courts and in Criminal Cases Edward Regnier Branson,1914

E-Business Essentials Nick Bontis,2004-09-01 This special issue of QJEC marks the final instalment of the journal. The QJEC has had a long-standing history of international scholarship focused on the emerging field of electronic commerce with a broad, interdisciplinary approach. It has established the field's intellectual foundation with state-of-the-art research from business, computer science, engineering, law, psychology, and sociology. This particular issue focuses on an eclectic group of papers that are international in scope with authors from Canada, Australia, France, Germany, South Africa and Italy. The papers range in topics from valuing dot com companies, to mobile health and portals, to supply chain management.

Achieve Planner ,2020-09-06 The Achieve Planer is engineered to help take your largest life goals and reach them. Monthly organization sheets keep you on track and highlight the tools you have to make steps towards your goals. Daily sheets provide reflection space to keep you grounded to the positives each day offers, while including the normal organization space for to-dos, appointments, and notes like other planners. The Achieve Planner is the perfect way to keep life organized, on track, and full of value. The Achieve Planner features a hard cover to ensure it holds up to heavy use and is small enough to carry handy; fitting in most handbags.

Recent Advances in Computational Terminology Didier Bourigault,Christian Jacquemin,Marie-Claude L'Homme,2001-06-15 This first collection of selected articles from researchers in automatic analysis, storage, and use of terminology, and specialists in applied linguistics, computational linguistics, information retrieval, and artificial intelligence offers new insights on computational terminology. The recent needs for intelligent information access, automatic query translation, cross-lingual information retrieval, knowledge management, and document handling have led practitioners and engineers to focus on automated term handling. This book offers new perspectives on their expectations. It will be of interest to terminologists, translators, language or knowledge engineers, librarians and all others dependent on the automation of terminology processing in professional practices. The articles cover themes such as automatic thesaurus construction, automatic term acquisition, automatic term translation, automatic indexing and abstracting, and computer-aided knowledge acquisition. The high academic standing of the contributors together with their experience in terminology management results in a set of contributions that tackle original and unique scientific issues in correlation with genuine applications of terminology processing.
