Advanced Image and Video Processing Using MATLAB Shengrong Gong, Chunping Liu, Yi Ji, Baojiang Zhong, Yonggang Li, Husheng Dong, 2018-08-21 This book offers a comprehensive introduction to advanced methods for image and video analysis and processing. It covers deraining, dehazing, inpainting, fusion, watermarking and stitching. It describes techniques for face and lip recognition, facial expression recognition, lip reading in videos, moving object tracking, dynamic scene classification, among others. The book combines the latest machine learning methods with computer vision applications, covering topics such as event recognition based on deep learning, dynamic scene classification based on topic model, person re-identification based on metric learning and behavior analysis. It also offers a systematic introduction to image evaluation criteria showing how to use them in different experimental contexts. The book offers an example-based practical guide to researchers, professionals and graduate students dealing with advanced problems in image analysis and computer vision.

PIC in Practice David W Smith, 2006-01-16 PIC in Practice is a graded course based around the practical use of the PIC microcontroller through project work. Principles are introduced gradually, through hands-on experience, enabling students to develop their understanding at their own pace. Dave Smith has based the book on his popular short courses on the PIC for professionals, students and teachers at Manchester Metropolitan University. The result is a graded text, formulated around practical exercises, which truly guides the reader from square one. The book can be used at a variety of levels and the carefully graded projects make it ideal for colleges, schools and universities. Newcomers to the PIC will find it a painless introduction, whilst electronics hobbyists will enjoy the practical nature of this first course in microcontrollers. PIC in Practice introduces applications using the popular 16F84 device as well as the 16F627, 16F877, 12C508, 12C629 and 12C675. In this new edition excellent coverage is given to the 16F818, with additional information on writing and documenting software. Gentle introduction to using PICs for electronic applications Principles and programming introduced through graded projects Thoroughly up-to-date with new chapters on the 16F818 and writing and documenting programs

Energy and the Environment James A. Fay, D. Golomb, 2002 In an age of mounting energy crises, James A. Fay and Dan S. Golomb's *Energy and the Environment* offers a timely treatment of a critical problem in urban-industrial societies: the worldwide growth of energy use and the destructive relationship between this energy use and environmental degradation. This comprehensive text provides the scientific and technological background for understanding how our ever-increasing use of energy threatens the natural environment at local, regional, and global scales and how this threat could be mitigated by more efficient use of conventional energy sources and their replacement by renewable energy sources. Designed for upper-level undergraduate and first-year graduate students, *Energy and the Environment* is essential reading for students and professionals in energy and environmental sciences and technology. Features · Describes energy technologies and their effectiveness in transforming fossil, nuclear, and renewable energy into useful mechanical or electrical power · Emphasizes the generation of electric power and the technological improvements that increase power generation efficiency and reduce air pollutant emissions from power plants · Examines the use of energy in the transportation sector and how vehicle design and engine efficiency improvements could reduce fuel use and pollutant emissions · Objectively surveys the field of renewable energy technologies and the prospects of increasing the share of renewable energy among all energy sources · Analyzes the energy sources of toxic emissions to air, water, and land and their effects on environmental quality at local and regional scales · Examines global climate change, energy consumption's contribution to it, and the salient technologies being developed to mitigate this effect · Equips engineering majors, science majors, and professionals with the basic facts needed to develop solutions to these pressing environmental problems

PIC Microcontroller and Embedded Systems Muhammad Ali Mazidi, Danny Causey, Rolin McKinlay, 2016-08-16 The PIC microcontroller from Microchip is one of the most widely used 8-bit microcontrollers in the world. In this book, the authors use a step-by-step and systematic approach to show the programming of the PIC18 chip. Examples in both Assembly language and C show how to program many of the PIC18 features such as timers, serial communication, ADC, and SPI.

They Marched Into Sunlight David Maraniss, 2003-10-14 David Maraniss tells the epic story of Vietnam and the sixties through the events of a few gripping, passionate days of war and peace in October 1967. With meticulous and captivating detail, *They Marched Into Sunlight* brings that catastrophic time back to life while examining questions about the meaning of dissent and the official manipulation of truth—issues that are as relevant today as they were decades ago. In a seamless narrative, Maraniss weaves together the stories of three very different worlds: the death and heroism of soldiers in Vietnam, the anger and anxiety of antiwar students back home, and the confusion and obfuscating behavior of officials in Washington. To understand what happens to the people in these interconnected stories is to understand America's anguish. Based on thousands of primary documents and 180 on-the-record interviews, the book describes the battles that evoked cultural and political conflicts that still reverberate.

Introduction to Multimodal Analysis Per Ledin, David Machin, 2020-01-09 *Introduction to Multimodal Analysis* is a unique and accessible textbook that critically explains this ground-breaking approach to visual analysis. Now thoroughly revised and updated, the second edition reflects the most recent developments in theory and shifts in communication, outlining the tools for analysis and providing a clear model that students can follow. Chapters on colour, typography, framing and composition contain fresh, contemporary examples, ranging from product packaging and website layouts to film adverts and public spaces, showing how design elements make up a visual language that is used to communicate with the viewer. The book also includes two new chapters on texture and diagrams, as well as a helpful image index so students can clearly understand how images and multimodal texts can be analysed from different perspectives. Featuring chapter summaries, student activities and a companion website hosting all images in full colour, this new edition remains an essential guide for students studying multimodality within visual communication in linguistics,

media and cultural studies, critical discourse analysis or journalism studies.

The Visual Story Bruce Block,2013-04-02 If you can't make it to one of Bruce Block's legendary visual storytelling seminars, then you need his book! Now in full color for the first time, this best-seller offers a clear view of the relationship between the story/script structure and the visual structure of a film, video, animated piece, or video game. You'll learn how to structure your visuals as carefully as a writer structures a story or a composer structures music. Understanding visual structure allows you to communicate moods and emotions, and most importantly, reveals the critical relationship between story structure and visual structure. The concepts in this book will benefit writers, directors, photographers, production designers, art directors, and editors who are always confronted by the same visual problems that have faced every picture maker in the past, present, and future.
