📖 **Speech Enhancement** Shoji Makino, Jingdong Chen, 2005-03-17 We live in a noisy world! In all applications (telecommunications, hands-free communications, recording, human-machine interfaces, etc) that require at least one microphone, the signal of interest is usually contaminated by noise and reverberation. As a result, the microphone signal has to be cleaned with digital signal processing tools before it is played out, transmitted, or stored. This book is about speech enhancement. Different well-known and state-of-the-art methods for noise reduction, with one or multiple microphones, are discussed. By speech enhancement, we mean not only noise reduction but also dereverberation and separation of independent signals. These topics are also covered in this book. However, the general emphasis is on noise reduction because of the large number of applications that can benefit from this technology. The goal of this book is to provide a strong reference for researchers, engineers, and graduate students who are interested in the problem of signal and speech enhancement. To do so, we invited well-known experts to contribute chapters covering the state of the art in this focused field.

📖 **Federal Funding of Astronomical Research** National Research Council, Commission on Physical Sciences, Mathematics, and Applications, Space Studies Board, Board on Physics and Astronomy, Committee on Astronomy and Astrophysics, 2000-01-01 The Committee on Astronomy and Astrophysics (CAA), at its meeting on September 8, 1997, was briefed on the legislative report accompanying the bill to authorize appropriations for fiscal years 1998 and 1999 for the National Science Foundation (NSF). The report raised a number of questions about trends in support for research in astronomy and the overall robustness of the programs providing that support. At its meeting, the CAA heard the views of NSF and the National Aeronautics and Space Administration (NASA) on these issues. In consultation with the Board on Physics and Astronomy, the Space Studies Board, and representatives of NASA and NSF, the committee accepted the task of studying three of the questions raised by the House Science Committee (HSC). It was intended that the results of the study would help guide federal support of basic research for the next decade and serve as analytical input to the new 2000 decadal survey of the Astronomy and Astrophysics Survey Committee (AASC). The study would not offer specific funding recommendations, but rather would provide a background analysis of the alignment between available resources, agency priorities, and the vitality of the basic research program.

📖 **In League with a UFO** Lou Baldin, 2009-03 The alien ship recovered in Roswell, New Mexico in 1947, was filled with alien gadgetry. The gadgetry or spawn, as some of the covert operators called the alien things, infested the crashed flying saucer. The alien spawn had magical and bizarre qualities with Vietnamese tendencies. The gadgets served as tools and medical instruments and seemingly possessed personalities of their own. In their attempts to better understand the extraterrestrial menace Vietnamese sitting Earth, the covert committee performed extensive experiments on humans using the alien gadgets.

📖 **Make Your Own Sunshine** Janice Dean, 2021-03-02 The New York Times bestselling author and Fox News senior meteorologist Janice Dean returns with more inspiring stories of people who know how to find light in dark times. While the news is filled with villains and villainy, we do see a few famous heroes now and again. But what about the everyday heroes? The people going out of their way bring a little love into someone else's life? They deserve a time in the spotlight to inspire us all. Life can be tough—but it helps to know other people have come through hard times with a smile on their face. In Make Your Own Sunshine, Janice Dean shares inspiring stories that will lift your spirit and touch your heart. Good people are all around us doing selfless deeds, from a firefighter who bravely battled for his colleague's health after 9/11 to a good Samaritan who secretly pays for the coffees of everyone in line behind him. You can't help but smile reading about the teacher who cut her hair to make her student feel better. And you may shed a tear when you hear the story of the dad who never missed writing a napkin note for his daughter, including stashing extra notes in case he lost his battle with cancer. From a young man who makes bow ties for dogs waiting to be adopted to an Uber driver who brightened a new mom's day by helping her buy baby clothes, the heroes in this story will warm your heart and stick in your mind. Janice has made it her mission to uncover and document these good stories to inspire us and gives us a much-needed boost of optimism. All we have to do is open our minds and our hearts, to look for the light on a cloudy day. Because as she reminds us, if we don't make our own sunshine—who will?

📖 **Homeless Heritage** Rachael Kiddey, 2017 Homeless Heritage describes the process of using archaeological methodologies to collaboratively document how contemporary homeless people use and experience the city. Drawing on fieldwork undertaken in Bristol and York, the book first describes the way in which archaeological methods and theory have come to be usefully applied to the contemporary world, before exploring the historical development of the concept of homelessness. Working with homeless people, the author undertook surveys and two excavations of contemporary homeless sites, and the team co-curated two public heritage exhibitions - with surprising results. Complementing a growing body of literature that details how collaborative and participatory heritage projects can give voice to marginalised groups, Homeless Heritage details what it means to be homeless in twenty-
