Google and the Culture of Search Ken Hillis, Michael Petit, Kylie Jarrett, 2013 Google and the Culture of Search examines the role of search technologies in shaping the contemporary digital and informational landscape. Ken Hillis and Michael Petit shed light on a culture of search in which our increasing reliance on search engines like Google, Yahoo! and Bing influences the way we navigate Web content--and how we think about ourselves and the world around us, online and off. Even as it becomes the number one internet activity, the very ubiquity of search technology naturalizes it as utilitarian and transparent--an assumption that Hillis and Petit explode in this innovative study. Commercial search engines supply an infrastructure that impacts the way we locate, prioritize, classify, and archive information on the Web, and as these search functionalities continue to make their way into our lives through mobile, GPS-based platforms and personalized results, distinctions between the virtual and the real collapse. Google--a multibillion-dollar global corporation--holds the balance of power among search providers, and the biases and individuating tendencies of its search algorithm undeniably shape our collective experience of the internet and our assumptions about the location and value of information. Google and the Culture of Search explores what is at stake for an increasingly networked culture in which search technology is a site of knowledge and power. This comprehensive study of search technology's broader implications for knowledge production and social relations is an indispensable resource for students and scholars of Internet and new media studies, the digital humanities, and information technology--

The VR Book Jason Jerald, 2015-09-01 Virtual reality (VR) potentially provides our

minds with direct access to digital media in a way that at first seems to have no limits. However, creating compelling VR experiences is an incredibly complex challenge. When VR is done well, the results are brilliant and pleasurable experiences that go beyond what we can do in the real world. When VR is done badly, not only is the system frustrating to use, but sickness can result. Reasons for bad VR are numerous; some failures come from the limitations of technology, but many come from a lack of understanding perception, interaction, design principles, and real users. This book discusses such issues, focusing upon the human element of VR rather than technical implementation, for if we do not get the human element correct, then no amount of technology will make VR anything more than an interesting tool confined to research laboratories. Even when VR principles are fully understood, first implementations are rarely novel and never ideal due to the complex nature of VR and the countless possibilities. However, the VR principles discussed within enable us to intelligently experiment with the rules and iteratively design towards innovative experiences.

Collecting Old Photographs Margaret E. Haller, 1978

In League with a UFO Lou Baldin, 2009-03 The Alien ship recovered in Roswell, New Mexico in 1947, was filled with Alien gadgetry. The gadgetry or spawn, as some of the covert operators called the Alien things, infested the crashed flying saucer. The Alien spawn had magical and bizarre qualities with eVietnamesel tendencies. The gadgets served as tools and medical instruments and seemingly possessed personalities of their own. In their attempts to better understand the extraterrestrial menace Vietnamesesiting Earth, the covert committee performed extensive experiments on humans using the Alien gadgets.

Homeless Heritage Rachael Kiddey, 2017 *Homeless Heritage* describes the process of using archaeological methodologies to collaboratively document how contemporary homeless people use and experience the city. Drawing on fieldwork undertaken in Bristol and York, the book first describes the way in which archaeological methods and theory have come to be usefully applied to the contemporary world, before exploring the historical development of the concept of homelessness. Working with homeless people, the author undertook surveys and two excavations of contemporary homeless sites, and the team co-curated two public heritage exhibitions - with surprising results. Complementing a growing body of literature that details how collaborative and participatory heritage projects can give voice to marginalised groups, *Homeless Heritage* details what it means to be homeless in twenty-

Augmented Reality in Educational Settings, 2019-11-11 This book is intended to provide teachers and researchers with a wide range of ideas from researchers working to integrate the new technology of Augmented Reality into educational settings and processes.

Archaeogaming Andrew Reinhard, 2018-06-18 Video games exemplify contemporary material objects, resources, and spaces that people use to define their culture. Video games also serve as archaeological sites in the traditional sense as a place, in which evidence of past activity is preserved and has been, or may be, investigated using the discipline of archaeology, and which represents a part of the archaeological record. This book serves as a general introduction to archaeogaming; it describes the intersection of archaeology and video games and applies archaeological method and theory into understanding game-spaces as both site and artifact.

100 Words To Make You Sound Smart American Heritage Dictionaries,2006-10-04 Find the right words to make a point, seal the deal, or just keep folks listening! Chosen by the editors of the American Heritage Dictionaries, these words can help anyone who wants to be a more compelling communicator—as a worker, consumer, advocate, friend, dinner companion, or even romantic prospect. The book includes a colorful variety of words, including handy words of just one syllable (such as glib) and words derived from the names of famous people (such as Freudian slip and Machiavellian). There are expressions from popular culture (Catch-22) and words that date back to classical civilization (spartan and stoic). Each word is clearly defined and shown in context with quotations from magazines, newspapers, broadcast media, movies, and television. For many words, quotations from distinguished authors and speakers are also given and word histories are explained. 100 Words to Make You Sound Smart provides an enjoyable way to communicate more effectively, distinctively, and articulately.

Black Feminist Archaeology Whitney Battle-Baptiste,2011-07 Whitney Battle-Baptiste outlines the basic tenets of Black feminist thought for archaeologists and shows how it can be used to improve historical archaeological practice.

Harvey's Lake F. Charles Petrillo,1991

Museum Communication and Social Media Kirsten Drotner,Kim Christian Schrøder,2014-03-14 Visitor engagement and learning, outreach, and inclusion are concepts that have long dominated professional museum discourses. The recent rapid uptake of various forms of social media in many parts of the world, however, calls for a reformulation of familiar opportunities and obstacles in museum debates and practices.

Young people, as both early adopters of digital forms of communication and latecomers to museums, increasingly figure as a key target group for many museums. This volume presents and discusses the most advanced research on the multiple ways in which social media operates to transform museum communications in countries as diverse as Australia, Denmark, Germany, Norway, the UK, and the United States. It examines the socio-cultural contexts, organizational and education consequences, and methodological implications of these transformations.

3D Printing Projects DK, 2017-10-03 From a simple desk tidy to an elaborate castle, this step-by-step guide to 3D printing is perfect for children and beginners who want to learn how to design and print anything even if they do not own a printer. 3D Printing Projects provides an introduction to the exciting and ever-expanding world of 3D designing and printing. Learn how a 3D printer works and the different types of 3D printers on the market. Understand the basic 3D printing and designing terms, how to create and prepare files for printing, and also how to scan things to create a 3D model! You will also find out the common troubles faced while 3D printing and simple tricks to fix them. All the projects included in the book can be made using freely available online 3D modeling/CAD programs. Each project has a print time, details of filament or material needed, and a difficulty rating - from easy for beginners to difficult for those looking for a new challenge. Step-by-step instructions walk you through the 3D design process, from digital modeling and sculpting to slicing, printing, and painting so that children can make their own shark-shaped phone stand, customized lamps, and much more. The book also gives inspiration to further enhance your projects once you've mastered the basics. Join the 3D printing revolution

UFOs IN THE YEAR OF THE DRAGON Lou Baldin, 2016-11-21 An entity, a man, comes to earth from a higher dimension and experiences life as a human. He has a continuing relationship and contact with higher Alien beings throughout his childhood and again during his military years. Consequently, military coverts and black ops who know about this Alien intruder have an interest in him, and employ him in secret military and government projects.

A Day with an Extraterrestrial Lou Baldin, 2008-06-28 Based on a true story. A man's encounter with an extraterrestrial being breaks down the illusions of life and the institutions that govern such illusions, such as religion, science, and governmental sovereignty. The information is eye and mind opening and filled with the realities that intelligent life on earth is simply one planet out of billions that exist in the Milky Way galaxy, which is teeming with similar and much more exotic, super being, type life forms. The earth is not flat, it is not the center of the universe, and certainly is not unique in any way, shape, or form.

E-Business Essentials Nick Bontis, 2004-09-01 This special issue of QJEC marks the final instalment of the journal. The QJEC has had a long-standing history of international scholarship focused on the emerging field of electronic commerce with a broad, interdisciplinary approach. It has established the field's intellectual foundation with state-of-the-art research from business, computer science, engineering, law, psychology, and sociology. This particular issue focuses on an eclectic group of papers that are international

in scope with authors from Canada, Australia, France, Germany, South Africa and Italy. The papers range in topics from valuing dot com companies, to mobile health and portals, to supply chain management.

Special Relativity and Motions Faster than Light Moses Fayngold, 2008-09-08

While the theory of special relativity is often associated with the idea of traveling faster than light, this book shows that in all these cases subtle forces of nature conspire to prevent these motions being harnessed to send signals faster than the speed of light. The author tackles these topics both conceptually, with minimal or no mathematics, and quantitatively, making use of numerous illustrations to clarify the discussion. The result is a joy to read for both scientists familiar with the subject and laypeople wishing to understand something of special relativity.
