Integrated approaches to health Simon R. Rüegg,Barbara Häsler,Jakob Zinsstag,2023-09-14 One Health addresses health challenges arising from the intertwined spheres of humans, animals and ecosystems. This handbook is the product of an interdisciplinary effort to provide science-based guidance for the evaluation of One Health and other integrated approaches to health. It guides the reader through a systems approach and framework to evaluate such approaches in a standardised way. It provides an overview of concepts and metrics from health and life sciences, social sciences, economics, and ecology that are relevant for the evaluation of the processes involved, as well as the characterisation of expected and unexpected outcomes of One Health initiatives. Finally, the handbook provides guidance and practical protocols to help plan and implement evaluations in order to generate new insights and provide meaningful information about the value of One Health. The handbook is intended for practitioners, researchers, evaluators as well as funders of integrated approaches to health and beyond.

Geospatial Thinking Marco Painho,Maribel Yasmina Santos,Hardy Pundt,2010-07-20 For the fourth consecutive year, the Association of Geographic Infor- tion Laboratories for Europe (AGILE) promoted the edition of a book with the collection of the scientific papers that were submitted as full-papers to the AGILE annual international conference. Those papers went through a th competitive review process. The 13 AGILE conference call for fu- papers of original and unpublished fundamental scientific research resulted in 54 submissions, of which 21 were accepted for publication in this - lume (acceptance rate of 39%). Published in the Springer Lecture Notes in Geoinformation and Car- th graphy, this book is associated to the 13 AGILE Conference on G- graphic Information Science, held in 2010 in Guimarães, Portugal, under the title "Geospatial Thinking". The efficient use of geospatial information and related technologies assumes the knowledge of concepts that are fundamental components of Geospatial Thinking, which is built on reasoning processes, spatial conc- tualizations, and representation methods. Geospatial Thinking is associated with a set of cognitive skills consisting of several forms of knowledge and cognitive operators used to transform, combine or, in any other way, act on that same knowledge. The scientific papers published in this volume cover an important set of topics within Geoinformation Science, including: Representation and Visualisation of Geographic Phenomena; Spatiotemporal Data Analysis; Geo-Collaboration, Participation, and Decision Support; Semantics of Geoinformation and Knowledge Discovery; Spatiotemporal Modelling and Reasoning; and Web Services, Geospatial Systems and Real-time Appli- tions.

Marine Anthropogenic Litter Melanie Bergmann,Lars Gutow,Michael Klages,2015-06-01 This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of efficient management strategies. This book addresses scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public.

One of Hello Giggles's Most Anticipated Books of 2019 to Add to Your Reading List! "Just when I thought I knew everything about Tan, he hits me with this. His story is so heartwarming, and wickedly funny." —Antoni Porowski In this heartfelt, funny, and touching memoir, one of the stars of Netflix's Emmy Award-winning smash-hit Queer Eye reveals how an Englishman raised in a traditionally religious home became a fashion icon—and the first openly gay, South Asian man on television—simply by

being Naturally Tan. In this heartfelt, funny, touching memoir, Tan France tells his origin story for the first time. With his trademark wit, humor, and radical compassion, Tan reveals what it was like to grow up gay in a traditional South Asian family, as one of the few people of color in South Yorkshire, England. He illuminates his winding journey of coming of age, finding his voice (and style!), and marrying the love of his life—a Mormon cowboy from Salt Lake City. From one of the stars of Netflix's runaway hit show Queer Eye, Naturally Tan is so much more than fashion dos and don'ts—though of course Tan can't resist steering everyone away from bootcut jeans! Full of candid observations about U.S. and U.K. cultural differences, what he sees when you slide into his DMs, celebrity encounters, and the behind-the-scenes realities of "reality TV," Naturally Tan gives us Tan's unique perspective on the happiness to be found in being yourself. In Tan's own words, "The book is meant to spread joy, personal acceptance, and most of all understanding. Chapters deal with the growth of this form of map distribution, uses in education, privacy issues, and technical aspects from the point of view of the map provider - including Internet protocols such as XML and SVG. Many see the Internet as a revolution for cartography. Previously tied to the medium of paper and expensive large-format color print technology, maps had a limited distribution and use. The Internet made it possible to not only distribute maps to a much larger audience but also to incorporate interaction and animation in the display. Maps have also become timelier with some maps of traffic and weather being updated every few minutes. In addition, it is now possible to access maps from servers throughout the world. Finally, the Internet has made historic maps available for viewing to the public that were previously only available in map libraries with limited access. * Provides comprehensive coverage of maps and the internet * Delivers a global perspective * Combines theoretical and practical aspects
