Rewiring Education John D. Couch,2023-01-03 What if we could unlock the potential in every child? As it turns out, we can. Apple's iconic cofounder Steve Jobs had a powerful vision for education: employing technology to make an enormous impact on the lives of millions of students. To realize this vision, Jobs tapped John D. Couch, a trusted engineer and executive with a passion for education. Couch believed the real purpose of education was to help children discover their unique potential and empower them to reach beyond their perceived limitations. Today, technology is increasingly integrated into every aspect of our lives, rewiring our homes, our jobs, and even our brains. Most important, it presents an opportunity to rewire education to enrich and strengthen our schools, children, and society In Rewiring Education, Couch shares the professional lessons he's learned during his 50-plus years in education and technology. He takes us behind Apple's major research study, Apple Classrooms of Tomorrow (ACOT), and its follow-up (ACOT 2), highlighting the powerful effects of the Challenge-Based Learning framework. Going beyond Apple's walls, he also introduces us to some of the most extraordinary parents, educators, and entrepreneurs from around the world who have ignored the failed promises of memorization and, instead, utilize new science-backed methods and technologies that benefit all children, from those who struggle to honor students. Rewiring Education presents a bold vision for the future of education, looking at promising emerging technologies and how we—as parents, teachers, and voters—can ensure children are provided with opportunities and access to the relevant, creative, collaborative, and challenging learning environments they need to succeed.

Custodians of the Internet Tarleton Gillespie,2018-06-26 A revealing and gripping investigation into how social media platforms police what we post online—and the large societal impact of these decisions Most users want their Twitter feed, Facebook page, and YouTube comments to be free of harassment and porn. Whether faced with "fake news" or livestreamed violence, "content moderators"—who censor or promote user†'posted content—have never been more important. This is especially true when the tools that social media platforms use to curb trolling, ban hate speech, and censor pornography can also silence the speech you need to hear. In this revealing and nuanced exploration, award†'winning sociologist and cultural observer Tarleton Gillespie provides an overview of current social media practices and explains the underlying rationales for how, when, and why these policies are enforced. In doing so, Gillespie highlights that content moderation receives too little public scrutiny even as it is shapes social norms and creates consequences for public discourse, cultural production, and the fabric of society. Based on interviews with content moderators, creators, and consumers, this accessible, timely book is a must†'read for anyone who's ever clicked "like" or "retweet."

Introducing .NET 4.5 Alex Mackey,William Stewart Tulloch,Mahesh Krishnan,2012-11-27 Microsoft has introduced a large number of changes to the way that the .NET Framework operates. Familiar technologies have being altered, best practices replaced, and developer methodologies adjusted. Many developers find it hard to keep up with the pace of change across .NET's ever-widening array of technologies. The introduction of Windows 8 and its new style of applications only compounds the problem. You may know what's happening in C#, but what about the latest innovations in the cloud? How is that going to affect your work? What possibilities do the new async capabilities bring? What you need is a roadmap. A guide to help you see the innovations that matter and to give you a head start on the opportunities available in the new framework. Introducing .NET 4.5 is designed to provide you with just that roadmap. It serves as a no-nonsense primer that will help experienced .NET developers understand the impact of the new framework and the technologies that co-exist with it. This book will keep you updated on the changes and help you to seize new opportunities confidently and quickly.

Hearts and Mines Tanner Mirrlees,2016-01-15 The US security state is everywhere in cultural products: in army-supported news stories, TV shows, and video games; in CIA-influenced blockbusters and comics; and in State Department ads, broadcasts, and websites. Hearts and Mines examines the rise and reach of the US Empire's culture industry – a nexus between the US's security state and media firms and the source of cultural products that promote American strategic interests around the world. Building on Herbert I. Schiller's classic study of US Empire and communications, Tanner Mirrlees interrogates the symbiotic geopolitical and economic relationships between the US state and media firms that drive the production of imperial culture.

Education to Better Their World Marc Prensky,2016 In his most visionary book, internationally renowned educator Marc Prensky presents a compelling alternative to how and what we teach our children. Drawing on emerging world trends, he elaborates a comprehensive vision for K–12 education that includes new goals, new means, a new curriculum, a new kind of teaching, and a new use of technology. "Marc Prensky—one of the smartest people working in educational reform today—offers us a lucid, inspiring, optimistic, doable, and crucial blueprint for how we can build a future with the schools children desperately need in our modern, high-risk, highly complex, fast-changing, and imperiled world." —James Paul Gee, Mary Lou Fulton Presidential Professor of Literacy Studies, Regents' Professor, Arizona State University "Marc Prensky was always ahead of his time. Education to better their world continues this trend in spades. This book is a goldmine and a powerful wakeup call that the future is already here—in pockets right now but a harbinger of what is rapidly emerging. Read the book and make yourself part of the future today. As we are finding in our own work, students are agents of change—in pedagogy, in learning environments, and of society itself. Exciting possibilities await!" —Michael Fullan, Professor Emeritus, OISE/University of Toronto "Marc Prensky's answer to the question 'What is the purpose of education?'—that education should now empower youth to

improve their communities and the world—would unleash the energy, creativity, and compassion of students and teachers in ways we have never imagined. We need the better world Prensky envisions and we need it now." —Milton Chen, The George Lucas Educational Foundation "Prensky offers perhaps the most compelling case and model yet articulated by anyone for today's globally-empowered children. A must-read book for all educators and anyone who cares about education." —James Tracey, Head of School, Rocky Hill School, RI "Wow. As a takeaway it is good—very good." —John Seeley Brown "A great book. Filled with 'food for thought', common sense, provocative ideas and fun to read." —Nieves Segovia, Presidenta, Institucion Educativa SEK (SEK International Schools)

Beginning NFC Tom Igoe,Don Coleman,Brian Jepson,2014-01-14 Jump into the world of Near Field Communications (NFC), the fast-growing technology that lets devices in close proximity exchange data, using radio signals. With lots of examples, sample code, exercises, and step-by-step projects, this hands-on guide shows you how to build NFC applications for Android, the Arduino microcontroller, and embedded Linux devices. You'll learn how to write apps using the NFC Data Exchange Format (NDEF) in PhoneGap, Arduino, and node.js that help devices read messages from passive NFC tags and exchange data with other NFC-enabled devices. If you know HTML and JavaScript, you're ready to start with NFC. Dig into NFC's architecture, and learn how it's related to RFID Write sample apps for Android with PhoneGap and its NFC plugin Dive into NDEF: examine existing tag-writer apps and build your own Listen for and filter NDEF messages, using PhoneGap event listeners Build a full Android app to control lights and music in your home Create a hotel registration app with Arduino, from check-in to door lock Write peer-to-peer NFC messages between two Android devices Explore embedded Linux applications, using examples on Raspberry Pi and BeagleBone

Carry This Message Joe McQ,2015-01-01 "Having had a spiritual awakening as the result of these Steps, we tried to carry this message to others, and to practice these principles in all our affairs." -STEP 12 of the TWELVE STEPS Sponsorship is a key construct in A. A. and other Twelve Step groups, and the twelfth step is the foundation of the sponsorship dynamic essential to recover – both for the sponsor and the sponsoree. This book addresses the concern of many in the A. A. community that sponsors have lost some skills in working with alcoholics. By offering tools for helping others find recovery and new life through the Twelve Step program, Joe McQ has created a guide for sponsors to use in working with others. By refocusing his readers on the Big Book, the Twelve Steps, and their message, McQ appeals for a return to the roots and essence of the A. A. program. Moreover, he issues a strong call to action, for return to the fullness and the integrity of the miraculous recovery program.

Passive Macromodeling Stefano Grivet-Talocia,Bjorn Gustavsen,2015-12-07 Offers an overview of state of the art passive macromodeling techniques with an emphasis on black-box approaches This book offers coverage of developments in linear macromodeling, with a focus on effective, proven methods. After starting with a definition of the fundamental properties that must characterize models of physical systems, the authors discuss several prominent passive macromodeling algorithms for lumped and distributed systems and compare them under accuracy, efficiency, and robustness standpoints. The book includes chapters with standard background material (such as linear time-invariant circuits and systems, basic discretization of field equations, state-space systems), as well as appendices collecting basic facts from linear algebra, optimization templates, and signals and transforms. The text also covers more technical and advanced topics, intended for the specialist, which may be skipped at first reading. Provides coverage of black-box passive macromodeling, an approach developed by the authors Elaborates on main concepts and results in a mathematically precise way using easy-to-understand language Illustrates macromodeling concepts through dedicated examples Includes a comprehensive set of end-of-chapter problems and exercises Passive Macromodeling: Theory and Applications serves as a reference for senior or graduate level courses in

electrical engineering programs, and to engineers in the fields of numerical modeling, simulation, design, and optimization of electrical/electronic systems. Stefano Grivet-Talocia, PhD, is an Associate Professor of Circuit Theory at the Politecnico di Torino in Turin, Italy, and President of IdemWorks. Dr. Grivet-Talocia is author of over 150 technical papers published in international journals and conference proceedings. He invented several algorithms in the area of passive macromodeling, making them available through IdemWorks. Bjørn Gustavsen, PhD, is a Chief Research Scientist in Energy Systems at SINTEF Energy Research in Trondheim, Norway. More than ten years ago, Dr. Gustavsen developed the original version of the vector fitting method with Prof. Semlyen at the University of Toronto. The vector fitting method is one of the most widespread approaches for model extraction. Dr. Gustavsen is also an IEEE fellow.

The Prophecies of St. Malachy Peter Bander,2016-04-01 The short; cryptic prophecies of St. Malachy; the Primate of Ireland; made circa 1140 while on a visit at Rome; about each Pope from his time till the End of Time--all based on visions he had at the time. From what we know of recent Popes; these prophecies are accurate; based on interior evidence alone. What is so very sobering is the fact there are only 2 Popes left after Pope John Paul II!!

Lucha libre ,2005 Take one part Mexi-Monster cinema, one part Teenage Mutant Ninja Turtles, throw in a little Zoro, the WWF and the knit-costume-wearing performance art collective Forcefield, and you come up with the raw, vivid, and psychologically unhinged world of Lucha Libre the sports-entertainment phenomenon that first swept Mexico and now the world. Photographer Lourdes Grobet's penentrating study of Mexican professional wrestling culture features more than 500 photographs of luchadores like Blue Demon, Santo, The Witch, Adorable Rub', El Solitario and Hurricane Ramirez, as well as pictures of their families, friends and fans--onstage, backstage and even at home. Lucha Libre also includes photographs of stickers, flyers, postcards, stills from Mexi-lucha-cinema, interviews with the wrestlers, essays and much, much more! Maximum Entropy and Ecology John Harte,2011-06-23 This pioneering graduate textbook provides readers with the concepts and practical tools required to understand the maximum entropy principle, and apply it to an understanding of ecological patterns. Rather than building and combining mechanistic models of ecosystems, the approach is grounded in information theory and the logic of inference. Paralleling the derivation of thermodynamics from the maximum entropy principle, the state variable theory of ecology developed in this book predicts realistic forms for all metrics of ecology that describe patterns in the distribution, abundance, and energetics of species over multiple spatial scales, a wide range of habitats, and diverse taxonomic groups. The first part of the book is foundational, discussing the nature of theory, the relationship of ecology to other sciences, and the concept of the logic of inference. Subsequent sections present the fundamentals of macroecology and of maximum information entropy, starting from first principles. The core of the book integrates these fundamental principles, leading to the derivation and testing of the predictions of the maximum entropy theory of ecology (METE). A final section broadens the book's perspective by showing how METE can help clarify several major issues in conservation biology, placing it in context with other theories and highlighting avenues for future research.

Cannery Women, Cannery Lives Vicki L. Ruiz,1987-08-01 Women have been the mainstay of the grueling, seasonal canning industry for over a century. This book is their collective biography--a history of their family and work lives, and of their union. Out of the labor militancy of the 1930s emerged the United Cannery, Agricultural, Packing, and Allied Workers of America (UCAPAWA). Quickly it became the seventh largest CIO affiliate and a rare success story of women in unions. Thousands of Mexican and Mexican-American women working in canneries in southern California established effective, democratic trade union locals run by local members. These rank-and-file activists skillfully managed union affairs, including negotiating such benefits as maternity leave, company-provided day care, and paid vacations--in some cases better benefits than they enjoy today. But by 1951, UCAPAWA lay in ruins--a victim of red baiting in the McCarthy era and of brutal takeover tactics by the International Brotherhood of Teamsters.
