The Everything Store Brad Stone, 2013-10-15 The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as the definitive account of how a tech icon came to life. Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. *The Everything Store* is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

Digital Copyright Jessica Litman, Professor Litman's work stands out as well-researched, doctrinally solid, and always piercingly well-written. -JANE GINSBURG, Morton L. Janklow Professor of Literary and Artistic Property, Columbia University Litman's work is distinctive in several respects: in her informed historical perspective on copyright law and its legislative policy; her remarkable ability to translate complicated copyright concepts and their implications into plain English; her willingness to study, understand, and take seriously what ordinary people think copyright law means; and her creativity in formulating alternatives to the copyright quagmire. -PAMELA SAMUELSON, Professor of Law and Information Management; Director of the Berkeley Center for Law & Technology, University of California, Berkeley In 1998, copyright lobbyists succeeded in persuading Congress to enact laws greatly expanding copyright owners' control over individuals' private uses of their works. The efforts to enforce these new rights have resulted in highly publicized legal battles between established media and new upstarts. In this enlightening and well-argued book, law professor Jessica Litman questions whether copyright laws crafted by lawyers and their lobbyists really make sense for the vast majority of us. Should every interaction between ordinary consumers and copyright-protected works be restricted by law? Is it practical to enforce such laws, or expect consumers to obey them? What are the effects of such laws on the exchange of information in a free society? Litman's critique exposes the 1998 copyright law as an incoherent patchwork. She argues for reforms that reflect common sense and the way people actually behave in their daily digital interactions. This paperback edition includes an afterword that comments on recent developments, such as the end of the Napster story, the rise of peer-to-peer file sharing, the escalation of a full-fledged copyright war, the filing of lawsuits against thousands of

individuals, and the June 2005 Supreme Court decision in the Grokster case. Jessica Litman (Ann Arbor, MI) is professor of law at Wayne State University and a widely recognized expert on copyright law.

Winners Take All - The 9 Fundamental Rules of High Tech Strategy Tony Seba, 2006-07-09 'Winners Take All' is about building a product and a company into a winner. Written by Tony Seba, a high tech entrepreneur and Stanford University lecturer, this book is an easy-to-read guide to the strategies, tools, templates, and step-by-step implementation frameworks that recent Silicon Valley winners have used to achieve market leadership. Seba, who teaches entrepreneurship and strategic marketing looked at recent winners like Google, Symantec, Netflix, Apple, Craigslist, Salesforce, and compared them to the competition (Yahoo, McAfee, Sony) in order to learn what differentiated these companies. He found 9 really simple rules that winning companies can follow. To test the 9 Rules's predictive power, the author published two portfolios. 18 months later the results were compelling: 80% of the '9 Rules' companies beat the market and the portfolio had a 57% return (details: www.tonyseba.com). *Winners Take All* is refreshingly free of buzzwords and consultant-speak.

My First Recession Geert Lovink, 2003 *My First Recession* starts when the party is over. This study maps the transition of critical Internet culture from the mid-to-late 1990s Internet craze to the dotcom crash, the subsequent meltdown of global financial markets, and 9/11. In his discussion of the dotcom boom-and-bust cycle, Geert Lovink lays out the challenges faced by critical Internet culture today. In a series of case studies, Lovink meticulously describes the ambivalent attitude that artists and activists take as they veer back and forth between euphoria and skepticism. As a part of this process, Lovink examines the internal dynamics of virtual communities through an analysis of the use of moderation and collaborative filtering on mailing lists and weblogs. He also confronts the practical and theoretical problems that appear as artists join the growing number of new-media education programs. Delving into the unexplored gold mines of list archives and weblogs, Lovink reveals a world that is largely unknown to both the general public and the Internet visionaries.

Linux in a Nutshell Ellen Siever,Aaron Weber,Stephen Figgins,Robert Love,Arnold Robbins,2005 Over the last few years, Linux has grown both as an operating system and a tool for personal and business use. Simultaneously becoming more user friendly and more powerful as a back-end system, Linux has achieved new plateaus: the newer filesystems have solidified, new commands and tools have appeared and become standard, and the desktop--including new desktop environments--have proved to be viable, stable, and readily accessible to even those who don't consider themselves computer gurus. Whether you're using Linux for personal software projects, for a small office or home office (often termed the SOHO environment), to provide services to a small group of colleagues, or to administer a site responsible for millions of email and web connections each day, you need quick access to information on a wide range of tools. This book covers all aspects of administering and making effective use of Linux systems. Among its topics are booting, package management, and revision control. But foremost in Linux in a Nutshell are the utilities and commands that make Linux one of the most powerful and flexible systems available. Now in its fifth edition, Linux in a Nutshell brings users up-to-date with the current state of Linux. Considered by many to be the most complete and authoritative command reference for Linux available, the book covers all substantial user, programming, administration, and networking commands for the most common Linux distributions. Comprehensive but concise, the fifth edition has been updated to cover new features of major Linux distributions. Configuration information for the rapidly growing commercial network services and community update services is one of the subjects covered for the first time. But that's just the beginning. The book covers editors, shells, and LILO and GRUB boot options. There's also coverage of Apache, Samba, Postfix, sendmail, CVS, Subversion, Emacs, vi, sed, gawk, and much more. Everything that system administrators, developers, and power users need to know about Linux is referenced here, and they will turn to this book again and again.
