Confetti Girl Diana Lopez, 2009-06-01 Apolonia Lina Flores is a sock enthusiast, a volleyball player, a science lover, and a girl who's just looking for answers. Even though her house is crammed full of books (her dad's a bibliophile), she's having trouble figuring out some very big questions, like why her dad seems to care about books more than her, why her best friend's divorced mom is obsessed with making cascarones (hollowed eggshells filled with colorful confetti), and, most of all, why her mom died last year. Like colors in cascarones, Lina's life is a rainbow of people, interests, and unexpected changes. In her first novel for young readers, Diana López creates a clever and honest story about a young Latina girl navigating growing pains in her South Texan city.

Computer Vision Metrics Scott Krig, 2014-06-14 Computer Vision Metrics provides an extensive survey and analysis of over 100 current and historical feature description and machine vision methods, with a detailed taxonomy for local, regional and global features. This book provides necessary background to develop intuition about why interest point detectors and feature descriptors actually work, how they are designed, with observations about tuning the methods for achieving robustness and invariance targets for specific applications. The survey is broader than it is deep, with over 540 references provided to dig deeper. The taxonomy includes search methods, spectra components, descriptor representation, shape, distance functions, accuracy, efficiency, robustness and invariance attributes, and more. Rather than providing 'how-to' source code examples and shortcuts, this book provides a counterpoint discussion to the many fine opencv community source code resources available for hands-on practitioners.

The Complete Book of Spaceflight David Darling, 2008-04-21 A commanding encyclopedia of the history and principles of spaceflight—from earliest conceptions to faster-than-light galaxy-hopping. Here is the first truly comprehensive guide to space exploration and propulsion, from the first musings of the Greeks to current scientific speculation about interstellar travel using warp drives and wormholes. Space buffs will delight in its in-depth coverage of all key manned and unmanned missions and space vehicles—past, present, and projected—and its clear explanations of the technologies involved. Over the course of more than 2,000 extensively cross-referenced entries, astronomer David Darling also provides fascinating insights into the cultural development of spaceflight. In vivid accounts of the major characters and historical events involved, he provides fascinating tales of early innovators, the cross-pollination that has long existed between science fiction and science fact, and the sometimes obscure links between geopolitics, warfare, and advances in rocketry.

Tortilla Sun Jennifer Cervantes, 2010-07-01 When twelve-year-old Izzy discovers a beat-up baseball marked with the words *Because magic* while unpacking in yet another new apartment, she is determined to figure out what it means. What secrets does this old ball have to tell? Her mom certainly isn't sharing any—especially when it comes to Izzy's father, who died before Izzy was born. But when she spends the summer in her Nana's remote New Mexico village, Izzy discovers long-buried secrets that come alive in an enchanted landscape of watermelon mountains, whispering winds, and tortilla suns. Infused with the flavor of the southwest and sprinkled with just a pinch of magic, this heartfelt middle grade debut is as rich and satisfying as Nana's homemade enchiladas.

Crusoe's Books Bill Bell, 2022-01-13 This is a book about readers on the move in the age of Victorian empire. It examines the libraries and reading habits of five reading constituencies from the long nineteenth century: shipboard emigrants, Australian convicts, Scottish settlers, polar explorers, and troops in the First World War. What was the role of reading in extreme circumstances? How were new meanings made under strange skies? How was reading connected with mobile communities in an age of expansion? Uncovering a vast range of sources from the period, from

diaries, periodicals, and literary culture, Bill Bell reveals some remarkable and unanticipated insights into the way that reading operated within and upon the British Empire for over a century.

EPZ Nietzsche and the Vicious Circle Pierre Klossowski, 2005-06-05 'The greatest book of philosophy I have ever read, on a par with Nietzsche himself.' Michel Foucault Pierre Klossowski (1905-) is the author of numerous philosophical works, as well as several novels. He published many translations of German poets and philosophers, including Nietzsche himself. Recognised as a masterpiece of Nietzsche scholarship, *Nietzsche and the Vicious Circle* emphasises and explores the notion of Eternal Return - central to an understanding of Nietzsche's self-denial, self-refutation and self-consumption.
