Understanding Word and Sentence G.B. Simpson,1991-01-14 Research concerning structure and processing in the mental lexicon has achieved central prominence within cognitive psychology and psycholinguistics. Historically, however, much of the research on the lexicon focussed not on its role in language comprehension, but as a medium for studying semantic memory. This picture has changed in recent years, with much more research examining the role of lexical processes and output in language comprehension. Gathered together in this volume is the work of some of those researchers who are responsible for this shift of emphasis. Chapters deal with the role of sentence contexts in word recognition, processes involved in the activation and enhancement of lexical information, and the interaction of lexical and syntactic information in sentence processing. A wide range of theoretical and empirical issues relating to language understanding are discussed.

Framing Class Diana Kendall,2011-04-16 Framing Class explores how the media, including television, film, and news, depict wealth and poverty in the United States. Fully updated and revised throughout, the second edition of this groundbreaking book now includes discussions of new media, updated media sources, and provocative new examples from movies and television, such as The Real Housewives series and media portrayals of the new poor and corporate executives in the recent recession. The book introduces the concepts of class and media framing to students and analyzes how the media portray various social classes, from the elite to the very poor. Its accessible writing and powerful examples make it an ideal text or supplement for courses in sociology, American studies, and communications.

Rethinking Fiction after the 2007/8 Financial Crisis Mirosław Aleksander Miernik,2021-03-31 This book provides insight into the impact the 2007/8 financial crisis and subsequent Great Recession had on American fiction. Employing an interdisciplinary approach which combines literary studies with anthropology, economics, sociology, and psychology, the author attempts to gauge the changes that the crisis facilitated in the American novel. Focusing on four books, Elizabeth Strout's My Name Is Lucy Barton, Philipp Meyer's American Rust, Sophie McManus's The Unfortunates, and William Gibson's The Peripheral, the study traces how they present such issues as poverty, wealth, equality, distinction, opportunity, and how they relate both to traditional criticisms of consumer culture and the US economy, particularly those issues that have received more attention as a result of the crisis. It also tackles the issue of genre and interpretation in this period, as well as what methods the analyzed novels employ in order to highlight the decreasing social mobility of Americans.

The Political Mind George Lakoff,2008 A New York Times best-selling author explains how the physical nature of the brain affects people's political decisions, suggesting that changing one's mind is just as much a physical process as it is a psychological function. By the author of Don't Think of an Elephant! 60,000 first printing.

The Politics of Fear Ruth Wodak,2015-09-26 Winner of the Austrian Book Prize for the 2016 German translation, in the category of Humanities and Social Sciences. Populist right-wing politics is moving centre-stage, with some parties reaching the very top of the electoral ladder: but do we know why, and why now? In this book Ruth Wodak traces the trajectories of such parties from the margins of the political landscape to its centre, to understand and explain how they are transforming from fringe voices to persuasive political actors who set the agenda and frame media debates. Laying bare the normalization of nationalistic, xenophobic, racist and antisemitic rhetoric, she builds a new framework for this 'politics of fear' that is entrenching new social divides of nation, gender and body. The result reveals the micro-politics of right-wing populism: how discourses, genres, images and texts are performed and manipulated in both formal and also everyday contexts with profound consequences. This book is a must-read for scholars and students of linguistics, media and politics wishing to understand these dynamics that are re-shaping our political space.

Religion and Security in South and Central Asia K. Warikoo, 2010-11 Religion and security play an important role in traditional societies. In South and Central Asia, traditional and moderate Islamic beliefs and practices with strong indigenous and Sufi content are diametrically opposed to radical Wahabi and Taliban brands of Islam intolerant of other cultures and groups. The emergence of radical extremist and violent Islamist movements poses serious challenges to the secular and democratic polity, inter-religious harmony, security and territorial integrity of states in the region. As such, religious extremism, terrorism, drug trafficking and arms smuggling are viewed by various countries in South and Central Asia and also in the West as the main threats to their security. Against this backdrop, this book provides local perspectives on religion, security, history and geopolitics in South Asia and Central Asia in an integrated manner. Presenting a holistic and updated view of the developments inside and across South and Central Asia, it offers concise analyses by experts on the region. Contributors discuss topics such as the resurgence of the Taliban in Afghanistan, the politics and practice of Islamist terrorism in India, and the security challenges posed by religious radicalism in Bangladesh. The book makes a significant contribution to South and Central Asian Studies, as well as studies on Regional Security.
