Agricultural Statistics 2018 U.S. Department of Agriculture,2019-07-15 Agricultural Statistics is published each year to meet the diverse need for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of facts in forms suited to most common use. Statistics presented in many of the tables represent actual counts of the items covered. Most of the statistics relating to foreign trade and to government programs, such as numbers and amounts of loans made to farmers, and amounts of loans made by the Commodity Credit Corporation, etc., are data of this type. A large number of other tables, however, contain data that are estimates made by the Department of Agriculture. The estimates for crops, livestock, and poultry made by the U.S. Department of Agriculture are prepared mainly to give timely current state and national totals and averages. They are based on data obtained by sample surveys of farmers and of people who do business with farmers. The survey data are supplemented by information from the Census of Agriculture taken every five years. Being estimates, they are subject to revision as more data become available from commercial or government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on area, production, numbers, price, value, supplies, and disposition are based on official Department estimates. They exclude states for which no official estimates are compiled. Extensive data includes statistics for the following: -Grain and Feed -Cotton, Tobacco, Sugar Crops, and Honey -Oilseeds, Fats, and Oils -Vegetables and Melons -Hay, Seeds, and Minor Field Crops -Cattle, Hogs, and Sheep -Dairy and Poultry -Insurance, Credit & Cooperatives -Agricultural Conservation & Forestry -Consumption & Family Living -Fertilizers & Pesticides Miscellaneous Agricultural Statistics such as Foreign Agricultural Trade Statistics including exports, fisheries and more. Professionals in the following fields to include farmers, ranchers, soil conservationists, surveyors, agricultural economist consultants, livestock manufacturers, livestock feedlot operators, food distributors, animal scientists, food chemists, food brokers, farm and land appraisers (and more) may have the greatest interest in this volume.

Truth, Lies, and O-Rings Allan J. McDonald,2012-03-11 On a cold January morning in 1986, NASA launched the Space Shuttle Challenger, despite warnings against doing so by many individuals, including Allan McDonald. The fiery destruction of Challenger on live television moments after launch remains an indelible image in the nation's collective memory. In Truth, Lies, and O-Rings, McDonald, a skilled engineer and executive, relives the tragedy from where he stood at Launch Control Center. As he fought to draw attention to the real reasons behind the disaster, he was the only one targeted for retribution by both NASA and his employer, Morton Thiokol, Inc., makers of the shuttle's solid rocket boosters. In this whistle-blowing yet rigorous and fair-minded book, McDonald, with the assistance of internationally distinguished aerospace historian James R. Hansen, addresses all of the factors that led to the accident, some of which were never included in NASA's Failure Team report submitted to the Presidential Commission. Truth, Lies, and O-Rings is the first look at the Challenger tragedy and its aftermath from someone who was on the inside, recognized the potential disaster, and tried to prevent it. It also addresses the early warnings of very severe debris issues from the first two post-Challenger flights, which ultimately resulted in the loss of Columbia some fifteen years later.

Begging for Change Robert Egger,2010-07-06 You are a good person. You are one of the 84 million Americans who volunteer with a charity. You are part of a national donor pool that contributes nearly $200 billion to good causes every year. But you wonder: Why don't your efforts seem to make a difference? Fifteen years ago, Robert Egger asked himself this same question as he reluctantly climbed aboard a food service truck for a night of volunteering to help serve meals to the homeless. He wondered why there were still people waiting in line for soup in this day and age. Where were the drug counselors, the job trainers, and the support team to help these men and women get off the streets? Why were volunteers buying supplies from grocery stores when restaurants were throwing away unused fresh food every night? Why had politicians, citizens, and local businesses allowed charity to become an end in itself? Why wasn't there an efficient way to solve the problem? Robert knew there had to be a better way. In 1989, he started the D.C. Central Kitchen

by collecting unused food from local restaurants, caterers, and hotels and bringing it back to a central location where hot, nutritious meals were prepared and distributed to agencies around the city. Since then, the D.C. Central Kitchen has been named one of President Bush Sr.'s Thousand Points of Light and has become one of the most respected and emulated nonprofit agencies in the world, producing and distributing more than 4,000 meals a day. Its highly successful 12-week job-training program equips former homeless transients and drug addicts with culinary and life skills to gain employment in the restaurant business. In Begging for Change, Robert Egger looks back on his experience and exposes the startling lack of logic, waste, and ineffectiveness he has encountered during his years in the nonprofit sector, and calls for reform of this $800 billion industry from the inside out. In his entertaining and inimitable way, he weaves stories from his days in music, when he encountered legends such as Sarah Vaughan, Mel Torme, and Iggy Pop, together with stories from his experiences in the hunger movement -- and recently as volunteer interim director to help clean up the beleaguered United Way National Capital Area. He asks for nonprofits to be more innovative and results-driven, for corporate and nonprofit leaders to be more focused and responsible, and for citizens who contribute their time and money to be smarter and more demanding of nonprofits and what they provide in return. Robert's appeal to common sense will resonate with readers who are tired of hearing the same nonprofit fund-raising appeals and pity-based messages. Instead of asking the who and what of giving, he leads the way in asking the how and why in order to move beyond our 19th-century concept of charity, and usher in a 21st-century model of change and reform for nonprofits. Enlightening and provocative, engaging and moving, this book is essential reading for nonprofit managers, corporate leaders, and, most of all, any citizen who has ever cared enough to give of themselves to a worthy cause.

Squash James Zug,2007-11-01 The first comprehensive history of squash in the United States, Squash incorporates every aspect of this increasingly popular sport: men's and women's play, juniors and intercollegiates, singles and doubles, hardball and softball, amateurs and professionals. Invented by English schoolboys in the 1850s, squash first came to the United States in 1884 when St. Paul's School in New Hampshire built four open-air courts. The game took hold in Philadelphia, where players founded the U.S. Squash Racquets Association in 1904, and became one of the primary pastimes of the nation's elite. Squash launched a U.S. Open in 1954, but its present boom started in the 1970s when commercial squash clubs took the sport public. In the 1980s a pro tour sprung up to offer tournaments on portable glass courts in dramatic locales such as the Winter Garden at the World Trade Center. James Zug, with access to private archives and interviews with hundreds of players, describes the riveting moments and sweeping historical trends that have shaped the game. He focuses on the biographies of legendary squash personalities: Eleo Sears, the Boston Brahmin who swam in the cold Atlantic before matches; Hashim Khan, the impish founder of the Khan dynasty; Victor Niederhoffer, the son of a Brooklyn cop; and Mark Talbott, a Grateful Dead groupie who traveled the pro circuit sleeping in the back of his pickup. A gripping cultural history, Squash is the book for which all aficionados of this fast-paced, exciting game have been waiting.

Web Cartography Jan-Menno Kraak,Allan Brown,2003-09-02 Maps and atlases are created as soon as information on our geography has been clarified. They are used to find directions or to get insight into spatial relations. They are produced and used both on paper as well as on-screen. The Web is the new medium for spreading and using maps. This book explains the benefits of this medium from the perspective of the user, and the map provider. Opportunities and pitfalls are illustrated by a set of case-studies. A website accompanies the book and provides a dynamic environment for demonstrating many of the principles set out in the text, including access to a basic course in Internet cartography as well as links to other interesting places on the Web. Professor Kraak looks at basic questions such as I have this data what can I do with it? and discusses the various functions of maps on the web. Web Cartography also looks at the particularities of multidimensional web maps and addresses topics such as map contents (colour, text and symbols), map physics (size and resolution), and the map environment (interface design/site contents).

Pay As You Wish Pricing Jagmohan Raju,Z. Zhang,2010-01-12 This Element is an excerpt from Smart Pricing (ISBN: 9780131494183) by Jagmohan Raju and Z. John Zhang. Available in print and digital formats. What your business can learn from Radiohead's successful experiment with "pay as you wish" pricing. On October 9, 2007, the English alternative rock band Radiohead began an experiment: Rather than price their music conventionally, they let their fans pay whatever they wanted to download their latest 10-song album, In Rainbows. At the inrainbows.com checkout page, visitors found an empty price box. When they clicked on it, a message said, "It's up to you."....

Missile Design and System Engineering Eugene L. Fleeman,Joseph A. Schetz,2012 In his latest book, Missile Design and System Engineering, Eugene L. Fleeman comprehensively reviews the missile design and system engineering process, drawing on his decades of experience in designing and developing missile systems. Addressing the needs of aerospace engineering students and professors, systems analysts and engineers, and program managers, the book examines missile design, missile technologies, launch platform integration, missile system measures of merit, and the missile system development process. This book has been adapted from Fleeman's earlier title, Tactical Missile Design, Second Edition, to include a greater emphasis on system engineering. --Back cover.

Trading Myths ,2012 To revive anemic growth in the aftermath of the global financial crisis, policy makers in many mature economies are working to increase investment and net exports, hoping to sustain growth

and employment at a time when domestic consumption looks to remain weak. They are focusing on manufacturing in particular, amid a perception that these countries are losing ground to emerging markets. But efforts to stimulate manufacturing and exports may raise the risk of protectionism. It's important for the debate on trade and its impact to be rooted in facts. With this point in mind, a report from the McKinsey Global Institute (MGI) - Trading myths: Addressing misconceptions about trade, jobs, and competitiveness - analyzes the performance of the mature economies' tradable sectors.--Extracted from MGI website on 22 May 2012.
